Dear Fellow Cattlemen,

All of us at Coleman Limousin Ranch welcome you to the Discovery Sale of 2019. Thank you very much for your interest, support, and confidence in our program.

In the past, we have sold open yearling heifers at our Annual Bull Sale. We have also sold donor females and bred heifers privately. This fall will be our second Discovery Sale and once again we are proud to showcase our top females that have been responsible for producing breed leading Limousin genetics.

We feel there is something for everyone at this sale. The offering is highlighted by half interest in COLE Miss Traveler 029X, four designer flushes from four of our proven donor females, and the pick of 029X's 2019 embryo heifer calves. In addition, we are selling a select group of bred heifers, 4-year-old bred cows, and open commercial heifer calves.

The females in this sale are backed by generations of proven genetics. The bred heifers and cows have been ultrasounded and are guaranteed bred.

The cattle will be available for viewing at our ranch throughout the day on October 4. Dinner will be served at Ninepipe's Lodge at 6 p.m. and the video sale will start at 7 p.m. The Discovery Sale will be broadcast live by Limousin365. You can watch it on the internet and bid with Limousin365's "real-time" internet bidding services. We will have videos of the females posted to our website late September.

October is a beautiful time of year here in the Mission Valley. Ninepipe's Lodge is at the base of the majestic Mission Mountains. It is right on the way to Glacier National Park and Flathead Lake. Please join us for the sale and your own Montana vacation.

We hope that this catalog's information will be helpful. Give us a call if we can be of further help to you. If you are unable to attend the sale, feel free to contact us at Coleman Limousin Ranch, Kiley McKinna or any of the sale staff. We look forward to having you with us October 4.

Sincerely,
Coleman Limousin Ranch
Larry and Anita
Trent and Melissa

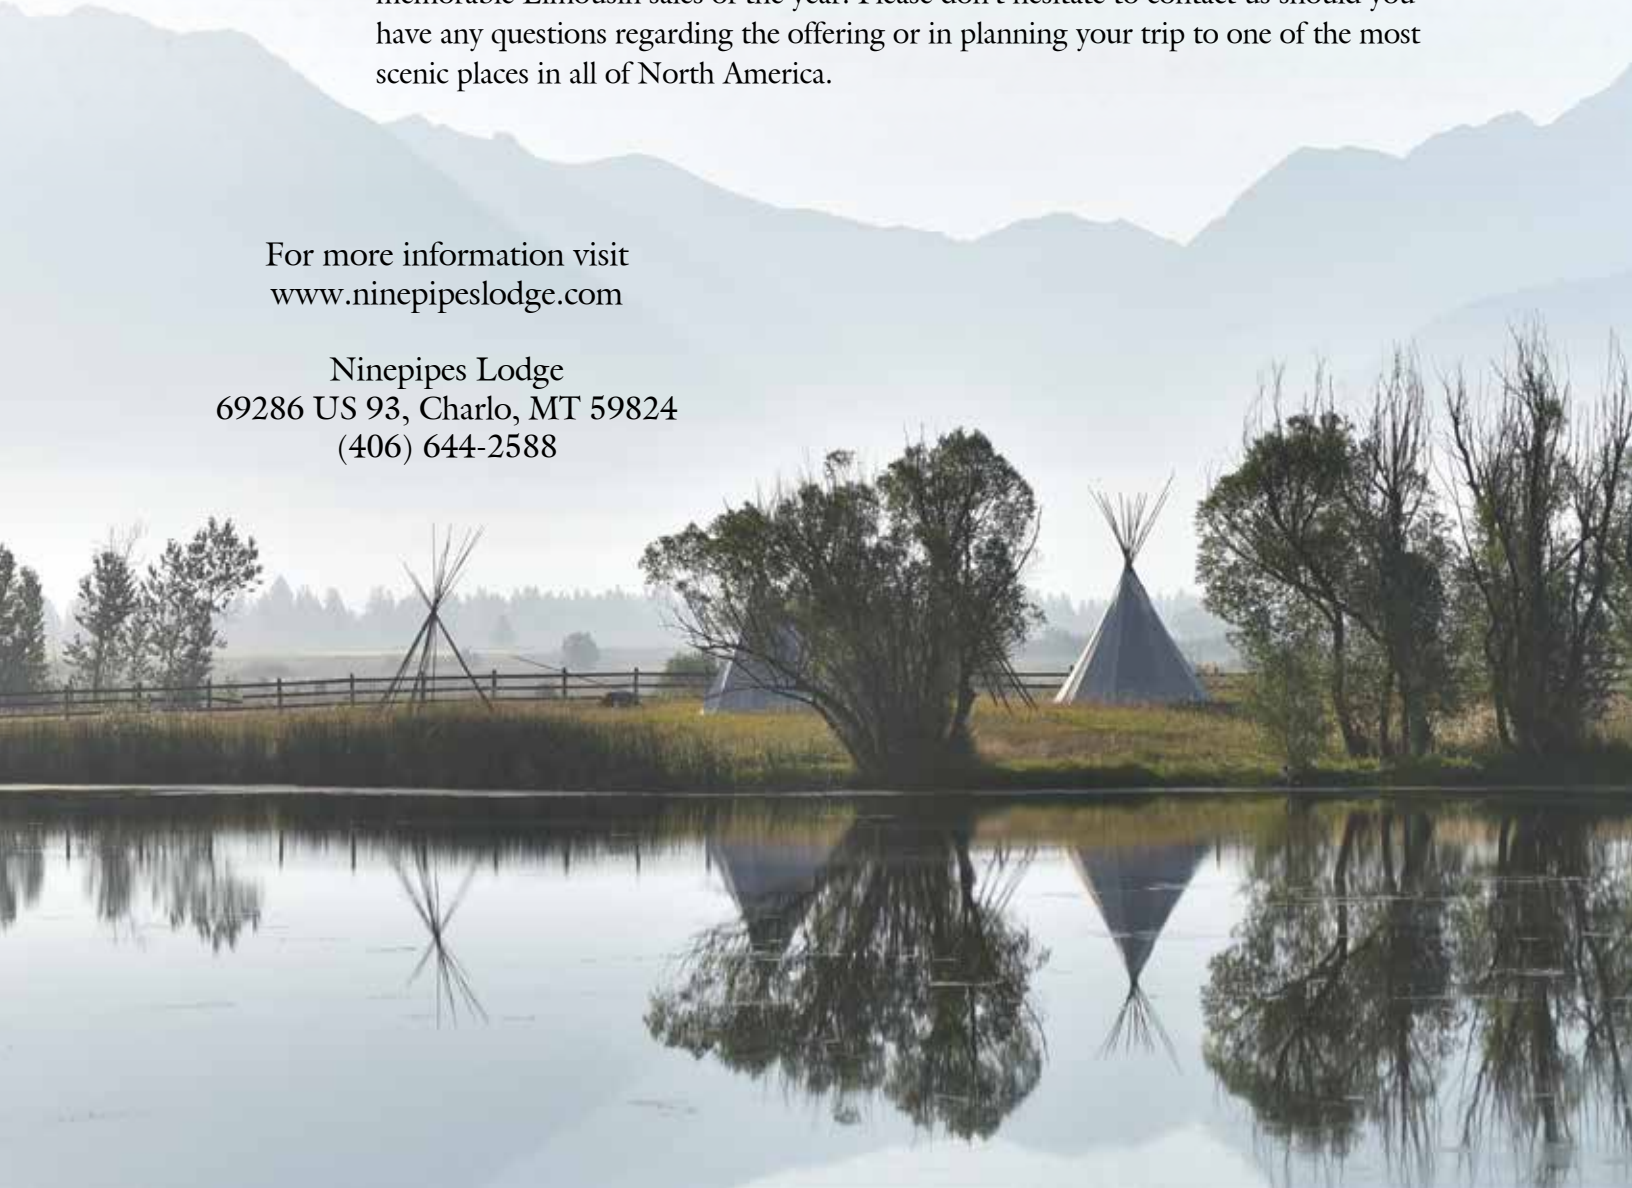

DIRECTIONS: From Ninepipes Lodge, go north 1.1 miles on Hwy. 93. Take a left on Hwy. 212 and go 2.9 miles. Keep right onto Dellwo Rd. (the Hwy. curves left). Go 3.1 miles and take a left on Crow Dam Rd. The cattle will be displayed on your left at Coleman Limousin Ranch pasture.

Your Montana Adventure Begins Now...

In the nearly 50-year history of Coleman Limousin Ranch very few females have been offered for public appraisal. Not unlike the majestic Mission Mountains located here in Western Montana, when viewed as a group, this group of females has the ability to take your breath away. When we set out on this adventure, our goal was to assemble a set of Limousin and Lim-Flex genetics that would not disappoint. We feel we have succeeded, but as we have learned over our many decades as a superior seedstock supplier, we know the true value of our efforts will only be known at the final drop of the gavel. We sincerely hope you join us for what we hope materializes into one of the most memorable Limousin sales of the year. Please don't hesitate to contact us should you have any questions regarding the offering or in planning your trip to one of the most scenic places in all of North America.

Featured Lots

LOTS 1-6D

As you study these exciting featured lots, you will find everything to be in order in terms of phenotype, pedigree, actual performance and EPDs. For nearly 5 decades, we have strictly selected and rigidly culled in an effort to develop a strong foundation cow base. These first lots represent the culmination of our efforts. These front-pasture donor females have proven their ability to be elite producers and we felt now is the time to share these genetic masterpieces with the buying public. They represent unique opportunities to select from the newest and freshest genetics available to the industry. Our breeding philosophy has long been to meld new and interesting genetics with the tried-and-true cow families we have painstakingly developed over the years. This is your opportunity to view them all and make your selection.

Selling one-half embryo interest and no possession.

When we set out to develop a top-notch herd of Lim-Flex females, we knew the best way to achieve the desired results was to mate the best purebred Limousin females to the Angus breed's most prominent sires. COLE Miss Traveler 029X is one such example. She represents the best both breeds have to offer in terms of the production traits serious cattlemen deem essential. She has been a cornerstone donor in our program for a number of years, but the time has come to share her genetic prowess with the buying public.

Bred Heifers

LOTS 7-31

Within this group of bred heifers, you will find the females offered for sale are every bit as powerful and consistent as the bulls we have been offering for over 40 years. These females are descendants of many proven AI sires and can be traced back to many generations of consistent producers on the dam side. We are proud of the many Focus Dams that carry the COLE prefix and are confident the females on the following pages will go on to be impressive producers for their new owners. Rest assured these females represent the best the Coleman program has to offer. We have dug deep in an effort to offer you the kind of females we keep back as replacements.

PE'd 5/16/19—7/1/19 to
COLE Capital 106F, safe.

What a way to start out the bred heifer portion of the offering—with a maternal sibling to Lot 5. As stated previously, COLE Miss Xrated 354A is the epitome of a donor. When matched up with one of the most popular Lim-Flex sires of our time, MAGS Aviator, the results were impressive. It's hard to let this kind leave home.

AI'd 4/26/19 to MAGSY-Axis, safe.

Here is one bred a little different on both sides of her pedigree. Yet she mirrors her herdmates in that she is double homozygous with breed-leading calving ease, docility, marbling and \$MI.

30 COLE Miss Cadillac 8102F

PE'd 5/16-7/1/19 to COLE Capital 106F, safe.

Last, but certainly not least, is this purebred Architect daughter who is double homozygous and features an impressive EPD profile highlighted by top 3% numbers for WW, SC and RE.

Bred Cows

LOTS 32-38

Over the years we have been fortunate to enjoy much success at the National Western Stock Show Pen & Carload Show. The females contained here carry much of the same genetic material as their championship brothers. We strive to keep muscle and efficiency in our cowherd, and feel this group of females are both powerful and consistent. What's more, each of these bred females have shown the ability to excel in the real world of production, making them sound investments. These females have cleared all of the hurdles placed in front of them and have earned the right to be considered leaders among their contemporaries.

AI'd 5/19/19 to CELL Envision, safe. In the Angus breed, Connealy Consensus is known for leaving behind impressive daughters. This double homozygous Lim-Flex fits that pattern to a T. The calf she is carrying by CELL Envision has the potential to chart a new course in the Lim-Flex sector of the breed.

32 COLE Miss Consensus 516C
