Welcome to our 27th Annual 'Keepin' Kind' Production Sale. After 35 years in the seedstock business, we have been blessed to have so many friends in this business. We are very grateful for the opportunity to bring another set outstanding stout bulls to you, our customer.

We know that there are other places to make your seed stock purchases and we appreciate your loyalty. Last year we sold 90% of our bulls to repeat customers. Taking care of you our customer is our #1 priority. As always, we offer an unconditional guarantee on all cattle sold. If you should have a bull go down during breeding season, we can usually have a replacement for you within a few days, available at our ranch or we will try to meet you half way, depending on the distance. We are very proud to say that we replace very few bulls each year.

Our Nebraska herd consist of over 450 head of registered Limousin, Lim- Flex and Angus cattle. Plus we have recently purchased 500+ of registered Limousin and Lim-Flex females in Plainville, KS. Our Southern location called LV Bar will be having their annual bull sale in Plainville on Feb. 10th selling 120hd of coming 2 yr old bulls. Our goal is to become a one-stop bull shop for all your genetic needs. Lonely Valley's Bull Battery continues to be ranked in the top 10% for all EPD traits.

Currently our bull battery ranks in the top of the breed for weaning and yearling growth and milk and does so with a low to moderate birth weight. Our Marbling and Scrotal circumference EPD is unsurpassed, not just on one bull, but all LVLS herd sires combined. 30 plus years of selection pressure really do pay off. We continue to place extensive selection pressure on calm, easy doing cattle. This set of bulls have been easy to work with. You will notice the difference. As well, cows that fail to breed being sent down the road. Fertility in these bulls is excellent with an average scrotal measurement that is unequaled in the Limousin and Angus.

The bulls will be available to be viewed at the ranch near Creston a few days prior to the sale. As well, we will have 300 calves on the ground by sale day and several of the herd bulls for your viewing. We will be serving a complimentary Limousin Beef lunch at 11:00 a.m. Should you need assistance with travel plans, trucking and delivery or anything else, please call and we will be happy to assist you. See you Saturday, February 24th at the Ranch.

Sincerely,

*Lonely Valley Seedstock*

---

**AIRPORTS:**

Columbus Municipal Airport, Norfolk Regional Airport & Omaha Eppley Airfield.

**DELIVERY:**

Free delivery within a 250 mile radius and cost share arrangements will be made for traveling 250+ miles.

**ANNOUNCEMENTS:**

Announcements made sale day will take precedence over printed material in the catalog. Please take note of any changes.

**SEMEN:**

Lonely Valley Seedstock reserves the right to semen int. on any bull in the sale.

**TERMS:**

Terms of the sale are cash unless prior credit arrangements are established between buyer and seller. Settlements are to be made with the clerk immediately after the conclusion of the auction.

**MAIL & PHONE BIDS:**

Mailed or phone bids will be handled in a confidential matter. If you are unable to attend the sale, simply contact anyone in the sale day phone numbers. Please call in advance of the sale so we can help you ringside sale day. All cattle purchased through our 'sight unseen program' are unconditionally guaranteed, if the cattle purchased for you on order are not what you expected, we don't expect you to pay for them, no questions.

**BLOOD TYPE FOR PARENTAGE VERIFICATION:**

All animals sold are guaranteed to be offspring of the recorded parents. Under the rules of NALF, all bulls born after January 1, 1991 that are to be used for artificial insemination or used naturally in a herd other than the owner of record must be parent verified by blood typing to both sire and dam. All females born after July 1, 1987 and December 31, 1990 that are to be used for artificial insemination or naturally in a herd other than the owner of record must be sire verified through blood typing. Sellers shall make the necessary parent blood samples available to purchasers upon written request by the purchaser's so long as a written request is received by sellers within 60 days after the sale of the applicable animal.

**LIABILITY:**

Each animal will be the buyer's risk as soon as it is sold, but will be cared for by the seller for a reasonable period of time. Every precaution will be taken for the welfare of the cattle sold. Neither owner nor sales management can be responsible for accidents, but every effort will be made to provide for safety and comfort of those attending the sale.

**INSURANCE:**

Insurance on your purchase can be provided by Mark Smith, Grass Roots Genetics & Consulting, Ankeny, IA, 515.229.5227

**PAYMENT:**

Cattle must be paid for at the time of the sale unless prior arrangements are made with sale management at the time of the sale at 615.330.2735. 3% fee on all credit card payments.

## ABOUT OUR CATTLE

---

**FEEDING:** The yearling cattle are fed to gain 3.25 per day, receiving a ration of corn gluten and alfalfa. We feed our bulls to gain sufficiently, without pushing a lot of corn in the ration. We believe that corn causes structure problems later in life and causes yearling bulls to 'melt' when turned out to pasture. We are very proud of the success rate our yearling bulls have had.

**SEMEN TESTING:** All bulls have been semen tested and measured and a certificate will go with each bull sold.

**UNCONDITIONAL GUARANTEE:** If the cattle that you purchase at our sale fail to meet your expectations, we will replace the animal, providing you return the animal to our ranch at your expense. We will provide you with a replacement animal or give you full credit toward next year's sale or a cash refund. This guarantee expires after the first breeding season. We ask that you provide travel expenses for the replacement animal. Customer Service is #1!

## ANALYZE THE PERFORMANCE DATA

---

**BW :: BIRTH WEIGHT** We take birth weights on our cattle in order to give you some method of determining calving ease. Larger calves will sometimes come very easy. We believe that calf structure determines calving ease along with size.

**WW :: WEANING WEIGHT** This is the weight of the cattle taken at weaning time adjusted to a constant age of 205 days, and a good indication of early growth.

**YW :: YEARLING WEIGHT** This is the weight of the cattle taken at approximately one year of age and adjusted to a constant age of 365 days with at least 150 days between actual weaning and yearling weight dates.

**ADG :: AVERAGE DAILY GAIN** Growth rate is highly heritable and these numbers will give you an idea of how the cattle respond to environmental conditions. i.e. feed, weather, etc.

## HOW TO FIND WHAT YOU ARE LOOKING FOR IN THE SALE

---

We first select without papers, finding all visible phenotypic defects and problems. Once the outliers are eliminated, we then select on paper, eliminating those cattle with performance, EPD or genetic problems. This two-step selection process is done at weaning and repeated again just before the sale with yearling data and semen checking added to the criteria. Of course, disposition is still the number one culling criteria in our herd. Choose the type of bull that best meets your cowherd or feel free to call us to further discuss your options. We would be happy to visit with you.

**'MAXIMIZERS':** Purebred & High Percentage Limousin Bulls These lean, red meat machines will maximize hybrid vigor on your British and British X cows. These bulls will maximize performance without sacrificing calving ease. Several of these prospects go back into the purebred industry each year, being purchased by other purebred breeders.

**'STABILIZERS':** 75% Limousin x 25% Angus Bulls Our most popular hybrid for 28 years, these ultra-thick and deep machines are unequaled in their muscle, volume and phenotype. These bulls work well on most any cowherd, offering the extreme thickness of Limousin and the volume of Angus. Hybrid vigor can be increased and maintained with these bulls on most all straight bred and crossbred cows.

**'OPTIMIZERS':** 50% Angus x 50% Limousin Bulls These Angus x Limousin F1 Composites have been a hit on our sale for many years as well. Many cattlemen are using these bulls to moderate their cow size and create consistency or in a four-way cross breeding system. Optimizers are moderately framed, very deep and offer much more thickness than the purebred Angus cattle.

**'OPTIMIZERS':** 25% Limousin x 75% Angus Bulls They are 25% Limousin and 75% Angus. These bulls combine the best of the numbers of the elite Angus combined with the prominent Limousin. These bulls are huge numbered and have some of the strongest weights and stats of the entire sale offering. These bulls bring the statement of Lim-Flex to a whole new level in our breed. We urge you to see for yourself how any one of these bulls might fit into your program to sire a uniform and very desirable calf crop.

**'ANGUS':** Purebred Registered Angus Bulls Over the past several years we have acquired over 100 Registered Angus females, along with flushing one of our top Angus cows in our Embryo Transfer Program, to promulgate a complimentary breed to our existing lines of seed stock. Our goal is to provide Purebred Angus bulls that can offer an ideal complement to high percentage Limousin based cows. We have known for years that the Limousin x Angus cross is the best, now we will be offering both sides of the equation.

Sired by the popular syndicated herd sire, LVLS Bank Account 8116B, who has been used in many of the top programs in the country to produce an elite calf crop for the past several years. The depth of quality is evident in this sire group and certainly speaks for itself, it is one of the most talked about offerings to ever grace the pages of a Lonely Valley sale catalog. 37% Lim-Flex, homozygous black herd sire prospect who is equally impressive for milk and carcass traits, truly exemplifying what the good hybrid cattle in our industry are meant to do. Solid set of calving ease, maternal and carcass EPD's, ranking in the top 10 % for MK and the top 15% for BW, MB, and SMTI. A weaning ratio 110, proves that growth isn't forgotten in this individual and it is an added bonus to the traits mentioned above. We would take hundreds made just like this one.

The industry speaks of the value of bulls who are genomically proven to hit the mark at both birth and post weaning. 1040E is the moderate birth weight, high growth son of LVLS Bank Account, who ties together blue collar performance and movie star good looks. This homozygous black, 62% Lim-Flex herd sire prospect ranks in the top 4% of the breed for YW, along with being in the top 10% for WW, proving that you don't have to sacrifice quality for statistical strength. A weaning ratio of 106, makes 1040E another top performer in our program after multiple sorts to get down to just the elite bulls. His maternal grand sire is a legend in the Limousin breed, JCL Lodestar 27L.

If you are looking for a low percentage, high growth, high marbling bull, don't miss this son of PBRS Bunk House 48B. He is homozygous black and homozygous polled and ties together some many parts and pieces into one high quality package. Bunk House was bred in the P Bar S program, where only the best of the best are allowed into their bull market.

He is in the top 3% of non-parent bulls for SMTI, the top 4% MB, and the top 5% for YW. This unique data profile, not only adds to his value, it also multiplies the type of cows that he will work on. Like his paternal siblings in this offering, 2615E also pushed down the scales with a weaning ratio of 113. His pedigree, combines many proven sires that are household names in the industry, MAGS Yip, Twin Valley Precision, SAV Net Worth, and BR Midland.

We are privileged to have a high-quality set of Bunk House calves to offer this year, including 8207E who is a homozygous polled and homozygous black, high growth, 62% Lim-Flex herd sire in the making. 8207E shows a yearling EPD of 119, that lands him in the top 10% of the population for YW, the post weaning growth in this individual is incredible. We have just sat back and watched him go full force from the time he hit the ground. If you are looking for a herd sire who has just flat "gotten after it" and will pass that trait on to his progeny, here is your answer. His dam LVLS 8205T traces back to the maternal legend BAR EXT Traveler 205 who has yielded some of the very finest females on the Western Range. Beautiful udders, particularly fertile and attractive to look at.

3941E is a true profit generator based on his lineage and statistical profile. This double black and polled, 50% Lim-Flex individual is stack for potential in terms of economic returns. He ranks in the top 10% for YW, MB, and SMTI, making him one that is able to produce herd sires of cattle that you can feed all the way through to harvest. Fast growing and high marbling, is always a treat to any ranches bottom line. His dam is a solid producer in the Lonely Valley herd, showing 4@104 for WW, and 2 @ 106 for YW. Individually speaking, 3941E posted a 103 WW ratio

	FRENZEN BLACKBIRD M120

His dam is a daughter of SAV Brave 8320, that has been productive female in the Lonely Valley Herd. The Schaff bred females in our program work particularly well. Their additional stoutness and growth are a positive addition to our Angus and Lim-Flex program. 25E absolutely killed it at weaning time and yielded a 114 WW ratio. This homo/homo black and polled Lim-Flex bulls is in his working clothes and still looks like a million bucks. We can't wait to see what this one will look like mid-summer when he is done breeding cows, there is no doubt that he won't change much and he will still look the part. This high growth, high marbling individual, who ranks in the top 3% for YW, along with being in the top 10% for SMTI would work great in scenarios where you need to increase your bottom line on cattle that are priced on the grid as fat cattle.

This phenotypically black and polled 68% Lim-Flex son of PBRs Bunk House is out of a direct daughter of AUTO Black Dakota 129J. He is positively supported with actual growth on both sides of his pedigree. 04E ranks in the top 10% for YW, TM, and CW as well as the top 20% for WW. This great-lined and sure-footed Bunkhouse son had a WW ratio 112 and still had plenty of room left for growth. This is one of the several sire groups that we can't wait for another set to come this spring. They are really good cattle that do a lot of thing right.

This bull is the type of cattle we strive to produce. He is solid from end to end. He is long in his skeletal design, smooth through his shoulder and naturally thick. This is a son of PBRs Bunk House 48B, the powerful son of MAGS Yip that posted a 205 day weight of 817lbs and a yearling weight of 1261lbs, while scanning an impressive 15.1 REA. We admire this bull for his soundness, depth of body and natural thickness.

We were absolutely blessed with this great set of high growth Zodiac sons, they were a once in a lifetime crop of power bulls. 1039E shows a yearling EPD of 134, that puts him in the top 2 percentile for yearling weight and the top 5 for WW. He is homozygous black and homozygous polled and at 205 days was an impressive 772lbs, which penciled out to 112 ratio. To ratio over 100 in this group of bulls is saying a lot. We will put this group against any group in the country in terms of pure pounds of power. Dam of 1039E is a double bred AUTO Dollar General, adding that extra shot of maternal to this already impressive bio.

Elvis is sired by the popular MAGS Zodiac, who was the top selling bull at Magness Land and Cattle, and passes on tremendous growth time and time again. Zodiac has become THE bull in the breed to use to add growth and power in one generation. If improving the bottom line is your new year's resolution for 2018, here is the individual who can help you achieve that. He is homozygous black and homozygous polled, 53% Lim-Flex and ranks in the top 15% of his contemporaries for WW, YW, MB and SMTI. In addition to these calculated numbers, he had a 108 ww ratio. His dam AUTO Xtreme 668X, is sired by EXAR New Design 3903, that has weaned two calves with a 115 ratio. Your not only investing in a powerful herd sire with 668E, you investing in a cow family that we have high expectations for.

Ranking in the top 3% of the population for any trait is not something that is accomplished easily. 03E has more genetic growth to invest in. We take that for granted and tend to overlook just how hard it is to make ones with this much growth that don't sacrifice quality. In addition to his sky high WW numbers, he is in the top 10% for WW, and SMTI. After generation of selecting for cattle that grow and cows that milk, we are at the point where a 733lb weaning weight only ratios a 103. We truly believe these bulls will go head to head with any contemporary group in the country. His dam being a known daughter of maternal legend, Mytty In Focus. Like mentioned early in the catalog, the blending of Zodiac's power and the maternal maker, Mytty In Focus has yielded bulls that we are so proud to offer for public approval.

Here is a son of the Linhart/ Lonely Valley herd sire ADLL Axl 3007A, who is a son of SAV North Dakota 7451 out of the popular donor EF Yadda Yadda 809Y. Axl was one of the most popular bulls in Denver 2014, as he combined great depth, thickness and performance together in a complete package. 2933E will add fleshing ability, and muscle to his calves. He is homozygous polled and double black, 50% Lim-Flex bull with a rock solid data set across the board. Dam is a daughter of AHCC Westwind, who for many years was the go to sire in the breed to add grow and durability. She nursed 2933E to an impressive WW ratio of 105.

This is a 50% Lim-Flex bull out of ADLL Axl you don't want to pass up. Axl was one of the most popular bulls in Denver 2014 sired by Schaff's North Dakota and out of a great Deuce daughter. This bull has great depth, thickness and performance. He combines genetic predictability, natural performance and great outlines into a heck of a young herd sire prospect. If you want to raise cattle that commercial men desire, think about this young giant.

LVLS 2 COMMERCIAL ANGUS	COMMERCIAL ANGUS

LVLS Edgar 2E is one of the sale features and one of the finest that LVLS has to offer. He is a son of ADLL Axl 3007A, a very stout made and prominent son of SAV North Dakota from the famed EF Yadda Yadda 809Y donor female that is a lead donor in the Linhart program. This young 25% Lim-Flex herd sire ranks in the top 3% of the breed for milk, had a birth weight of 88#. We admire his structure correctness from the ground up and the extreme amount of muscle he has. Buy with confidence as this is big stout, rugged herd sire prospect from the heart of the LVLS program.

This ADLL Axl son is about as stout as they come. He is so impressive in terms of sheer mass, dimension and flexibility. LVLS Edgar 2E is well balanced, deep bodied and shows excellent breed character. Our good friend and industry leader, Charles Linhart selected this bull's dam to be the foundation donor for his son's herd. We have been privileged to watch her impact be seen in both his program and ours. Her progeny, such as Drifter 36D are "good stock" - they are fault free, low maintenance and get the job done year after year. He is a 25% bull that continues to impress us every day.

If this spring's bull search has you looking for an individual who is stacked in terms of cow power and fresh genetics, 7307E is your answer and there is no need to look any further. His dam is one of our all-time favorites; she has produced eight calves with an average WW ratio of 107. 50% Lim-Flex, double polled and homozygous black son of Axl, that ranks in the top % for milk. He is solid in his genetic profile without any sacrifices or outliers. Like many of his maternal siblings in prior years, 7307E was a top performer at wean and crossed the scales at 746lbs and a 108 ww ratio.

LVLS Stabilizer 9868E is a homozygous black son of ENGD Zip Line 2515Z. Zip Line was Champion Bull at the Dixie National and is known as one of the best Westwind sons to hit the ground. This 71% bull has the performance and stoutness to make his calf crop uniform. He is deep ribbed, thickmade and will work on both pure-bred and Lim-Flex pedigrees. His dam is out of the Angus herd sire, Basin Max 602C, the high accuracy, curve bender birth to yearling and high scrotal circumference bull. If your herd is in need of a 'Stabilizer,' look no further than LVLS Stabilizer 9868E.

This moderate-framed bull has the potential to improve your bottom dollar, whether you're a commercial or purebred operation. We love his rib shape, strong top and the set to his hock. He is a unique individual who has read with an exceptional amount of quality since day one. This EXAR Denver 2002B son is one that you'll be impressed with for years to come. Denver is a problem-free sire that produces highly fertile progeny.

Another son of EXAR Denver 2002B. Denver has sired progeny that made him the youngest bull whose first calf crop ranked him among the Top 25 sires of progeny registered in 2014 and remained among the elite Top 25 for three consecutive years. LVLS 291E is smooth through his shoulder, long-sided and clean in his lines. This guy will do a great job siring progeny with added growth and power. He is sure to be a great maternal influencer in any program- his milk EPD ranks in the top 10% of the breed. His weaning weight and yearling weight EPD's rank in the top 30%.
