She represents one of the finest and most prominent pedigrees that the ELCX program has ever had a chance to deal with. The mating of MAGS Xyloid with the MYTTY In Focus x MAGS Manuela daughter SBLX Unknown 104U has created an amazing specimen in ELCX I Know 304Z. She is super big footed, very sound in her movement and has that great show look to her. It will be a tough decision to decide between 304Z and 303Z. This mating has created some amazing results with these two fancy heifers.

She is a daughter of MAGS Xyloid, one of the breed's hottest bulls. He is a son of DHVO Deuce and from BOHI Rhonda and owned with ELCX and Magness. This heifer is super sound in her movement and has the length and femininity up through her front end that we want in a prominent show heifer. When you step back and take a look at what you can consider in a show heifer and then have as a future donor, we think there is none better to consider than this heifer.

We are excited to see what creation comes from this mating. These future calves are sired by MAGS Xyloid 3712X, the once All American Futurity Grand Champion bull and now leading sire for ELCX and Magness. The MAGS Xyloid calves are terrific and we think with him mated to this top Angus female that the future calves will be terrific. Their dam is a daughter of BR Midland from an N Bar Emulation EXT daughter. She is a super deep bodied, easy doing and very powerful Angus donor cow. We think with both the sire and dam being big footed, and sound structured that the resulting calves will be very well made.
