### **AIR TRANSPORTATION:**

Wichita, KS Approximately 3 hours  
Denver, CO Approximately 5 hours  
Kansas City, MO Approximately 4.5 hours

Limousin and Commercial Cattlemen,

We would like to invite you to LV Bar's Annual Limousin and Lim-Flex Bull sale on February 10, 2108 at the Plainville, KS Livestock Auction Barn.

We have been in the Limousin business for over 30 years and we have grown our cowherd to over 1,000 head of Limousin, Lim-Flex and Angus females. Making us one of the largest Limousin Seed stock producers in the breed. We pride ourselves in being a family ran operation that pays very close attention to details. It is very important to us that we provide the customer service to our new and past customers that we have appreciated by others over the years.

With this sale offering we feel we brought you very strong set of coming two-year-old beef bulls that we feel would work in the seed stock business as well for the commercial cattle producer. Whether you need one head or many more you can find it on February 10th in Plainville, KS.

We appreciate all our loyal customers in the past and look forward to developing those relationships and forging new ones along the way. If you have any questions regarding the sale or the cattle please give us a call anytime.

Sincerely,

Chad Settje

Owner, LV Bar Ranch

Dear Cattleman and Cattlewoman,

This year's sale will be February 10th with our annual LV Bar Ranch Customer Appreciation Supper and Social taking place on Friday evening February 9th at 7:00 p.m. at the Knights of Columbus in Plainville, KS. We urge you to come join us for a home cooked meal, refreshment of your liking and most important fellowship amongst new and old friends. Lets celebrate together all that our breed has to offer the industry and people that make a living in the cattle business.

My family and I have been able to work closely with noted cattleman around the country and have realized their main goals and demands on their programs to make it more profitable. In doing so it has aided us in keeping grounded as to what kind of cattle to produce and what will be in demand. We think we have met this goal with this strong set of sale cattle.

We are well into 30 plus years in creation and development of the very best product we can create. The main goal was to create a product that would be accepted by serious cattleman and purebred breeders alike. LV Bar Ranch ranks in the top 10 list of the most cattle registered in the Limousin breed.

We know that putting on a sale of this size it takes a lot of time and dedication and we appreciate everyone involved in making this come to fruition. Our number one focus at LV Bar Ranch is to make sure we take care of the customers. Without our long list of dedicated customers and new clients coming on at a very steady pace we would not be what we are today. This year we are offering over 117 head of beef bulls. We will offer for sale the stoutest set of BEEF BULLS ever assembled at LV Bar Ranch. They are coming two year olds that are ready to work and add pounds and performance to your calf crop.

Best Regards,

Michael L. Smith, Manager LV Bar Ranch

# ABOUT OUR CATTLE ...

## **FEEDING:**

The yearling cattle are fed to gain 3.25 per day, receiving a ration of corn gluten and alfalfa. We feed our bulls to gain sufficiently, without pushing a lot of corn in the ration. We believe that corn causes structure problems later in life and causes yearling bulls to 'melt' when turned out to pasture. We are very proud of the success rate our yearling bulls have had.

## **SEMEN TESTING:**

All bulls have been semen tested and measured and a certificate will go with each bull sold.

## **UNCONDITIONAL GUARANTEE:**

If the cattle that you purchase at our sale fail to meet your expectations, we will replace the animal, providing you return the animal to our ranch at your expense. We will provide you with a replacement animal or give you full credit toward next year's sale or a cash refund. This guarantee expires after the first breeding season. We ask that you provide travel expenses for the replacement animal. Customer Service is #1!

## HOW TO FIND WHAT YOU ARE LOOKING FOR IN THE SALE ...

We first select without papers, finding all visible phenotypic defects and problems. Once the outliers are eliminated, we then select on paper, eliminating those cattle with performance, EPD or genetic problems. This two-step selection process is done at weaning and repeated again just before the sale with yearling data and semen checking added to the criteria. Of course, disposition is still the number one culling criteria in our herd. Choose the type of bull that best meets your cowherd or feel free to call us to further discuss your options. We would be happy to visit with you.

### **'MAXIMIZERS':** *Purebred & High Percentage Limousin Bulls*

These lean, red meat machines will maximize hybrid vigor on your British and British X cows. These bulls will maximize performance without sacrificing calving ease. Several of these prospects go back into the purebred industry each year, being purchased by other purebred breeders.

### **'STABILIZERS':** *75% Limousin x 25% Angus Bulls*

Our most popular hybrid for 28 years, these ultra-thick and deep machines are unequalled in their muscle, volume and phenotype. These bulls work well on most any cowherd, offering the extreme thickness of Limousin and the volume of Angus. Hybrid vigor can be increased and maintained with these bulls on most all straight bred and crossbred cows.

### **'OPTIMIZERS':** *50% Angus x 50% Limousin Bulls*

These Angus x Limousin F1 Composites have been a hit on our sale for many years as well. Many cattlemen are using these bulls to moderate their cow size and create consistency or in a four way cross breeding system. Optimizers are moderately framed, very deep and offer much more thickness than the pure-bred Angus cattle.

### **'OPTIMIZERS':** *25% Limousin x 75% Angus Bulls*

They are 25% Limousin and 75% Angus. These bulls combine the best of the numbers of the elite Angus combined with the prominent Limousin. These bulls are huge numbered and have some of the strongest weights and stats of the entire sale offering. These bulls bring the statement of Lim-Flex to a whole new level in our breed. We urge you to see for yourself how any one of these bulls might fit into your program to sire a uniform and very desirable calf crop.

# LV

## **ANALYZING THE PERFORMANCE DATA ...**

### **BW :: BIRTH WEIGHT**

We take birth weights on our cattle in order to give you some method of determining calving ease. Larger calves will sometimes come very easy. We believe that calf structure determines calving ease along with size.

### **WW :: WEANING WEIGHT**

This is the weight of the cattle taken at weaning time adjusted to a constant age of 205 days, and a good indication of early growth.

### **YW :: YEARLING WEIGHT**

This is the weight of the cattle taken at approximately one year of age and adjusted to a constant age of 365 days with at least 150 days between actual weaning and yearling weight dates.

### **ADG :: AVERAGE DAILY GAIN**

Growth rate is highly heritable and these numbers will give you an idea of how the cattle respond to environmental conditions. i.e. feed, weather, etc.

# CALF BUYBACK PROGRAM ...

LV BAR is extremely grateful for the continued relationships we have with our customers. The trust they put in us to provide quality genetics to continue to improve this great breed is rewarding. It is important to us to communicate with our clients to understand their wants and needs. We will collaborate with our customers on their program goals, breeding strategies, nutritional information, performance data and more.

If you are interested in our calf buyback program, LV Bar will gladly connect you with one of their representatives below to start the conversation in helping your calves sell for a premium.

700D is double polled and double black. His birthweight EPD ranks in the top 30% of the breed. This young herd sire prospect offers a very complete, fault-free conformation and has the look to sire excellent offspring. With tremendous eye appeal and balance, we love how much muscle he carries out of his hip when viewed from behind.

708D is double polled and double black and impressively growth oriented. His yearling weight EPD ranks in the top 10% of the breed and marbling in the top 15%. This 62% Lim-Flex herd sire prospect has a solid set of numbers backed by a predictable pedigree that is generations deep in excellence and marketability. Those who appreciate soft structured, moderate frame and easy fleshing bulls don't need to look much further than 708D.

[ Act. BW: 68 lbs.] [Act. WW: 690 lbs.] [Act. YW: 1,137 lbs.]

LVLS Bank Account is one of the hottest bulls in the Limousin breed. This great son of Wazowski had them all looking with his flawless structure and superior performance. Yearling weight over 1,500 with great flank and body gives Bank Account a performance package you can stand to look at. If you want cattle that have depth and performance, check out your Bank Account. We felt strongly about incorporating him into our genetic pool and consequently bred a large group to him A.I. We are so glad that we did. This first calf crop out of him is anything short of exceptional. There is no question in our minds, as time goes on, LVLS Bank Account and his offspring will be used across the grid because of their adaptability and generation of income. We know these cattle can do and they'll meet your needs.

If you're looking for an all around, great numbered bull- here he is. 612D is double polled and double black. His yearling weight EPD ranks in the top 5% of the breed, weaning weight in the top 10% and marbling in the top 15%. With off the charts breed topping yearling weight and weaning weight numbers that will take your program to the next level, this 62% Lim-Flex bull is the solution you have been looking for to improve quality grade and increase your average profit per carcass. This bull is extremely long patterned and extended through his front one third. His overall eye appeal will make him a standout in any pasture.

722D is double polled and double black. His marbling EPD ranks in the top 10% of the breed and yearling weight in the top 15%. He combines growth with a super look and performance. He is superb in his design, smooth in his shoulder and has a tremendous amount of rib shape.

[ Act. BW: 75 lbs.] [Act. WW: 715 lbs.] [Act. YW: 1,097 lbs.]

# ANALYZING THE PERFORMANCE DATA ...

### BW :: BIRTH WEIGHT

We take birth weights on our cattle in order to give you some method of determining calving ease. Larger calves will sometimes come very easy. We believe that calf structure determines calving ease along with size.

### WW :: WEANING WEIGHT

This is the weight of the cattle taken at weaning time adjusted to a constant age of 205 days, and a good indication of early growth.

### YW :: YEARLING WEIGHT

This is the weight of the cattle taken at approximately one year of age and adjusted to a constant age of 365 days with at least 150 days between actual weaning and yearling weight dates.

### ADG :: AVERAGE DAILY GAIN

Growth rate is highly heritable and these numbers will give you an idea of how the cattle respond to environmental conditions. i.e. feed, weather, etc.

Morris

Lot 47 | LV BAR Danny Boy 609D

LVBR Danny Boy 609D is a 75% Lim-Flex and double polled. We just love this one's look- he's tremendously deep bodied, heavy muscled and strong topped. To us, his growth profile is nearly ideal. He will inject extra profit no matter when you opt to market offspring- either at weaning, yearling or terminally. His weaning weight EPD ranks in the top 15% of the breed.

Lot 58 | LV BAR Stabilizer 688D

688D is double polled and double black. This 68% Lim-Flex bull is a tank-he's super powerful, heavy muscled and reads with a great amount of phenotypic appeal. The mass that this bull has is truly remarkable and he's got the ideal structure to match. He goes back to the popular GPFf Blaue Rulon on the top side of his pedigree and the proven, JCL Lodestar 27L on the bottom.

629D is double polled and double black. This is a bull that is flexible off both ends of his skeleton when put in motion and has the look to catch anyone's eye in the pasture. His milk EPD ranks in the top 20% of the breed, which will make him a great maternal influencer in your program. This high percentage Limousin bull has trusted and proven quality back five generations in his pedigree.

[Act. BW: 79 lbs.] [Act. WW: 640 lbs.] [Act. YW: 1,078 lbs.]

723D is homozygous polled and his marbling EPD ranks in the top 15% of the breed. This bull will inject carcass merit and profitability to his calf crop. This 50% Lim-Flex bull will also add growth to his progeny- his yearling weight ranks in the top 30% of the breed. If you're looking for a bull that can cover all the bases in a breeding season- here's your next herd sire.

[Act. BW: 87 lbs.] [Act. WW: 680 lbs.] [Act. YW: 1,090 lbs.]

# LIMOUSIN TODAY PROFIT TOMORROW

"We use Lim-Flex<sup>®</sup> bulls on our British-based cows because it allows us to achieve our goal of producing a high percentage of cattle that grade Choice, have higher yielding carcasses, while maintaining feed efficiency and uniformity."

*-Erik Roen, Sierra Valley Ranch, California*

Progressive cow-calf producers recognize the value of hybrid vigor: 20% more pounds of calf weaned per cow exposed; 1.3 years of additional cow longevity; 30% greater lifetime production; and increased fertility. The Limousin and Lim-Flex UltraMate Crossbreeding System makes crossbreeding easy to produce calves that excel in any market and replacement females that have longevity and productivity.
