Welcome to our 32th Annual 'Keepin' Kind' Production Sale and celebrating over 40 years in the seedstock business. Over the years we have developed and built one of the top Limousin/LimFlex herds in the country. We have also added a core group of Angus cows and Red Angus females to the herd. Our goal is to be a one stop shop for all your cattle needs, whether it's Limousin, Angus or Red Angus genetics. We know that there are other places to make your seed stock purchases and we appreciate your loyalty. Taking care of you our customer is our #1 priority. As always, we offer a breeding guarantee on all cattle sold. Please ask us about guarantee program sale day as it may have changed some. If you should have a bull go down during breeding season, we can usually have a replacement for you within a few days, available at our ranch or we will try to meet you half way, depending on the distance. We are very proud to say that we replace very few bulls each year.

Our Nebraska herd consist of over 450 head of registered Limousin, Lim-Flex and Angus cattle. Lonely Valley's Bull Battery continues to be ranked in the top 10% for all EPD traits. Currently our bull battery ranks in the top of the breed for weaning and yearling growth and milk and does so with a low to moderate birth weight. Our Marbling and Scrotal circumference EPD is unsurpassed, not just on one bull, but all LVLS herd sires combined. Forty years of selection pressure really do pay off. We continue to place extensive selection pressures combined. Forty years of selection pressure really do pay off. We continue to place extensive selection pressures on calm, easy doing cattle. This set of bulls have been easy to work with. You will notice the difference. As well, cows that fail to breed being sent down the road. Fertility in these bulls is excellent with an average scrotal measurement that is unequalled in the Limousin and Angus.

The bulls will be available to be viewed at the ranch near Creston a few days prior to the sale. As well, we will have 300 calves on the ground by sale day and several of the herd bulls for your viewing. We will be serving a complimentary Limousin Beef lunch at 11:00 a.m. Should you need assistance with travel plans, trucking and delivery or anything else, please call and we will be happy to assist you. See you Saturday, February 25th at the Ranch.

We also have females for sale private treaty at all times. Please give us a call if you have any interest in a group of females.

Sincerely,
Lonely Valley Seedstock Chad Settje

LODGING ... Holiday Inn Express, 402.564.2566 • East Hwy 30, Columbus, NE

DIRECTIONS TO LVLS ... FROM OMAHA: Take Hwy 275 North and travel Northwest to Hwy 91. Turn West on Hwy 91 and travel West to Leigh, NE, and took for the large propane tank on South side of road, continue to travel west on Hwy 91 four more miles to 160th Ave. Turn

North on 160th Ave. and go three miles north to the ranch. **FROM COLUMBUS:** Go to Hwy 30 and 23rd Ave. (Kentucky Fried Chicken) and travel 18 miles North on blacktop road to Hwy 91. Then turn East on Hwy. 91 and go one mile to 160th Ave. Turn North on 160th Ave. and go three miles north to the ranch.

GENERAL SALE INFORMATION ... AIRPORTS: Columbus Municipal Airport, Norfolk Regional Airport & Omaha Eppley Airfield. **DELIVERY:** Free delivery within a 250 mile radius and cost share arrangements will be made for traveling 250+ miles. **ANNOUNCEMENTS:** Announcements made sale day will take precedence over printed material in the catalog. Please take note of any changes. **SEMEN:** Lonely Valley Seedstock reserves the right to semen interest on any bull in the sale. **TERMS:** Terms of the sale are cash unless prior credit arrangements are established between buyer and seller. Settlements are to be made with the clerk immediately after the conclusion of the auction. **MAIL & PHONE BIDS:** Mailed or phone bids will be handled in a confidential matter. If you are unable to attend the sale, simply contact anyone in the sale day phone numbers. Please call in advance of the sale so we can help you ringside sale day. All cattle purchased through our 'sight unseen program' are unconditionally guaranteed, if the cattle purchased for you on order are not what you expected, we don't expect you to pay for them, no questions. **BLOOD TYPE FOR PARENTAGE VERIFICATION:** All animals sold are guaranteed to be offspring of the recorded parents. Under the rules of NALF, all bulls born after January 1, 1991 that are to be used for artificial insemination or used naturally in a herd other than the owner of record must be parent verified by blood typing to both sire and dam. All females born after July 1, 1987 and December 31, 1990 that are to be used for artificial insemination or naturally in a herd other than the owner of record must be sire verified through blood typing. Sellers shall make the necessary parent blood samples available to purchasers upon written request by the purchaser's so long as a written request is received by sellers within 60 days after the sale of the applicable animal. **LIABILITY:** Each animal will be the buyer's risk as soon as it is sold, but will be cared for by the seller for a reasonable period of time. Every precaution will be taken for the welfare of the cattle sold. Neither owner nor sales management can be responsible for accidents, but every effort will be made to provide for safety and comfort of those attending the sale. **INSURANCE:** Insurance on your purchase can be provided by Mark Smith, Grassroots Genetics & Consulting, Ankeny, IA, 515.229.5227 **PAYMENT:** Cattle must be paid for at the time of the sale unless prior arrangements are made with sale management at the time of the sale at 615.330.2735. 3% fee on all credit card payments.

The 32nd Annual Lonely Valley Keepin' Kind Bull & Female Sale can be viewed and bids can be accepted through www.dvauction.com.

Dear Cattleman,

It is an honor to once again be involved in the marketing of the Lonely Valley Seedstock genetics. This year the Settje Family will celebrate their 42nd year propagating Limousin genetics. This February sale is their 32nd consecutive bull sale which makes it one of the longest running family seedstock sales in the Limousin breed.

The Settje name is well thought of throughout the cattle industry as both Dean and Chad have served as past North American Limousin Foundation Presidents and are very much involved in the cattle feeding industry. The family cattle operation started with Stan Settje and his sons acquiring a few purebred Limousin genetics and incorporating into their commercial cattle program. As time went on they quickly realized growing it into a Limousin seedstock operation was the right path moving forward. The program grew to one that could easily sustain a 70-90 head bull sale every year. Under the LVLS umbrella are Limousin, Lim-Flex, Angus and Red Angus genetics.

Their integrity and level headed approach to customer service has kept them going strong for 42 years as a service oriented business.

Please join the Settje Family and all of the marketing team as we know you are sure to be impressed with the strong sale offering.

If we can be of assistance, be sure and let us know and we thank you for your continued interest in the "LVLS" brand.

Sincerely,
Randall O. Ratliff

LVLS King Jame 04K is a purebred son of JYF Edmonton 519E, the Birubi Jupita J15 son that's out of a MAGS War Admiral daughter, HSF Yalena. His dam, LVLS Fire Fly 4F is a female sired by WZRK Atlas 8012A that goes back to the MAGS Unwashed bull. Numerically, he ranks in the 15th percentile for his milk figure. When you study this bull, you'll appreciate his eye appeal, smoothness of lines and his muscle shape and expression. LVLS King James 04K is deep bodied, soggy made and will offer efficiency and predictability to his future calf crop. He is homozygous polled.

LVLS Stabilizer 479K is a 67% Lim-Flex son of JYF Edmonton 519E. His dam, SBLX Baldrige, is a daughter of TW Fire N' Ice. This bull ranks in the 10th percentile for his milk figure. LVLS Stabilizer 479K is bred to be an excellent maternal influence, but will also add function, muscle expression and efficiency to his offspring. This is a beef bull that will have an outcross pedigree for many programs. We can't say enough good about this bull and we're incredibly excited to see what he goes on to do in production. He is homozygous polled.

LVLS Summation 9105K is a purebred Angus bull sired by KCF Bennett Summation. His dam, LVLS Cleopatra 9101C is a female that goes back to MYTTY In Focus and Bon View New Design 1407. Numerically, this bull ranks in the 30th percentile for his birthweight figure and milk figure and in the 35th percentile for his yearling weight figure. LVLS Summation 9105K will add length and shape to any set of females along with such a balanced numeric profile that will add to his worth as a herd sire prospect.

ABOUT OUR CATTLE

FEEDING: The yearling cattle are fed to gain 3.25 per day, receiving a ration of corn gluten and alfalfa. We feed our bulls to gain sufficiently, without pushing a lot of corn in the ration. We believe that corn causes structure problems later in life and causes yearling bulls to 'melt' when turned out to pasture. We are very proud of the success rate our yearling bulls have had.

SEMEN TESTING: All bulls have been semen tested and measured and a certificate will go with each bull sold.

UNCONDITIONAL GUARANTEE: If the cattle that you purchase at our sale fail to meet your expectations, we will replace the animal, providing you return the animal to our ranch at your expense. We will provide you with a replacement animal or give you full credit toward next year's sale or a cash refund. This guarantee expires after the first breeding season. We ask that you provide travel expenses for the replacement animal. Customer Service is #1!

ANALYZE THE PERFORMANCE DATA

BW :: BIRTH WEIGHT We take birth weights on our cattle in order to give you some method of determining calving ease. Larger calves will sometimes come very easy. We believe that calf structure determines calving ease along with size.

WW :: WEANING WEIGHT This is the weight of the cattle taken at weaning time adjusted to a constant age of 205 days, and a good indication of early growth.

YW :: YEARLING WEIGHT This is the weight of the cattle taken at approximately one year of age and adjusted to a constant age of 365 days with at least 150 days between actual weaning and yearling weight dates.

ADG :: AVERAGE DAILY GAIN Growth rate is highly heritable and these numbers will give you an idea of how the cattle respond to environmental conditions. i.e. feed, weather, etc.

HOW TO FIND WHAT YOU ARE LOOKING FOR IN THE SALE

We first select without papers, finding all visible phenotypic defects and problems. Once the outliers are eliminated, we then select on paper, eliminating those cattle with performance, EPD or genetic problems. This two-step selection process is done at weaning and repeated again just before the sale with yearling data and semen checking added to the criteria. Of course, disposition is still the number one culling criteria in our herd. Choose the type of bull that best meets your cowherd or feel free to call us to further discuss your options. We would be happy to visit with you.

'MAXIMIZERS': Purebred & High Percentage Limousin Bulls These lean, red meat machines will maximize hybrid vigor on your British and British X cows. These bulls will maximize performance without sacrificing calving ease. Several of these prospects go back into the purebred industry each year, being purchased by other purebred breeders.

'STABILIZERS': 75% Limousin x 25% Angus Bulls Our most popular hybrid for 28 years, these ultra-thick and deep machines are unequalled in their muscle, volume and phenotype. These bulls work well on most any cowherd, offering the extreme thickness of Limousin and the volume of Angus. Hybrid vigor can be increased and maintained with these bulls on most all straight bred and crossbred cows.

'OPTIMIZERS': 50% Angus x 50% Limousin Bulls These Angus x Limousin F1 Composites have been a hit on our sale for many years as well. Many cattlemen are using these bulls to moderate their cow size and create consistency or in a four-way cross breeding system. Optimizers are moderately framed, very deep and offer much more thickness than the purebred Angus cattle.

'OPTIMIZERS': 25% Limousin x 75% Angus Bulls They are 25% Limousin and 75% Angus. These bulls combine the best of the numbers of the elite Angus combined with the prominent Limousin. These bulls are huge numbered and have some of the strongest weights and stats of the entire sale offering. These bulls bring the statement of Lim-Flex to a whole new level in our breed. We urge you to see for yourself how any one of these bulls might fit into your program to sire a uniform and very desirable calf crop.

'ANGUS': Purebred Registered Angus Bulls Over the past several years we have acquired over 100 Registered Angus females, along with flushing one of our top Angus cows in our Embryo Transfer Program, to promulgate a complimentary breed to our existing lines of seed stock. Our goal is to provide Purebred Angus bulls that can offer an ideal complement to high percentage Limousin based cows. We have known for years that the Limousin x Angus cross is the best, now we will be offering both sides of the equation.
