LOT 1

TYEJ Serenity 307R has proven her worth in the breed as one of the all time great donor cows. She is the dam of AUTO Luckie 246W, the 2012 All American Futurity Grand Champion female and AUTO Luckie Too 423Y, the 2013 National Junior show grand champion Limousin female for Cody Heavin, Springfield, MO. Mated with MAGS Xukalani totally worked and we couldn't be happier with the results. 526C is the right kind, she is attractive featured, sound structured and particularly functional in her framework.

DBGR Champagne 525C is homozygous polled and homozygous black daughter of the big numbered MAGS Xukalani, who excels from birth to rail in terms of statistical rankings. She is double digits for CED, in the top 20% for MB and top 25% for MTI. This prestigious females recorded a WW ratio of 108 in an early weaning scenario. This maternal sibling to past NJS champion and now donor, AUTO Luckie Too 423Y, combines so much that is good about our breed into one complete package.

Predictability goes back generations in the pedigree of DBGR Cambria 522C, just take a glimpse at the grand parents represented in the lineage. SAV Bismarck, SAV May 5270, KRVN Naskar and MAGS Promoter are all influential in their own right and excel in their particular market sector. This homozygous polled show heifer prospect is the real deal and ties together so many marketable traits and posts a 15 CED and is in the top 15% of the breed for MB and top 25% for MTI.

LOT 4

A granddaughter of TMCK San Jose, who is one of the phenotypically ideal donor females in the entire breed. We just love this young heifer who has risen to the top of the list of exceptional prospects here in the past few weeks. Cadence has all the right pieces to work in a variety of scenarios. In terms of data, she is in the top 10% for CED and is 111 for YA and top 5% for MB. EBFL San Jose 422Y is producing some truly neat individuals here at Double B Grain Farm and we are excited what the future holds for her and her progeny.

If your in the market for one who is absolutely stacked in terms of numbers, there isn't a reason to look any further. 515C is one of the very top data females to be offered in a public setting thus far this spring. She is in the top 15% of the breed for CED, BW and WW; top 10% for TM; top 2 % for CW; and top 1% for YW and \$MTI. This combined with the fact that she is a direct daughter of EBFL San Jose 422Y and the especially popular Angus sire, AAR Ten X 7008 S A makes this female very special and unique.

Champ 517C.

TMCK Swizzle 129U is one of the most powerful females we have ever had the opportunity to work with, the shear volume and mass that she possesses is just remarkable her progeny have not let us down in any sense. This daughter of past Denver champion, MAGS Y So Tangled and Swizzle 129U has a breed leading EPD profile for birth, growth and maternal traits and ranks in the top 10% for REA, MB and \$MTI.

We just love the lines and angles this one has, definitely could be one that you can make show heifers out of in the future.

P.E.'d 04.27 - 05.24.16 to SBLX
Champ 517C.

We have flushed MAGS Song Promoter several different ways, however this is the first time that we have bred her Angus. Each time she has generated keeper cattle that have been influential in our program. This Angus flush is one that we are particularly excited about, they have resulted in super low birth-weight, fast growing cattle that we just love from an efficiency and marketability standpoint. Here is an opportunity to tap into the very best genetics in both the Limousin and Angus populations.

LOT 8

Selling half interest and no possession. Owned with Wies Limousin, Wellsville, MO.

Sells open and her calf is being kept back and not sold.

We are offering half interest in WLR EE Janes Addiction, a direct daughter of MAGSWLR Usual Suspect 538U who is one of the very finest designed females that we have ever had grace the pastures of Double B; she is as deep centered and high necked as you can make one. She is absolutely striking and has so much mating flexibility due to the way she is constructed and bred.

FLUSH LOT 9

Selling flush to a bull of buyers choice. Buyer provides the semen and all expenses are paid for by Double B. Buyer will receive a minimum of five embryos with a maximum of 12.

The Swizzle cow family is one of the mainstays in the breed who we take an exceptional amount of pride in and we are so very confident will be a household name in years to come. There is so much good in her that she is the type of female you can flush so many different ways to achieve success and make the next great ones of the breed. Her pedigree is exceptional and combines some of the very elite in both the Angus and Limousin industries.

SIX EMBRYOS LOT 11

Adam Moss

The projected EPD profile on this lot is spectacular and will yield some cattle, who on paper, should absolutely be highly marketable in our discriminating environment. It is so very difficult to generate cattle that look the part and read the part, these progeny should do just that. AAR Ten X and EBFL San Jose will blend beautifully together, this strategic mating has already produced some of our favorite calves to date.
