

Synergy Wagyu & Platinum Beef Present

WAGYU VISION
International Conference & Sale

SATURDAY, MARCH 28, 2020

Fort Worth, Texas

WELCOME ...

We are excited to welcome all attendees to this conference. It is our goal to provide a highly educational and comprehensive function for all Wagyu breeders. Thank you for travelling to the Historic Fort Worth Stockyards to be part of this groundbreaking day. We expect it will be a game changer for everyone!

This event was planned with the purpose of bringing a global perspective to the Wagyu breeders in the US. Many American breeders are realizing how aggressive and progressive Australian Wagyu breeders have become in recent years in regards to genetics, feeding, and marketing. For numerous reasons most American breeders do not have the opportunity to travel to Australia to learn about their dynamic industry, therefore we decided to bring the Australian industry to the US via several knowledgeable industry persons. In addition, we have included Akaushi (Red) and Wagyu-influenced programs based here in the US. We hope the event will be an educational experience that is representative of the many opportunities within the Wagyu industry.

There are many segments to the Wagyu marketplace. We understand that there is not a right or wrong way to capitalize on the numerous attributes of Wagyu. The conference speakers will present numerous ways they have incorporated Wagyu genetics into their cattle programs to become more profitable. This includes Red/Akaushi, Wagyu-infused, F1, and fullblood cattle. Several of our presenters are vertically integrated, engaged in breeding, feeding, and marketing their own cattle. The livestock industry is incredibly enormous in the United States and globally. We need to realize that we have only scratched the surface with Wagyu in this industry up to this point. The challenge of Wagyu breeders and producers will be to present our breed as a legitimate breed within the industry, and not viewed as simply a niche market. To do this real, hard data and reliable EPD/EBV values with genomic enhancement will be of extreme importance. The commercial industry also needs to be educated to the fact that the largest value of Wagyu is meat quality, and not to be judged on phenotype. However, the Wagyu breed, as a whole, will need to continually push for shorter feed periods and better feed conversions while maintaining excellent carcass qualities to make inroads into the commercial sector. The high-end fullblood market may not feel the squeeze in these areas, but they are still of great economic impact in any Wagyu program, small or large.

We are fortunate to be breeding Wagyu cattle in America. Our own domestic customer base is extremely large. This gives us the added opportunity to be able to market at "home" and not have to rely on export markets as many other beef producing countries must do. America is experiencing a great demand for higher quality beef, from Prime to Prime +, and has the financial means to purchase better beef. The health benefits of Wagyu serve as an added bonus to the consumer's eating experience. There are tremendous opportunities such as direct marketing, on-line marketing, restaurant sales, wholesale distributors, and export markets to participate in to impact the profitability of Wagyu breeding and feeding programs. A thriving and diverse beef market will ultimately drive the genetics side of the Wagyu industry. We hope that wherever you are in the Wagyu business, large or small, new or established, that you will find this conference to be a valuable resource.

International Conference & Sale

SATURDAY, MARCH 28, 2020

Springhill Suites • Historic Fort Worth Stockyards

Event Location: Springhill Suites by Marriott, 2315 North Main Street, Fort Worth, Texas 76164

CONFERENCE SCHEDULE ...

FRIDAY, MARCH 27th Located at Springhill Suites

5:00 p.m. Social and Wagyu gathering

SATURDAY, MARCH 28th Located at Springhill Suites

9:00 a.m. Welcome/Introduction: Loren Ruth, Synergy Wagyu

9:30 a.m. Jojo Carrales, Heartbrand Beef: Delivering a Brand

10:15 a.m. Nick Hammett, Circle A Angus Ranch: Wagyu in the Circle A program

11:00 a.m. Break

11:30 a.m. Steve Martin, Kerwee Feedlot: Wagyu perspective/Wagyu on feed

12:15 p.m. Lunch Meal featuring HeartBrand Akaushi Beef

1:00 p.m. Loren Ruth, Synergy Wagyu: Using maternal lines/genetics to reduce risk

1:30 p.m. Mitchell Ruth, Synergy Wagyu: Strategies for using EBVs, Genomics and data in your breeding program

2:00 p.m. Charlie Perry, Trent Bridge Wagyu: the Trent Bridge F1 & Fullblood Experience

2:45 p.m. Break

3:15 p.m. Anthony Winter, Macquarie Wagyu: the Macquarie Wagyu Program

4:00 p.m. Wagyu Panel: Q and A with the speakers

4:15 p.m. Wrap-up

5:00 p.m. Dinner featuring HeartBrand Akaushi Beef

6:00 p.m. INTERNATIONAL ELITE WAGYU SALE

CONFERENCE SPEAKERS ...

ANTHONY WINTER

Manager, Macquarie Wagyu

A cropping, breeding, and feedlotting operation in Queensland, Australia. Macquarie runs about a 700 head Fullblood cow herd with backgrounding capacity and a 2,900 head feedlot capacity. The feedlot feeds Fullbloods for 500 days and 400 days for F1s. Macquarie Wagyu is a world leader in Wagyu breeding stock, having bred high ranking sires such as Macquarie Prelude M0495, Macquarie Wagyu C1176, and Macquarie Wagyu Y408.

Anthony Winter will not be attending in person only via Skype.

NICK HAMMETT

Marketing Manager, Circle A Angus Ranch

Circle A Angus is a 7,000 head Angus herd in Missouri. Circle A has been using Wagyu genetics from top carcass traits proven Wagyu sires for 10 yrs now to increase overall profitability. Reaching 70 – 80% Prime on 1/4th blood steers, while also taking them to heavier weights with better yield. Circle A estimates they are making \$300 more on Wagyu cross steers. Circle A has thousands of head worth of carcass data and are confident that the system has the potential to add real value for commercial cattlemen.

STEVE MARTIN

General Manager of Operation, Kerwee Feedlot

Located in Australia, Kerwee has a 20,000 head capacity, with 15,000 Wagyu content animals. Kerwee feeds cattle for 400 days and markets into their own branded beef line Stockyard Beef. Stockyard Beef recently won the Wagyu content/percentage category in the Triple Crown Steak challenge at Purdue University. Steve continues to make efforts to share data and develop value-based marketing options by using Feed Efficiency testing and the Wagyu Sire Progeny Test Program. Steve has run the Australian Wagyu Association's Wagyu Sire Progeny Test Program at Kerwee Feedlot.

Steve Martin will not be attending in person only via Skype.

CHARLIE PERRY

Owner, Trent Bridge Wagyu Stud

Trent Bridge is a family owned and operated Fullblood and F1 Wagyu operation in New South Wales, Australia. Trent Bridge runs approximately 300 Fullblood cows and 300 Angus cows. They target the F1 market, selling approximately 60 Fullblood bulls for F1 production each year. In addition, they use their top Fullblood sires on their commercial Angus herd for F1 production, selling the resulting calves at approximately 330 kg after weaning to JBS who feeds them for 400 days and slaughters them. Trent Bridge has become a leading breeding stock producer having bred and sold Trent Bridge K0034 the second-highest selling animal in the 2019 Elite Wagyu Sale at \$200,000.

JOJO CARRALES

Vice President, HeartBrand Beef

HeartBrand Beef is a Texas based operation structured around the Akaushi or Red Wagyu breed of cattle. They focus on utilizing Akaushi genetics to produce a consistent, high quality and marbled beef product. Akaushi genetics have allowed HeartBrand to achieve 95% Choice or Prime on their F1 cattle. HeartBrand markets approximately 350 Akaushi bulls each year to commercial cattleman.

USA • AUSTRALIA • SOUTH AFRICA

LOREN & MITCHELL RUTH

Owners, Synergy Wagyu

Synergy is a two generation family business that maintains a herd of fullblood Wagyu in the United States (Pennsylvania) and has satellite herds in South Africa and Australia. Synergy is focused on breeding elite Wagyu genetics from superior maternal lines and high genetic merit sires. Synergy utilizes their extensive experience breeding dairy cattle to breed superior Wagyu beef.

MEET THE WAGYU 365 TEAM

Dear Wagyu and Akaushi enthusiasts,

It is with great pride and pleasure that all of us at Wagyu365 welcome you to the first ever 20/20 Wagyu Vision Conference and International Sale. We are more than excited to be working closely with the sale hosts, Synergy Wagyu and Platinum Beef. Synergy owner, Loren Ruth and his son Mitchell are leaders in the Wagyu breed! They are great stewards of the land and in animal husbandry, as well. They have traveled internationally for several years studying the genetics of Wagyu cattle and have implemented their knowledge into their own herd. They work closely with their business partner Andries Schutte from South Africa at Platinum Beef. Together these two firms are working closely with their U.S. and International alliances to offer to the public the 1st ever 20/20 Wagyu Vision Conference and International Sale! As you will read in these pages ahead, the speakers that will be headlining this event are some of the most knowledgeable and well respected in their fields. They along with Loren and Mitchell will give us their prospective on the Wagyu breed and what lies ahead in the future.

The team at Wagyu365 are pleased to be branding and marketing this International event and are so looking forward to seeing so many that have signed up to attend. We think you will be very impressed with the sale offering that is listed in this catalog. They are hand selected from the leading herds around the world.

Please let any of us know if you have any questions in regards, to the sale lots and/or the details regarding the conference.

Best regards,

Randall O. Ratliff, Wagyu365 team member

CONVENIENCE BUYING

Wagyu365 want to make your buying experience easy and convenient!

1. VISIT US

You can't beat the experience of seeing your potential new investments in person! We are looking forward to this day of opportunity to view the sale cattle, see old friends, connect with new friends and answer any questions you have about your interests before sale day. We hope you can make it out to Fort Worth for the full sale experience, but if you can't make it, we've got you covered with quality options to purchase cattle with convenience!

2. CALL US IN ADVANCE

With all the quick-messaging technology at our disposal, sometimes picking up the phone is the easiest way to get the information you need! We are happy to have a conversation and walk you through any questions or information you need for sale day to make the best buying decisions for your program. Any member of our team would be happy to talk with you and connect you to the right people and information you need to feel fully informed for sale day. Contact any member of Wagyu365.

3. BID ONLINE

If you are unable to make it to Fort Worth for the sale, join us online for REAL TIME, LIVE online bidding for the 20/20 Vision Wagyu International Conference & Sale. All lots in the sale will be available for viewing prior to sale day and bidding on sale day at www.wagyu365.com.

4. VALUE PURCHASING

No matter what your needs are, this offering is sure to add value to an already thriving program and enhance the future of your herd. From commercial options to some of the highest quality genetic influences of the breed — this will be the sale for you.

Importance of Maternal Lines

There is an art to breeding cattle. Despite the scientific advances that have been made with EBVs, EPDs, performance tests, DNA tests, and the rise of genomics, breeders still do not control or understand everything that occurs in breeding and genetics. An example of these uncontrollable and sometimes unexplainable interactions is how specific maternal lines exhibit superior traits in an area consistently from generation to generation (and weaknesses in the same pattern). The demonstration of superior traits by specific maternal lines whether it be for marbling, milk, growth, etc. occurs despite varying sire combinations and the breeder's best attempts at balanced or corrective breeding.

While breeders do not fully understand why these superior transmitting abilities occur, breeders should utilize this knowledge in their breeding strategies. Science has provided possible explanations for superior transmitting abilities such as mitochondrial DNA inheritance only coming from the dam, cytoplasmic inheritance theories, and epigenetics triggered in utero by the dam. Through wise investment in maternal lines that suit your production strategy and goals, breeders can reduce risk and maximize profit. The superior maternal lines featured in this catalogue include genetics from the Suzutani, Okutani, Kanetani, Hikokura, Chiyotake, Chisahime, Yuriko, Yasuyoshi, Hatsuhi, Aizakura, Akiko, Homare, Marunami, and Ume maternal lines. Careful research of these pedigrees will reveal the extreme depth and quality of the cattle organized here. This is a truly elite offering of foundation and next generation Wagyu genetics!

Southern Wagyu
Alliance Presents ...

2020 **TRIPLE CROWN**
GREAT STEAK CHALLENGE

Another year, for beef producers to get a complete analysis of their home raised product. This year we will have two Universities conducting the test! New requirements will be added to enhance our grading criteria.

We are privileged to have the new Japanese Carcass camera, the Warner Bratzler Shear Force test, Complete Fatty Acid Profile, the Melting Point of fat analysis and a Professional Taste Panel for the evaluation of your steaks. The grading results of each steak will have complete, accurate and precise data. Make your plans to enter your steak and be a part of this unique setting of some of the finest producers in the country. Purdue University has agreed to host the “Triple Crown Great Steak Challenge.” You will get the analysis back on your steak and an opportunity to meet the professors at the “Taste of Wagyu” where they will answer any of your questions. There is additional testing added to this year’s competition. This is the only steak competition in the U.S. that gives the competitors a complete beef analysis. The new facility for testing food products at Purdue University Animal Science department will be the site of the evaluation and the Professional Taste Panel will be done in the Taste Kitchen.

Details and dates released soon. Please save your best steaks. All steaks must be shipped frozen. We are adding an additional beef category. The Triple Crown Prize is \$2,000 and the Grand Champion is \$1,000. Save your best steaks for the 2020 Challenge!

For details and/or to enter your steak log onto

Value of an Elite Female

Record prices have been recorded for elite Wagyu females in both the USA and Australia over the last three years. What has led to this point can be described as a “perfect storm” due to a variety of different factors. A combination of advances in reproductive technology, increased accuracy of GEBVs, an increased emphasis on key profitability traits, more readily available semen of elite sires, a boom in industry entrants, and an ever expanding global demand for premium marbled beef were all key players in developing the market for elite Wagyu females and genetics. With advances in both conventional embryo transfer (ET) and in vitro fertilization (IVF), it is now routinely possible to produce 20 or more calves from a single donor in a year. When a single donor has the potential to produce more calves in a year, her value increases significantly. This, coupled with an increased emphasis on making genetic progress and selecting only high genetic merit females, has driven female value up. This is especially true for those with high EBVs and GEBVs. GEBVs have increased the reliability of EBVs significantly due to the addition of genomic SNP based testing through the Australian Wagyu Association. The increase in reliability has allowed breeders to more confidently select high potential females to invest time, money, and genetic resources into for producing their next generation of cattle.

A larger emphasis on key profitability traits such as marble score, eye muscle area, and hot carcass weight has been a key factor driving the increased prices for elite animals in the Wagyu breed. After having established a Wagyu herd and program many breeders are now searching for higher genetic merit animals to increase profitability and consistency. The emphasis on key production traits along

Trent Bridge K0034: Sold for \$200,000 in 2019 Aus Elite Wagyu Sale

with the release of new elite and highly proven genetics such as Mayura Station's Mayura Itoshigenami JNR and Macquarie Wagyu's Coates Itoshigenami G113 gives breeders a source of superior genetics to pursue for improving their own Wagyu herds. The increased availability of semen from a variety of sires with superior EBVs to foundation sires gives breeders more reason to invest in premium donors. The key to producing your next great sire is in your females, as many breeders would say. Breeders who invest in premium females are then able to take full advantage of the advanced IVF and ET programs of today using next generation superior sires. This will assist breeders to rapidly increase the genetic merit of their animals.

Making genetic progress in traits such as Marble Score will result in increased profitability and in many cases a single Marble Score can be worth as much as \$400 per carcass. Therefore, a program harvesting 100 carcasses per year could see \$400 more revenue for each of its 100 carcasses and an overall revenue increase of \$40,000. Elite females have the ability to produce sires that can have these dramatic impacts on herd profit and is a major reason elite females are commanding top dollar.

The Wagyu breed and genetics market is driven either directly or indirectly by the ever-increasing global demand for premium marbled beef. High marbling and superior carcass traits are the hallmark of the Wagyu breed and continues to bring new entrants into the Wagyu industry through a shared passion for high quality beef. In a pursuit to develop their own businesses or improve upon existing ones, new breeders are seeking high genetic value females to be the foundation of their programs.

GENERAL SALE INFORMATION ...

SALE DAY PHONES ...

Randy Ratliff	Wagyu365	615.330.2735
Kiley McKinna	Wagyu365	402.350.3447
P.J. Budler	Wagyu365	682.597.0380

WATCH LIVE & BID ...

Visit WAGYU365.COM to view the sale book and videos of live lots. More information can be found on pages 4 and 5.

SALE ORDER & SUPPLEMENTAL INFORMATION ...

Sale order is catalog order! Any additional information or corrections to the printed sale catalog will be available online at www.wagyu365.com

AIR TRANSPORTATION ...

Dallas/Fort Worth International Airport (DFW) or Dallas Love Field Airport (DAL)
SALE LOCATION ... Springhill Suites by Marriott, 2315 North Main Street, Fort Worth, Texas 76164

AUCTIONEER ...

Cody Shelley, 580.467.7887 (FL Auctioneers License #AU5070; TX Auctioneers License #17375)

GENERAL SALE TERMS ...

TERMS AND CONDITIONS ... Cattle will sell under the standard terms and conditions. All consignors in the 20/20 Vision Wagyu International Conference & Sale sell their lots 100% fully guaranteed. Any announcements from the sale podium will take precedence over the printed sale catalog.

EMBRYO GUARANTEE ... Any embryos sold as stated and are not guaranteed on conception. All embryo lots will have statements regarding each with their descriptions.

DESCRIPTIONS AND FOOTNOTES ... Each consignor wrote the descriptions that pertained to their lot or lots. Wagyu365 does not take any responsibility, in regards, to the guarantee of what was written. Any adjustments or corrections will be made at the time of the sale.

REGISTRATIONS, TRANSFERS AND EMBRYO TRANSFERS ... Within 60 days of the date of the sale, the cattle sold will be transferred (registrations) to the new owners through the offices of the American Wagyu Association & American Akaushi Association. The fee is paid for by the seller.

PAYMENT ... All lots must be paid for immediately following the conclusion of the 20/20 Vision Wagyu International Conference & Sale unless prior payment arrangements have been made with any representative of Wagyu365. Buyers are welcome to pay by credit card. If so, you will be charged a 3% fee on the total sum of your purchase.

DELIVERY ... Buyers are responsible for any shipping cost pertaining to embryo purchases and transportation of the live cattle. Wagyu365 buyers and sellers will work together to make this the easiest and most efficient process possible.

LIVESTOCK MORTALITY INSURANCE ... Any representative of the Wagyu365 team can assist any buyer with insurance regarding their purchases.

HEALTH PAPERS ... All live cattle sold will be accompanied with an appropriate health paper for immediate shipment. Additional health testing may be required from some locations.

GENETIC CONDITIONS ... Log onto www.wagyu.org, go to the animal search and results of the genetic testing will be found on the lot selling.

LIABILITY ... All persons attending the sale, do so at their own risk, legal or otherwise for their safety. The consignors, sale management, and sales staff assume no responsibility or liability for property loss or any accidents that may occur.

Auction money and proceeds will be conducted under Randall O. Ratliff dba R & R Marketing, P.O. Box 60097, Nashville, TN 37206. Bond # 7901027402 (U.S. Department of Agriculture, Grain Inspection, Packers and Stockyards Administration Packers and Stockyards Program

SATURDAY, MARCH 28, 2020

Springhill Suites • Historic Fort Worth Stockyards

Event Location: Springhill Suites by Marriott, 2315 North Main Street, Fort Worth, Texas 76164

IT is with great pleasure that we present this sale catalog and the genetics represented in the sale lots. We were selective in the genetics we chose from the Synergy/Platinum program and in the genetics that were selected from our gracious guest consignors. We are extremely thankful for the great quality and diversity of genetics that all of the consignors were willing to contribute to this unique sale. We especially appreciate the support of long-time icons of Wagyu breeding such as Ralph Valdez (Crescent Harbor), Lone Mountain Ranch, and Heartbrand.

It was our goal to put together a sale catalog of elite genetics that gave a true representation of the various segments of the Wagyu industry. We included fullblood black, fullblood Red/Akaushi, and polled black genetics. There is a mix of live females and bulls, and a tremendous offering of embryos. We worked hard to avoid duplication of genetics in the sale offering and are pleased with the extremely wide variation and uniqueness of the cataloged lots. There are a large number of sires represented, both proven and unproven, high genomic bulls. We selected from reliable, highly proven maternal lines while trying to avoid the same sire stacks on the maternal side of the pedigree. There are genetics that are focused towards carcass traits and genetics that are focused towards growth/maternal traits.

In an attempt to highlight the Australian focus of 2020 Wagyu Vision there are many lots that are derived from Australian genetics including direct import embryos, embryos sired by Australian bulls, and a few semen lots of Australian sires. Some of the bulls do not have semen available in the US, making them even more unique and valuable. We appreciate the high level of data incorporated into the Australian bull proofs increasing sire accuracies above what has traditionally been available in the US. Australian genomics have brought another dimension to the genetic tools available to breeders.

Wagyu breeding is now on a global scale and we are pleased to be able to help promote that. We have consignors participating from the US, Australia, South Africa, and the UK. Elite Wagyu genetics are now in demand on an international spectrum and viewed as a global commodity. If you are a new or established breeder you will be able to find genetics in this sale that will serve as the foundation of a herd or enhance an established program. These sale lots present investment opportunities that will provide great returns to any breeding program whether the emphasis is on genetic sales or beef sales. The genetics offered will add greater profitability to breeding programs worldwide. Thank you for your interest and participation in the sale!

Loren and Mitchell Ruth,
Synergy Wagyu
Andries Schutte,
Platinum Beef

EBV'S ...

As mentioned in the introduction for the catalog, the Australian EBVs and the WSU EPDs are key tools for Wagyu breeders seeking to make informed breeding decisions. Here we have included a few tables showcasing this data. EBVs/EPDs are an integral part of any breed looking to make steady genetic progress because they allow for the comparison of animals across different production systems and times through genetic linkage and herdmate deviations. EBVs/EPDs are especially useful in highlighting the strengths and weaknesses of cattle numerically, allowing for easier management and mating. The Australian Breedplan system has become the largest Wagyu EBV/EPD database outside of

Japan with more than 84,000 dams and 10,000 sires recorded, 6,700 AUS Meat Marble Score recorded, 5,800 Carcass Camera recorded carcasses (MS, MF, REA), 28,000 Weaning/200 Day Wts, and 24,000 400 Day Wts. Breedplan now offers genomic testing based on all this data for traits including MS, MF, CW, REA, 200D Wt, 400D Wt, 600D Wt, and more. This genomic testing is 50K SNP profile based genomics (Cattle Industry Leading Technology) which has been able to push the accuracy of EBVs higher yet. We have sorted these tables by the Self Replacing Index because most Wagyu breeders are not strictly terminal and require some growth and maternal traits for herd replacements.

TABLE #1 ...

This table shows all sires in Breedplan with reliability greater than 80% for the economically important traits of 200 Day Wt, Marble Score, and Carcass Wt. We chose 80% reliability because this is a common threshold at which EBVs begin to stabilize and approach their true genetic values. While a relatively short

list with only 85 bulls, this list is growing steadily with recent additions in Coates G113, Ginjo B901 and Sumo F154 all toward the top. Highlighted in red on this table are sires that you will find in the three generation pedigrees within this sale catalog.

TABLE #2 ...

This table is a list of all bulls over 250 SRI (Self Replacing Index) on Breedplan. This includes both proven bulls and young sires, most of whom have genomic enhanced EBVs. We have included this to illustrate the extreme pace at which genetic progress can be made with Breedplan and progeny testing. There are 85 bulls on this list over 250 SRI, the same amount as on the proven list dis-

played in the previous table. Highlighted in red on this table are sires that you will find in the three generation pedigrees within this catalog. Further emphasizing the fact that this catalog contains genetics from the very top of the Wagyu breed!

TABLE #3 ...

Here are the top marbling bulls from the 2017 WSU National Sire Summary EPDs. Sorted by Marbling EPD with the other EPDs noted when available. Also, on this table are the accuracy of the EPDs which are far lower than that of Breedplan because of less data and fewer contem-

porary groups. It should be noted that these EPDs are based exclusively on F1 data. The maternal line of the sires is written on the far-right side of the table. Highlighted in red on this table are sires that you will find in the three generation pedigrees within this catalog.

Selling open. This elite heifer, Sanjiro 918F, is a stellar example of the quality cattle produced by the Crescent Harbor Ranch breeding program. This heifer is one of the few progeny sired by Sanjiro 3 in the US. Sanjiro 3 is a Suzutani son who has claimed the #1 spot for Marbling EPD in the US base on the WSU 2017 National Wagyu Sire Summary and scores well for Rib Eye Area also. The maternal line of 918F goes directly to Yuriko. Yuriko has been the fountainhead of a maternal line that repeatedly rises to the top. The Yurikos have performed exceedingly well internationally with elite progeny in the US and Australia. 918F is a beautiful heifer that boasts a dam that is doubly bred to proven marbling sire Kitaguni Jr through 07K and Kitaguni Jr himself. Her pedigree continues back to Yuriko with the great growth bull TF Kikuhana, and then Kikuyasu 400 right to Yuriko. This heifer has loads of potential and is just at the start of a long, bright future!

Confirmed pregnant to 01.29.2020 AI to Echigo Farms Maifuku (FB13450). Hiranami B901 provides a very complementary mating as the sire of this carcass trait driven pedigree. B901 is one of the highest ranking, high reliability sires in Australia. He carries a very balanced breeding profile with excellent growth and high-level carcasses, improving his progeny on all levels. He only has a handful of daughters in the US, and this heifer may be his best mating yet. Her sire path has Sanjiro and Michifuku back to back stacking Rib Eye size on top of the former #1 Marbling bull, Fukutsuru 068. The maternal line is from JVP Kikuhana cow. This heifer is bred to Maifuku which presents a one-of-a-kind opportunity to invest in two generations of Australian proven genetics right here in the US!

Selling open. Sanjiro 3G is a heifer that grabs your attention immediately - she looks good and has an even better pedigree! Her sire, Sanjiro, has proven himself as a superior carcass trait bull, transmitting incredible rib eyes to his progeny. Sanjiro is also the full brother to US breed leader Sanjiro 3, which has put their dam, Suzutani, back into the spotlight again. Maybe more importantly than having Sanjiro as her sire, this heifer is a Hikokura on her maternal side. It doesn't get any better in the Wagyu business than combining Suzutani and Hikokura genetics. This heifer, Sanjiro 3G, packs one of the most balanced, performance proven pedigrees that can be found anywhere. Behind Sanjiro are some of the most highly proven carcass and growth sires that have made their mark over the last two decades including Hirashigetayasu 001, Shigshigetani, Michifuku, and TF Kikuhana. Kikuhana has proven to have been a magical mating on the TF Hikohime 3/2 cow, providing the foundation for many highly influential sires and brood cows in the Australian and American Wagyu herds. This heifer provides a low risk, high return investment with a long, prosperous future ahead of her.

Pregnant to Macquarie Prelude – Ultrasound heifer due 04.26.2020.

Yuriko 67E is a Genjiro daughter carrying an ultrasound Prelude heifer calf! What a tremendous genetic package in this bred heifer. Her proven sire, Genjiro, is now highly sought after with semen selling at \$1000 per straw. His demand is driven by his high ranking on Australia's Breedplan with a terrific Self Replacing Index and his proven Okutani genetic lineage. Yuriko 67E is one of less than a handful of registered Genjiro daughters in the US. She descends from the genetic powerhouse, Yuriko, who has been highly influential in producing elite genetics in the US and Australia. Her maternal line sire stack is loaded with balance including Hirashigetayasu 001 for great growth and Shigeshigetani for stellar carcasses. 67E will be able to be flushed to a great variety of sires which will greatly increase her breeding value and drive demand for her future offspring. She is already carrying the next generation, an ultrasound female Prelude calf and due just a month after the sale. Investing in this genetic package will pay for itself many times over.

Prelude 525G is the first Prelude daughter to sell at public auction in the US! Macquarie Prelude M0495 has been the highest selling Wagyu bull for ABS for the last

couple of years and was actually the highest selling bull of all beef breeds for ABS Australia. Prelude transmits growth from fresh, new genetics in the US as he is a son of the tremendous Australian carcass bull, Macquarie Wagyu Y408. 525G is not only Prelude's first daughter to sell, but she has an amazing pedigree from the powerful Okutani maternal line. This maternal line has been quietly producing some fantastic sons to go along with her already famous female progeny. This young heifer stacks a deep pedigree that reads Prelude x marbling sensation Kitaguni Jr x Rib Eye master Michifuku x JVP 400 x JVP 068 x Kikuhana x Fujiko x Okutani! This heifer will offer many breeding options and opportunities.

This heifer is the opportunity that breeders have been waiting for. One of the first live daughters of Sumo F154 born in the US, from Australian genetics, and the first F154 to sell in the US! She presents a special genetic opportunity as her sire, F154, is the highest-ranking progeny proven sire on the March Breedplan SRI list that has semen commercially available. F154 is a highly balanced bull that transmits extremely well in the economically important traits of growth, carcass weight, and marble score. The dam of Chiyotake 530 is sired by the progeny proven superior growth and milk bull, Peppermill Grove D139. D139 is +50 for 600 day weight, +50 for Mature Cow weight and +10 for Milk! The maternal side of the 530 heifer continues its great appeal with the fact that she is a Chiyotake from Takeda genetics and that her maternal foundation sires include Michifuku, TF147 Itoshigefuji, TF150, TF Mitsuhiokura 43, Kikuhana, and TF40 Terutani. This heifer and her closely related paternal sibling selling as Lot 10 are the only females available in the US with these genetics. What an incredible opportunity!

Selling full interest and full possession

This bull should attract serious attention from every breeder! Very rarely does the opportunity to invest in a proven sire come along. Lone Mountain Ranch is offering full interest and full possession of this proven Kitaguni Jr. son! 1441Y has proven himself with both carcass data and genomics. His March Breedplan EBV for Marble score is an outstanding +1.7. The carcass performance of his progeny supports this genomic enhanced EBV with IMF scores of over 50%! 1441Y is the highest marbling sire of the 2019 LMCC Sire Performance Study, outperforming highly proven bulls Yasufuku Jr, Kitaguni Jr, and his full brother, Koichi 1409Y. The performance of 1441Y should be expected because of the sire stack in his pedigree (Kitaguni x Yasufuku x Michifuku) and his Chisahime maternal line. His 3rd dam is the dam of Bar R Miss 2N, who in turn is the dam of successful sires such as Saburo 53Y, Itomoritaka 42Z, and Jiro 22T. This bull is a very real opportunity to improve the carcass performance of any herd! He transmits tremendous marbling which is the real profit driver of the Wagyu breed. 1441Y will elevate any fullblood or F1 program to the next level. What an opportunity!

This is a young bull that provides the answer to all breeders who are searching for a growth performance sire! Look at his sire stack of TF151 x Itomoritaka x Hirashigetayasu x Kikuhana from the Hikokuras. You will not find a greater growth pedigree anywhere and this bull is an Itozuru Doi TF151 son! TF151 has historically been regarded as the most complete Wagyu bull ever. TF151 has been a top performer for carcass weight, Rib Eye size, and Marbling in many elite fullblood breeding programs in the US and Australia. Hirashigetayasu 001 and Itomoritaka 002 were two of the original Westholme import bulls and are both highly proven for growth and milk. TF151 semen is nearly impossible to find, so that makes this young bull even more special. Moritaka F151 is a can't miss prospect with TF151 as his sire and the Hikokuras backing his maternal lineage. He is ready to go!

Registered in Australia. Will be registered in the U.S.

Chiyotake 528 is the first Sumo F154 son born in the US and the first to sell at auction! He is the result of embryos imported to the US from Australia featuring genetics that are not available in the US. His sire, Sumo F154, is the highest-ranking proven bull for SRI in Australia with semen commercially available. He transmits elite Marbling (+1.7) and superior growth (+45 600 day wt) and size (+40 carcass wt). Chiyotake 528 has a unique pedigree - his dam is sired by a Terutani 40/1 son and she has terrific growth and milk genomics that fullblood breeders are looking for. His maternal granddam is sired by a Hatsuhi line bull and has great indexes for growth and milk. This young bull has the potential to be one of the truly elite sires of the breed by pulling together the economically important traits of superior growth and outstanding marbling. You will not have an investment opportunity like this for a long time.

Prelude Yuriko 521G is a tremendous genetic opportunity as he and his full brother are the first Macquarie Prelude calves born in America and 521G is the first Prelude to sell at auction! His sire, Prelude, has set sales records for ABS and his elite pedigree makes him even more valuable. He combines the growth of Prelude with the maternal power of his Yuriko maternal line which features sires extremely strong in carcass traits. It is hard to find a stronger sire stack than his maternal line of Michifuku x Shigeshigetani x Takazakura. The Yurikos have consistently produced bulls ranking as top sires in the US and Australia. This early Prelude son has a great chance to add to the legacy of Yurikos.

Tested recessive free.

Australia's Sumo Wagyu has been producing elite genetics for a number of years and their bulls have consistently risen to the top echelon on the sire rankings. Sumo F126 is one of those sires and this young bull selling as Lot 18 is the first son of Sumo F126 to sell as a stand-alone lot in America! His genetic potential is also stand-alone. It would be a difficult challenge to find another young bull with his pedigree and transmitting potential. His sire, F126, is one of the highest ranking proven bulls in Australia. F126 transmits great extreme carcass traits for Marbling (+1.6) and Rib Eye (+3.5) while improving milk and maintaining growth traits. The dam of 537G is of the Hikokura maternal line a possesses a beautiful sire stack of Hirashigetayasu 001 x Shigeshigetani x TF151 x TF148. The Shigeshigetani granddam, Hikokura 15, sold for \$56,000 to top the 2018 Synergy sale. This young bull is an incredible genetic opportunity.

Homare 86G is the very first son of Sumo K406 born in America and the first to sell at auction. His amazing pedigree adds even more value. Consider that his sire, Sumo K406, has a sire stack that has all 4 foundation bulls in a row tracing directly to arguably the greatest cow in the breed, Akiko: Tamamaru x Big Al x Shigemaru x Hikari x Akiko! His dam is from the Homare maternal line and features an equally impressive sire stack of proven bulls: Big Al x Hikari x Judo x Namimaru. This young bull, 86G, may have the most genetic power ever stacked into a pedigree. Capitalize on this good-looking young bull whose pedigree combines all of the traits of growth and carcass quality.

Due March 1 - May 31, 2020.

This is a proven producing female that is in her prime production years! She comes directly from Dr. Cooper's nucleus Akaushi herd in San Angelo, TX. This female is high performing, heavy milking and beautifully bred. Her bottom line maternal genetic contributor is Ume, a double-bred Mitsutake import. Y104 has been a favorite of our international guests and as a result has progeny located on three continents around the world. She is confirmed pregnant to Myers-Cooper lead herdsire, Escondido 7000E (pasture exposure). This cow's sire and dam are registered fullbloods in both American Akaushi and American Wagyu Associations.

These embryos are a one of a kind genetic opportunity! The sire of the embryos, Sumo F154, is already well-known as one of the very elite proven bulls of the breed. The dam and maternal line of the embryos is equally impressive. The dam of the embryos, K5236, is sired by Hiramichi Tsuru whose semen sold for \$2,000 per straw in Las Vegas in December. This makes K5236 a double bred Hatsuhi as she is from the Hatsuhi maternal line and so is her sire, Hiramichi Tsuru. The Hatsuhi maternal line is considered the best of the Westholme females and has produced many top sires in Australia. TWA Shikikan, Kitateruyasudoi and Itomoritaka are the other sires in this pedigree leading to Hatsuhi. Currently there are no Hatsuhi females in the US. K5236 sold for \$22,000 in the 2018 Australian Elite Sale. She has been a moneymaking cow with well over \$100,000 in progeny sales, including an Itoshigenami Jnr son selling for nearly \$50,000 to US breeder GS Ranch of Oklahoma. K5236 has been a good flush cow which is the only reason these embryos are selling. This is a very rare opportunity to invest in highly sought after, breed leading genetics not otherwise available in America. Dam is Australian registered (AACFK5236).

Embryos stored at Brushy Creek, TX. Not exportable.

Macquarie Wagyu C1176 has been an elite, proven carcass trait and SRI sire in Australia and currently has a Marble index of (+2.8). The dam of these embryos is bred very closely the same as C1176 with both of them going back to Aizakura 26/2 as their granddam. The dam of the embryos, E9246, is a Kitahatsuhi 97/1 daughter. Kitahatsuhi 97/1 is a high performing son of Hatsuhi and sired by Kitateruyasudoi. He has proven himself as an elite sire in the Overflow herd of legendary Australian breeder, Wally Rea. The sire of the embryos, Mayura L10, is the son of breed #1 Itoshigenami Jnr, and ranks in the top 10 for SRI of genomic and proven bulls. He carries incredibly balanced indexes for all carcass and growth traits. He also traces to Aizakura on his maternal side, making the calves resulting from these embryos double bred to the Aizakuras, a top line from Takeda Farms. You will not find these genetics anywhere else in America! Dam is Australian registered (GWWE9246).

The Hatsuhi maternal line is regarded as the most genetically potent maternal line from the Westholme import group. Bulls and females from this line have consistently risen to the top of the breed in Australia and feature great growth EBVs. Hatsuhi is the 3rd dam of the proven, growth specialist Longford E0241, who is a son of Ichiryuno. Ichiryuno is a Takazakura son of the great Okahana and his semen was not available in the US. In turn, semen from Longford E0241 is not commercially available in the US either. These embryos are sired by Longford E0241 making this an exceptional genetic offering. The dam of the embryos is a superbly bred daughter of Michifuku. She features Shigesigetani as her maternal grandsire and Takazakura as her great grandsire. These sires are breed carcass trait leaders stacked onto the Yuriko maternal line. Longford E0241 makes a perfect mating on Yuriko 61E by bringing his highly reliable growth traits to her pedigree of Marbling and Rib Eye size. There is a lot of unique potential in these genetics.

Ginjo Marblemax Hiranami B901 is the highest-ranking sire on the March Breedplan for SRI for sires with 90% reliability for Marble Score and with semen commercially available. He is an extremely balanced trait bull making him an appealing sire that can be used in across the board breeding. Suzutani is widely recognized as the best female to have been imported into the US because of her positive genetic impact on the breed in the US and Australia. These embryos marry the genes of B901 with the Suzutani through the donor dam, Maifuku Suzutani 76F. 76F is a special Suzutani in that she is an Echigo Farms Maifuku daughter. Maifuku is a proven Australian bull that is an 003 Kitateruyasudo son from a Westholme maternal that has a whopping March Breedplan index of +7.0 for Rib Eye! Behind the Maifuku is Michifuku who has a March Breedplan index of +7.0 for Rib Eye, too! Behind the Michifuku is the great TF151 Itozuru Doi daughter, Suzito 3, who sold for \$52,000 at the 2018 Synergy sale. The calves from these embryos will have a sire stack of B901 x Maifuku x Michifuku x TF151 Itozuru Doi x Takazakura x Suzutani! These genetics will create world-wide interest.

This exceptional consignment from Grasslands Wagyu blends the genetics of two of the most sought-after sires in the breed, Mayura Itoshigenami Jnr and TF151 Itozuru Doi. The sire of the embryos, N3709, is an Australian bred son of Mayura Itoshigenami Jnr. Itoshigenami Jnr is by far the #1 proven bull on the March Breedplan SRI list with extreme EBVs for carcass traits. N3709 has inherited these traits as well as growth traits from his dam, Westholme K5236, who is sired by Westholme Hiramichi Tsuru. N3709 displays superior carcass genomic EBVs for Marbling (+2.0), Rib Eye (+3.1), and excellent growth figures for 600 day wt (+24) and Carcass wt (+23). The dam of the embryos is a daughter of the legendary TF151 and is a maternal granddaughter of the immortal Takeda carcass master, TF148 Itoshigenami. TF151 and TF148 are two of the game changing sires from Takeda and are stacked back to back in this highly proven Hikokura maternal pedigree. Here is certainly a special breeder's opportunity.

Embryos are being made and further location information will be available prior to the sale.

This embryo package is real hidden treasure, as would be expected from respected breeder Ralph Valdez of Crescent Harbor Ranch.

TF151 Itozuru Doi is a legend in the breed and rightfully earned through his extremely balanced performance of transmitting a highly profitable blend of marbling, rib eyes, carcass weights, and growth. 151 is the rare sire who does everything right! His vintage genetics are still in extremely high demand in America and Australia. He brings incredible value as the sire of this embryo lot. The donor dam is also a truly special cow as she is from the very heart of the Takeda Farms import program. Her sire is the underutilized bull, Kimifuku 3, who is a son of storied Japanese sire Tanifuku-doi and fittingly is known as one of Takeda Farms best marbling sires. Kimifuku 3 is also a paternal brother to TF146 Kikutsurudo. Kimifuku 3 was largely been limited to use in the Takeda breeding program because only a limited amount of semen was exported. The value of these embryos does not stop here, TF 703 who hails from the Hikokura cow family is a full sister to the dam of the now popular sire TF 813 Kimitofuku. TF 813 is the #5 ranked marbling bull on the latest LMR Sire Summary. This makes these embryos once in a lifetime opportunity to access Takeda genetics that have not been readily available. Genetics from these embryos will make the successful bidder a wise investor in Wagyu genetics.

Embryos are being made.

Mayura L10 is a high ranking Australian genomic sire ranking in the top 10 for SRI on the March Breedplan list. Topping that is the fact that he is a son of breed #1 Mayura Itoshigenami Jr. L10 is a very well-balanced sire with very high indexes for Marble Score and Rib Eye size, and excellent weight scores. The dam of these embryos, Laura, is one of the truly elite Shigeshigetani daughters as she descends from the highly proven, original import female, Okutani. Laura traces directly to Okutani through breed greats Shigeshigetani, Michifuku, and Haruki II. The mating with L10 brings a touch of high genomic genetics to a highly proven pedigree. Expect superior next generation results and propel your breeding program to the next level of performance!

Embryos are being made.

Low risk and high-performance probability are the two main keys to breeding success and profitability. These embryos are that kind of investment! This Okutani offering pairs the highly proven Suzutani son, Shigeshigetani, with Marie, an outstanding daughter of TF148 Itoshigenami. Marie traces to Okutani via super sires Itoshigenami x Michifuku x Haruki II x Okutani. Marie is a full sister to Maverick, a bull who is making great carcasses. She is also a full sister to Elizabeth, who is the donor dam of Kanadagene 100 embryos that sold for over \$10,000 per embryo at the 2019 Australia Elite sale. These embryos are a high reliability investment in fantastic genetics!

CONSIGNED BY KAY RANCH, MANOR, TX

This lot of embryos provides a very unique genetic offering, unlike anything else in the sale catalog. The sire of the embryos, Shigefuku, was part of the original Westholme program, however he was not imported to the US - only his semen was imported from Japan. As a result, there are very few Shigefuku progeny in the US. Equally as rare and unique is Mazda, the sire of the donor dam. Mazda was one of the original 4 Wagyu bulls imported into the country in the 1970's. Accordingly, very few fullblood progeny of Mazda have ever been born in the US. The dam of the embryos, MS Strategy, is SC D AA and Tenderness 6. Her pedigree incorporates mainstay sires such as Yasufuku Jr., TF Itomichi 1/2, Hirashigetayasu, and JVP Kikuyasu 400 on the maternal side. The calves that are born from these embryos will have the unique distinction of having a sire stack of Shigefuku x Mazda, which is not likely to be found anywhere else in the breed. They will be an outcross to almost all other genetics in the breed and will provide endless breeding options and opportunities.

These embryos are an incredible genetic investment opportunity directly imported from Australia by Hewitt Pastoral, the owners of Mayura L10! The sire of the embryos, Macquarie N100 is a terrific young sire with a highly sought-after pedigree and huge genomics. N100 is a son of Coates Itoshigenami G113 out of a Macquarie Y408 daughter. Neither G113 or Y408 have semen available in the US, making N100 a special mating sire for these embryos. Genomics indicate that N100 has inherited the amazing genes of his sire, G113, and displays great balance of carcass and growth EBVs with a March Breedplan SRI of +241. The dam of the embryos, L32, is a great Shigeshigetani daughter bred in the Mayura Station herd. She is a Shigeshigetani x Michifuku x TF147 Itoshigefuji combination from the Takeda Chiyotake maternal line. L32 has excellent carcass trait genomics and provides a superb genetic base for this mating with N100. Resulting calves will make a huge genetic contribution to any herd worldwide!

CONSIGNED BY HEWITT PASTORAL, QUEENSLAND, AUSTRALIA

This imported lot from Hewitt Pastoral gives US breeders access to genetics not previously available in America. The Australian based sire of the embryos, Mayura L10, is quickly becoming a popular son of the incredible Mayura Itoshigenami Jnr because of his own high genomic Breedplan EBVs and tremendous balance of economically important traits. The dam of the embryos, L1656, is sired by Rib Eye leader, Sanjirou, and quickly attracts great attention because of the uniqueness of her pedigree. She is from the Takeda Azusa maternal line which is virtually impossible to obtain in America, and her sire stack includes 3 bulls that have not been available in the US! TF Terutani 40/1, TWA Shikikan, and Blackmore Aizaturudoi Y398 are stacked together on the maternal side of the donor dam's pedigree. This combination of Mayura L10 and Bar H 1656 will certainly put any breeding program on the fast track with genetics that will be in extreme international demand!

Sahara Park Wagyu has imported a special lot of embryos specifically for this sale. The embryos carry genetics not currently available in the US. The donor dam, M728, is sired by TF Terutani 40/1 and her maternal granddam is sired by a son of TWA Shikikan. Neither 40/1 or Shikikan have ever been available to American breeders. The donor is a Hikokura, so she will possess high transmitting potential in her own right. The sire of the embryos is the Australian proven sire, Kanadagene 100, who may be the best son of the breed queen, Suzutani. Ewetec P8035 has excellent genomic EBVs with +1.8 for Marbling and +4.6 for Rib Eye. Descending from the super brood cow, Benlee Hikohime V2058, P8035 is a great opportunity to bring Kanadagene 100 genetics into your breeding program. These embryos are an exceptional pairing of genetics that are new to US breeders.

We are proud to present an embryo package featuring proven genetics on both sides. The dam, BDWFC1589 is the dam of Macquarie Wagyu Prelude and has produced 4 carcasses averaging 474 kg HCWT and Marble score 8.25. She is by Michifuku out of a Haruki 2 cow. The sire, BDWFN0100 is a combination of the two best resident sires from Macquarie Wagyu – BDWFFY0408 and CCOFG0113 who are also considered two of the best bulls to be bred in Australia. COFG0113 is proving to be a freak. He weighs over a ton has wonderful temperament and has bred 109 carcasses averaging 514 kg HCWT and 8.45 MS. Fifty percent of his carcasses have graded 9 or 9+. His grand sire Y408 is now deceased but produced over 100 carcasses averaging 416 kg HCWT and MS 7.7. Y408 breeds on very well and many of his daughters are in our donor herd today.

Embryos are stored at Ced Wise AB, Glen Aplin, Queensland, Australia. Qualified for export.

The combination of genetics in these embryos is a powerhouse for marbling carcasses. Easy calving, good temperament, good carcass weights and consistent marbling. Getting a bull calf from these genetics will be great for breeding females as well as for wagyu crossing.

Famous names to mentioned on both donor and Carra's sides (so double the fabulous)

Fukutsuru 068 and Itoshigenami 148 These are two of the top three bulls exported from Japan. 068 a bull coming from Tajima blood- lines is coming from Kikutsuru also known as the 'Hyogo cow.' He is known for exceptional carcasses, good temperament and small but easy managed calves. 148 is 75% Tajima and gives consistent high quality carcasses and calves that grow well without reducing the marbling. (DNA profiles available).

The combination of HW Aizatake 7 and HW Kenzo will give strong and powerful females that are good natured and have good milking ability. Along with great carcass weights and consistent marbling scores. This combination are also known for tenderness.

HW Kenzo was Wagyu Champion of Europe in 2015. His females are strong and powerful with good temperaments and good milk. He is coming from 148 Itoshigenami who is demanding top prices worldwide right now. Known for good growth rates without reducing marbling. He is also coming from Itoshigefuji 147 who's known for producing well balanced gentle cattle that are early maturing. 147 traces back over 300 years.

HW Aizatake 7, has double Fukutsuru 068 from her dam and sire which she will carry those sought after consistent marbling scores with her. She is also a double TF Aizakura U100 who is coming from one of the best Tajima sires in Japan. Not forgetting HW Aizatake 7 also has 148 Itoshigenami in her lines as well. (DNA profiles available).

This combination of these embryos will not only give you the best framed cattle and carcass weights, but it will also give you consistently high marbling.

HW Aizatziriko 7 and Carra are coming from the best genetics Wagyu have to offer. Here we have a great mix of the three major bloodlines, Tajima, Fujiyoshi and Kedaka. Aizatziriko 7's sire who we call Dutch has given us some of our best breeding females that milk well with good udders and extremely feminine so a great maternal line, his sire, Hirashigetayasu J2351 brings excellent growth and a balanced frame. Another name to mention in her breeding is Kitateruyasu Doi J2810, he is also known as a bigger framed marbling sire and one of the most highly acclaimed Wagyu to be imported from Japan. He is also in the top 2% for birth weight.

HW Carra also has the top marbling genetics in his bloodlines, he consistently produces 9+ marbling score which is the highest marbling score outside of Japan. Coming from Fukutsuru 068, TF146 Kikutsurudo. We believe the best carcasses that High-land Wagyu are producing are all coming from Kinu. (DNA profiles available).

Bar R 5U is proving to be an extraordinary brood cow leaving a huge footprint in the polled gene pool. Her offspring are proving to be working extremely well and are very popular with breeders seeking to add polled genes to their Wagyu programs. One of her most popular sons is Arimura 30B who has seen international use and is showing great promise as a sire. He is now deceased, pushing demand for the little semen that is left. The donor dam of these embryos, Suziwong 13F, is a full sister to Arimura 30B! She will be flushed to Bar R Polled Zurutani D64. D64 is a homozygous polled son of the proven polled sire, Bar R 52Y. D64's pedigree shows marbling great 068 on the top and bottom of his pedigree and also includes the immortal TF151 Itozuru Doi and Bar R 30T. Imagine what this genetic combination will do and the value that will be added to a polled breeding program. Five embryos are selling from a flush planned for early April. If 5 grade #1 embryos are not produced within two flushes, the buyer will be refunded by the prorated per embryo selling price. Don't miss this epic opportunity!

CONSIGNEE BY **SYNGERY WAGYU & PLATINUM BEEF, SPRING CITY, PA**

Sumo K406 is an impeccably bred bull carrying the genetics of the great foundation cow, Akiko, and the foundation sires Tamamaru, Big Al, Shigemaru, and Hikari! Imagine those genetics mated to SOR 1065, who is a daughter of the proven game changing sire, Big Al. SOR 1065 displays great phenotype to go along with her elite pedigree which ties her directly to the exciting Homare J 30E cow through sires Hikari, Judo, and Namimaru. This pedigree is a sure hit and made even more valuable due to the fact that Sumo K406 semen is not commercially available in the US. Be sure to tap into this genetic combination. The resulting calves will be rare and have great genetics, too!

CONSIGNED BY **SYNERGY WAGYU & PLATINUM BEEF**, SPRING CITY, PA

Big Al has been a hugely influential sire in Red Wagyu/Akaushi breeding programs through his outstanding sons and daughters. He has helped establish his dam, Akiko, as arguably the most genetically influential Red/Akaushi cow ever. This embryo package combines Akiko genes on the top and bottom of the pedigree with Big Al as the sire and Leotie, a 6th generation Akiko, as the dam. Leotie, a Bald Ridge Henshin daughter, has a deep pedigree featuring a sire stack of highly influential sires Red Emperor x Tamamaru x Hikari x Shigemaru x Akiko. This is a fantastic chance to acquire proven and reliable genetics upon which to build a powerful Red/Akaushi program.

We are excited to offer the public genetics on our next up and coming herd bull Phoenix. This Big Al son is one who comes with a very practical build and nice look from the side. Plus this calving ease specialist is as sure footed as they come and we expect him to translate not only his functional skeletons into his progeny, but his terminal bound calves should also express the marbling and tenderness we've come to expect from this breeding. Bid with confidence on the straws that could put your program at the top of the Akaushi game.

The reigning 2019 National Western Wagyu Champion Alamo brings an exciting new twist to Legendary's Bull battery. Known for maintaining Akaushi foundation bloodlines, we are thrilled about Alamos blend of old school genetics with an impeccable build and practical body type known from the maternal Big Al line. Not to mention carcass quality should be a strong bonus with this breeding. Look in on this undefeated champion to help boost quality.

LOT 56 ... SELLING FIVE STRAWS OF SEMEN

Pick of FIVE straws of the foundation Akaushi bull of buyers choice!

Akaushi cattle have thrived due to the strong set of foundation genetics dating back to the early 1990's. Here is a chance to purchase some of those very genetics on these four outstanding sires. Shigamaru, Tamamaru, Hikari, and Big Al have built the breed around beef quality and cattle excellence from the start and we are certain their value has only increased with time. Don't miss out on this rare opportunity to become apart of an elite group of foundation breeders. Bid with confidence on the genetics that have built the Akaushi breed.

LOT 57A - SELLING FIVE STRAWS OF EWETEC P8035 SEMEN
LOT 57B - SELLING FIVE STRAWS OF EWETEC P8035 SEMEN

Semen stored at Elgin Breeders, TX

Ewetec P8035 is sired by Kanadagene 100. Kanadagene 100 is a high ranking proven sire on the March Breedplan list in Australia. He is a full brother to American carcass trait leaders Sanjiro 3 and Sanjiro 4. They are Michifuku sons out of the "Queen of the Breed", Suzutani. Kanadagene 100 semen is not available in the US which makes semen from his son, P8035, very special. The maternal grandsire of P8035 is TWA Shikikan, who is a Takazakura son of Suzutani, and also not available. This puts Suzutani on both sides of P8035's pedigree. To add even more promise to this bull is the fact that he is from the highly valued Hikokura line, and even more exciting is that he is a maternal grandsire of the super transmitting brood cow Benlee Hikohime V2058! Don't pass up this opportunity on a bull with outstanding genomic figures of +1.8 for Marble Score and +4.6 for Ribe Eye size.

LOT 58B - SELLING FIVE STRAWS OF TYDDEWI N7245 SEMEN

Tyddewi N7245 is a son of Mayura Itoshigenami Jnr, the breed's #1 sire for SRI according to the March Breedplan rankings. Itoshigenami Jnr semen is not available on the market and only 10 straws have ever been sold with those straws selling for \$3000 per straw! N7245 is a special genetic package not only because of his incredible sire, but his maternal line has an impressive performance record in Australia, too. The Hatsuhi maternal line has been the top transmitting maternal line from the Westholme import group. Hiramichi Tsuru is an elite sire from the Hatsuhi's and his semen just sold for \$2000 per straw in the December, 2019 sale in Las Vegas. N7245 is the son of a Hiramichi Tsuru daughter making him a genetic package that has huge performance potential with genomic figures of +2.3 for Marbling and +3.9 for Rib Eye size. Wow!

LOT 59A - SELLING FIVE STRAWS OF MAYURA NUCLEAR SEMEN

LOT 59B - SELLING FIVE STRAWS OF MAYURA NUCLEAR SEMEN

Semen stored at Elgin Breeders, TX

Mayura Nuclear was appropriately named! Coming from the famed Mayura Station herd, he will blow up any breeding program in a big way with elite genomic carcass traits of +2.0 for Marble Score and +5.7 for Rib Eye area! Imagine what he will do for carcass quality in either full-blood or F1 breeding programs. He gets his performance honestly as his dam is a daughter of the once in a generation sire, Mayura Itoshigenami Jnr, and his sire is from the great mating combination of Sanjirou x TF151 Itozurudoi. Nuclear is from the high performing Itochiyo branch of the great Hikokuras. To add even more value to this semen lot, Hewitt Pastoral will not sell any semen from Nuclear for three months after the sale to give the purchaser the opportunity to create the very first Nuclear calves in the US gaining a big head start on the rest of the competition! Look again at those Marbling and Rib Eye scores!

LOT 60A - SELLING FIVE STRAWS OF POLL WAGYU PERFECTION PP Q722 SEMEN

Semen stored at Elgin Breeders, TX

This lot is the last in the catalog, however, it is one of the greatest investment opportunities in the sale. "Polled Perfection" semen has not yet sold in the US. Hewitt Pastoral will not sell any more Polled Perfection for 3 months after this sale to allow the purchaser to gain a head start with these great polled genetics. This bull is Homozygous, SCD 10, and Tenderness 10! What a marketing opportunity! On top of this is the fact that he is a son of Polled Midnight and paternal grandson of the famed Mayura Itoshigenami Jnr. His maternal line comes from the well-known Robbins Island herd of the Hammond family. Perfection's maternal side has two excellent sires right behind him in the polled bull from Bar R, 52Y, and an Itohana son from Takeda, Itohana 38/14. Polled Perfection is a bull that will greatly advance polled genetics.
