❖ WATCH OR BID LIVE

The 25th Annual Lonely Valley Keepin' Kind Bull Sale can be viewed and bids can be accepted through www.dvauction.com.

AIRPORTS: Columbus Municipal Airport, Norfolk Regional Airport & Omaha Eppley Airfield

DELIVERY: Free delivery within a 250 mile radius and cost share arrangements will be made for traveling 250+ miles.

ANNOUNCEMENTS: Announcements made sale day will take precedence over printed material in the catalog. Please take note of any changes.

SEMEN: Lonely Valley Seedstock reserves the right to semen int. on any bull in the sale.

TERMS: Terms of the sale are cash unless prior credit arrangements are established between buyer and seller. Settlements are to be made with the clerk immediately after the conclusion of the auction.

MAIL & PHONE BIDS: Mailed or phone bids will be handled in a confidential matter. If you are unable to attend the sale, simply contact anyone at the sale day phone numbers. Please call in advance of the sale so we can help you ringside sale day. All cattle purchased through our 'sight unseen program' are unconditionally guaranteed, if the cattle purchased for you on order are not what you expected, we don't expect you to pay for them, no questions.

BLOOD TYPE FOR PARENTAGE VERIFICATION: All animals sold are guaranteed to be offspring of the recorded parents. Under the rules of NALF, all bulls born after January 1, 1991 that are to be used for artificial insemination or used naturally in a herd other than the owner of record must be parent verified by blood typing to both sire and dam. All females born after July 1, 1987 and December 31, 1990 that are to be used for artificial insemination or naturally in a herd other than the owner of record must be sire verified through blood typing. Sellers shall make the necessary parent blood samples available to purchasers upon written request by the purchaser's so long as a written request is received by sellers within 60 days after the sale of the applicable animal.

LIABILITY: Each animal will be the buyer's risk as soon as it is sold, but will be cared for by the seller for a reasonable period of time. Every precaution will be taken for the welfare of the cattle sold. Neither owner nor sales management can be responsible for accidents, but every effort will be made to provide for safety and comfort of those attending the sale.

INSURANCE: Insurance on your purchase can be provided by Mark Smith, Grass Roots Genetics & Consulting, Ankeny, IA, 515.229.5227

PAYMENT: Cattle must be paid for at the time of the sale unless prior arrangements are made with sale management at the time of the sale at 615.330.2735.

SATURDAY, FEBRUARY 27, 2016

1:00 PM CST at the farm, Creston, Nebraska

Welcome to our 25th Annual 'Keepin' Kind' Production Sale. After 33 years in the seedstock business, we have been blessed to have so many friends in this business. We are very grateful for the opportunity to bring another set of outstanding stout bulls to you, our customer.

We know that there are other places to make your seed stock purchases and we appreciate your loyalty. Last year we sold 95% of our bulls to repeat customers. Taking care of you our customer is our #1 priority. As always, we offer an unconditional guarantee on all cattle sold. If you should have a bull go down during breeding season, we can usually have a replacement for you within a few days, available at our ranch or we will try to meet you half way, depending on the distance. We are very proud to say that we replace very few bulls each year.

We continue to run our cows in pastures ranging from across Nebraska. Our herd consists of over 400 head of registered Limousin, Lim-Flex and Angus cattle. Our goal is to become a one-stop bull shop for all your genetic needs. Lonely Valley's Bull Battery continues to be ranked in the top 10% for all EPD traits.

Currently our bull battery ranks in the top of the breed for weaning and yearling growth and milk and does so with a low to moderate birth weight. Our Marbling and Scrotal circumference EPD is unsurpassed, not just on one bull, but all LVLS herd sires combined. 30 plus years of selection pressure really do pay off. We continue to place extensive selection pressure on calm, easy doing cattle. This set of bulls have been easy to work with. You will notice the difference. As well, cows that fail to breed being sent down the road. Fertility in these bulls is excellent with an average scrotal measurement that is unequalled in the Limousin and Angus.

The bulls will be available to be viewed at the ranch near Creston a few days prior to the sale. As well, we will have 300 calves on the ground by sale day and several of the herd bulls for your viewing. We will be serving a complimentary Limousin Beef lunch at 11:00 a.m. Should you need assistance with travel plans, trucking and delivery or anything else, please call and we will be happy to assist you. See you Saturday, February 27th at the Ranch.

CELEBRATING 33 YEARS IN THE PUREBRED SEEDSTOCK BUSINESS!!

ABOUT OUR CATTLE ...

Feeding:

The yearling cattle are fed to gain 3.25 per day, receiving a ration of corn gluten and alfalfa. We feed our bulls to gain sufficiently, without pushing a lot corn in the ration. We believe that corn causes structure problems later in life and causes yearling bulls to 'melt' when turned out to pasture. We are very proud of the success rate our yearling bulls have had.

Semen Testing:

All bulls have been semen tested and measured and a certificate will go with each bull sold.

Unconditional Guarantee:

If the cattle that you purchase at our sale fail to meet your expectations, we will replace the animal, providing you return the animal to our ranch at your expense. We will provide you with a replacement animal or give you full credit toward next year's sale or a cash refund. This guarantee expires after the first breeding season. We ask that you provide travel expenses for the replacement animal. Customer Service is #1!

ANALYZING THE PERFORMANCE DATA ...

BW - Birth Weight:

We take birth weights on our cattle in order to give you some method of determining calving ease. Larger calves will sometimes come very easy. We believe that calf structure determines calving ease along with size.

WW - Weaning Weight:

This is the weight of the cattle taken at weaning time adjusted to a constant age of 205 days, and a good indication of early growth.

YW - Yearling Weight:

This is the weight of the cattle taken at approximately one year of age and adjusted to a constant age of 365 days with at least 150 days between actual weaning and yearling weight dates.

ADG - Average Daily Gain:

Growth rate is highly heritable and these numbers will give you an idea of how the cattle respond to environmental conditions. i.e. feed, weather, etc.

HOW TO FIND WHAT YOU ARE LOOKING FOR IN THIS YEAR'S SALE ...

We first select without papers, finding all visible phenotypic defects and problems. Once the outliers are eliminated, we then select on paper, eliminating those cattle with performance, EPD or genetic problems. This two step selection process is done at weaning and repeated again just before the sale with yearling data and semen checking added to the criteria. Of course, disposition is still the number one culling criteria in our herd. Choose the type of bull that best meets your cowherd or feel free to call us to further discuss your options. We would be happy to visit with you.

'Maximizers' - Purebred & High Percentage Limousin Bulls:

These lean, red meat machines will maximize hybrid vigor on your British and British X cows. These bulls will maximize performance without sacrificing calving ease. Several of these prospects go back into the purebred industry each year, being purchased by other purebred breeders.

'Lim-Flex 75' - 75% Limousin x 25% Angus Bulls:

Our most popular hybrid for 28 years, these ultra thick and deep machines are unequaled in their muscle, volume and phenotype. These bulls work well on most any cowherd, offering the extreme thickness of Limousin and the volume of Angus. Hybrid vigor can be increased and maintained with these bulls on most all straight bred and crossbred cows.

'Lim-Flex 50' - 50% Angus x 50% Limousin Bulls:

These Angus x Limousin F1 Composites have been a hit on our sale for many years as well. Many cattlemen are using these bulls to moderate their cow size and create consistency or in a four way cross breeding system. Optimizers are moderately framed, very deep and offer much more thickness than the purebred Angus cattle.

'Lim-Flex 25' - 25% Limousin x 75% Angus Bulls:

They are 25% Limousin and 75% Angus. These bulls combine the best of the numbers of the elite Angus combined with the prominent Limousin. These bulls are huge numbered and have some of the strongest weights and stats of the entire sale offering. These bulls bring the statement of Lim-Flex to a whole new level in our breed. We urge you to see for yourself how any one of these bulls might fit into your program to sire a uniform and very desirable calf crop.

'Angus' - Purebred Registered Angus Bulls:

Over the past several years we have acquired over 100 Registered Angus females, along with flushing one of our top Angus cows in our Embryo Transfer Program, to promulgate a complimentary breed to our existing lines of seed-stock. Our goal is to provide Purebred Angus bulls that can offer an ideal compliment to high percentage Limousin based cows. We have known for years that the Limousin x Angus cross is the best, now we will be offering both sides of the equation.

- As the lead off bull in our 2016 National Western Stock Show Reserve Champion Lim-Flex pen, LVLS Cowboy 8115C was a crowd stopper while on display. He is absolutely impressive in the stall and in the pasture due to his ideal skeletal outline, muscular shape and structural soundness; in addition to his 74 WW and 1.25 SC EPD. We are particularly proud of this individual.
- Being just four-years-old, EBFL Ypsilanti is really making an impact on the breed with the look he is passing onto his progeny along with the solid growth, maternal and carcass EPD profile that goes with it. LVLS Cowboy 8115C is perfect example of what we have come to expect out of our Ypsilanti progeny.
- 8115C is out a really special, LVLS Farmer John daughter who has done an absolute bang up job for us; her first four calves have a 102 WW ratio.
- Denver Scan Data - REA 19.9; IMF: 3.4; FT: .31

- Homozygous polled/homozygous black and by one of the hottest bulls in the country, certainly makes it a no fail scenario with LVLS Optimizer 9871C. Like his paternal brother who leads off the sale, this individual is designed impeccably and has an exceptionally functional look to him.
- This bulls EPD alignment is so very balanced across all columns with highlights in the CEM, SC, REA and \$MTI categories. He is in the top 2% of the population for REA EPD.
- This 50% Lim-Flex herd sire's dam is a perfect combination of SAV Bismarck and GPFF Blaque Rulon.

- Being a son of the 2014 National Western Champion, we shouldn't be surprised by how outstanding this sire group is, but they certainly have exceeded expectations.
- LVLS Maximizer 1023C is homozygous polled/homozygous black and is moderate in frame size, yet beyond average in fleshing ability.
- On the maternal side of his pedigree, his dam has consistently been a producer of low birthweight calves year in a year out. Her longevity in our low input system is certainly notable.

- Homozygous black grandson of CJSJL Windfall is destined to be a cow-maker, he is backed by generations of milk and grow.
- Individually speaking, at weaning he recorded a 106 WW ratio amongst a stout group of fast growing calves on mature cows.
- This particular purebred son of the ATAK/Etherton herdsire, EF Zen is a neat phenotypic package.

- This 84% Limousin son of one of the great purebred bulls in the breed, EF Zen 344Z out of a LVLS Top Criteria 8862P daughter, has all the right parts and pieces to be the ideal herd sire.
- He is particularly impressive in the growth and maternal traits, he reads with a 30 MK and 65 TM epd, as well as being over 100 for yearling.
- At weaning this stud, absolutely crushed the scales, he posted a 112 WW ratio. We suspect his progeny are going to be the money makin' kind.

- When researching for a solid Angus bull to use in our Lim-Flex program, SAV Brilliance 8077 surfaced to the top fairly easily. He ties together so many traits so well. He has so much appeal to cattleman that are striving to succeed in the show ring to those who are raising commercial replacement heifers.
- LVLS Optimizer 1003C had an actual birth weight of 68 lbs. and has stopped growing since day one. He is doing exactly what his data indicated he should.
- As far as we are concerned, the dam of this exceptional individual is anything short of a hero, she is ten-years-old, has raised 12 natural calves and backed up her calving date nearly every year, while having an average adj. YW ratio of 106 on her offspring.

- As evident by this sire group, we bred some of our very best females to SAV Brilliance to see what they would do. Needless to say, they did not disappoint.
- LVLS Optimizer 1030C is double digits calving ease direct and in the top 10% of the breed for MB.
- The dam of 1030C is a 10 year old maternal powerhouse who goes back to some of the very elite maternal genetics in the Angus breed in the Tibbie cow family, many of these genetics have been lost over the years, however due to some strategic mating's we were able to keep their influence and produce EPD profiles that are still marketable.

- Upon analyzing the actual data that accompanies this stunning red herd sire prospect, you will quickly notice that he is cowboy's kind. He has a BW ratio of 95 and a WW ratio of 105. Great real world data spread.
- LVLS Maximizer 6793C, like his impressive sire PBRS Equinox is long sided, big topped, thick ended and growth oriented.
- His dam LVLS 6792 is a Carrousel's Pure Power daughter who is homozygous polled and consistently produced calves with birth weights well below our herd average.

- Here at Lonely Valley, we absolute love our Bon View New Design 878 daughters and everything that they do for us year in and year out. They are extremely maternal oriented and seem to pass these traits on through their sons and daughters alike. 6861C's dam is no exception.
- If you searching for a balanced, workable and moderate EPD profile that avoids extremes, I would seriously study this option. He should work in numerous different management scenarios.
- 721 adj. weaning weight is just one more reason we hate to see this bull go through the sale ring!

- PBRS Equinox is one of the very finest red Limousin bulls available on the public market. We are enthused about being able to capitalize on his predictable pedigree and performance profile.
- All the way across the board, LVLS Maximizer 062C is so very consistent in his tabulations, there isn't a single number in a column that isn't agreeable with our environment and the resources available for the majority of our customers.
- Any Limousin enthusiast will appreciate the lineage in this bull, he is a combination of LH Uhaul, AUTO Black Dakota, JCL Lodestar and GPFF Blaque Rulon.

- This is an exceptionally appealing member of the 2016 Lonely Valley Denver Pen, who is so good in so many ways. 73% Lim-Flex, black and homozygous polled to name just a few.
- LVLS Commander 8116C is a maternal brother to the \$19,500 selections of Liberty Ranches in the 2015 Keepin' Kind sale, LVLS Bank Account 8116B
- At weaning, he dominated his contemporary group and yielded a compelling 118 WW ratio, which led all of his peers.
- You won't recognize this bull come sale day, he just never quits getting bigger and better; he is doing exactly what his genetic predictors said he should.
- Denver Scan Data - REA: 17.45; IMF: 1.57; FT: .25

- LVLS Cash IH 0004C is a 93% purebred, performance driven herd sire who is homozygous black / homozygous polled and is extremely long spined and blends neatly from his shoulder into his body cavity.
- A direct son of MAGS Yip who is a very valuable breeding piece in the Limousin breed. Yip has produced many sale toppers and show winners, who excel in phenotypic quality. In terms of production traits, 0004C's dam is stellar and always finds her way to the top of our performance reports.
- Gripping actual performance and statistical growth, 0004C had an Adj WW ratio of 110 and a WW EPD of 72 and YW of 112.

- Don't lose this one in the mix! His pedigree reads like a who's who among some of the most recent great ones in the Limousin and Angus breeds. Truly the crème de la crème of the gene-pool in this particular pedigree. Too many notable to write, let's just say there are very few cattle in this bull's lineage that aren't household names.
- 89C is a direct son of past Denver Champion EF Xcessive Force out of an embryo daughter of our ace of a donor, LVLS Miss Blackbird 111U.
- It is easy to get so excited about this bull's history that we don't look at the future possibilities, he clearly is designed for success. He is in the top 30% or better for every single calving ease, growth and maternal trait, as well as MB and SC.

- The recently syndicated MAGS Y-Axis has honorably lived up to every expectation that was set for him and has pleasingly been titled the "go to calving ease" sire for many producers from coast to coast. LVLS Optimizer 5615C is following suit nicely and is double digits for CED and 0.1 for BW EPD, ranking in the top 3% for CEM. He is multi-generational calving ease on both his paternal and maternal sides.
- He calculates a tremendous amount of calving ease, however he doesn't sacrifice in the growth columns and is above 45% for every single carcass trait.
- His dam is nearly ideal for us, very productive, tight calving interval and has an average BW ratio of 94 on five progeny. The Bon View New Design 878 daughters are truly first-class.

															ADG 2.76

- His sire is the leading herd bull at Liberty Ranch, MAGS Unreal. He is a purebred son of the multiple trait leading sire AUTO Dollar General 122R. Maximizer 7317C is from a MAGS The General first calf heifer. She did an excellent job with 7317C, he weaned off at 697 pound adjusted.
- 13 CED, wow! This puts him in the top 10% of the breed and makes us confident selling him in public auction as a bonafide calving ease bull.
- One of the elite growth bulls in the offering at 72 WW and 108 YW.

- LVLS Chevrolet 004C is a sound structured, loose spined, straight lined son of MAGS Xtra Wet, one of the standout bulls in the 2012 Grand Champion Carload at the National Western Stock Show.
- This high percentage Purebred individual is full of quality and potential.
- Mathematically speaking, he tabulates numbers that land him in the top 15% of the breed for WW and TM.

- Each and every year our homozygous black / homozygous polled bulls are in hot demand, we presume this one will be the same.
- Liberty Ranch, Plainville, KS selected this bull's sire, MAGS Xtra Wet, in 2012 and has since made his way into A.I. programs nationwide. Xtra Wet, in our opinion is the "fixit" bull for movement as very few mature bulls in any breed can cover ground like he can.
- His sire is a marvelous, genetically clean daughter of Bon View New Design 1407, she weaned 7933C at 727 pounds.

- Another great example of what happens when we use the performance and power of MAG Xtra Wet on our Angus cows; they produce dynamic and useful individuals who will inject a healthy dose of hybrid vigor into your program.
- Please note when studying this bull's dam's data, that she is 11 years old, however the majority of her productive years she was bred straight Angus so her data will not be depicted as it would if she had been in our Lim-Flex program. We assure you that she has been productive each and every year, or she wouldn't still be here.

- Just like this bull's famous sire, BOHI Top Dollar 7144T, he is in the top 3% of the breed for CEM and top 20% for WW EPD.
- LVLS Miss Focus 6792Y is a sure bet calving ease dam for us and records a 15 CED. Being a daughter of the world renowned Mytty In Focus, there is no wonder she passes these traits on to her progeny so dominantly.
- Homozygous black, 60% Lim-Flex who weaned off at 722 pounds.

- Do you need to add proven growth and performance to your cowherd? Are you retaining cattle through to harvest? Are you looking at producing some of your own herd bulls? If you answered yes to any of these questions, there really isn't a need to look any further.
- LVLS Chops 36C is a direct son of the ultimate growth bull, COLE Windfall 144W and out of our standout donor 111U. Folks, this bull is the real deal. Totally stacked pedigree, unsurpassed growth indicators and the cowman's kind phenotypically. Oh yeah, did we mention he is also homozygous polled / homozygous black?
- He excels in WW, YW, MK and is trait leader for TM EPD.

- This alluring set of flushmates that we are offering by COLE Windfall 144W out of LVLS Miss Blackbird 111U ties together so many positives, it is hard to put it all in writing. We are very grateful to have an opportunity to work with these genetics and be able to pass them on to our valued customers.
- Calving ease, growth, milk and carcass ... these siblings do it all, and do it well.

- We mention the exquisite donor of these three brothers, but it is equally important to discuss their maternal granddam, Frenzen Blackbird M120. She is a pillar in our Lim-Flex herd and has never missed. An absolutely stunning female, who passes on exceptional maternal traits in particular.
- Blending these two pedigrees has been fun, for a lack of better words. We knew we were onto something special, but never imagined it would be this rewarding.

- These MAGS Zenith sons are an intriguing bunch. We very rarely get cattle that are patterned like them that are so very low birth weight. They are extremely soft middle, stout footed, big boned and still are above average in terms of muscle.
- LVLS Optimizer 0775C just ties so many good things together, we are consequently quite fond of him and excited about what he can do.
- Homozygous black and as balanced as they come for birth weight, growth and maternal.

- This right here is a bull that someone can really capitalize on, he is so pleasing in his phenotype and exceptional in his math.
- Ever have those young females that you look at and say to yourself, "man, I wish I had a whole field of those," well, that is how we feel about the young dam of LVLS 9002C. She raised him as a first calf heifer, she is a direct daughter of LVLS Miss Blackbird 111U and Mytty In Focus and she is absolutely stupendous in her confirmation.
- Very few Lim-Flex bulls are designed as perfect as MAGS Zenith, he is so attractive, functional and sound and is a son of the now deceased MAGS Winston. Zenith passed so many of these traits on to LVLS 9002C.

- There is great excitement when we pick out a bull to add to our breeding system, whether it is natural or artificially, when that bulls progeny look exactly like we hoped. LH Xplorer 152X was an absolute first-class, impressive yearling when we first saw him, and his sons are equally as stout.
- LVLS 1039C is homozygous black, homozygous polled and deadly good on the profile. In fact, one of our favorites on looks alone.
- Several years ago, we invested in WZRK Big Kahuna 8046K from Wieczorek Limousin, we used him very heavily for numerous years and were very pleased with his progeny. LVLS 1039C goes back to him through his dam.

- For a lack of better words, this bull is an absolute tank. His width of skeleton, durable construction and overall mass is so powerful and captivating. Each year we sell bulls that have been standouts since day one and 1020C would definitely be one of those unique individuals. Upon his arrival, his statistical indicators showed that he had all of the potential to be a top performer, and he certainly has lived up to his 77 WW EPD and 114 YW EPD. With his combination of phenotypic excellence and and strong data, this bull has all the pieces to truly be a leading herd sire in some of the very elite herds in the country.
- Wach Limousin and us are privileged to have the unlimited breeding option on LVLS X-Tra Profit 2014, he is one of the stoutest sons of AUTO Dollar General in existence.
- Homozygous polled / Homozygous black and a scale buster with a 814 adj. WW and 1,334 adj. YW.

- We believe in love at first sight, and we want to be there the first time you lay eyes on this very alluring individual who represents four generations of our breeding. This one is special kind of breeding piece, he is so attractive on the profile, comes at you and goes away from you as square as can be and is adequate in his bone work and hoof size.
- Being an Anchor, makes this unique individual a AHCC Westwind grandson, Westwind is truly one of the breed changers for real world growth that we have seen in recent years.
- In addition to being alluring to the eye in person, his EPD profile reads impressively as well; he is in the top 10% of the breeds young sires for WW, YW and TM EPD.
- Homozygous black / homozygous polled, 62% Lim-Flex.

- MAGS Zamindar is one of the most moderate and eye appealing Purebred Limousin bulls to hit the breed in the modern marketplace. He is exceptionally sound footed and is compelling through the middle portion of his skeleton due to his softness of pattern and flexibility to his spine. Certainly two traits that he is passing on to his progeny.
- LVLS Stabilizer 6736C is a black and double polled son of one of our impressive Mytty In Focus daughters.
- Four generations of Lonely Valley represented in this all-around sire's pedigree.

- Wow, what a great set of EPD's 20 CED, -1.3 BW, 69 WW, 115 YW & 10 CEM, "sleep all night" easy calving herd sire prospect
- 0.75 MB EPD along with 77.30 \$MTI puts him solidly in the top 1%.
- Sired by ABS sire B P F Special Focus 504, who ranked in the top 25% for feed efficiency, through the ABS exclusive Angus Sire Alliance test
- Homozygous Black 12% Lim-Flex herd sire prospect.

- There are numerous Angus influenced Lim-Flex bulls in this offering that we are particularly fond of the Angus part of their pedigrees, 919C would most definitely be one of those. The dam of this prime bull, is nothing short of phenomenal, she is a direct daughter of the record breaking bull of his time, SAV 8180 Traveler 004 out of a Rito 616 daughter.
 - While we are speaking of great females, MAGS Shutterbug is one of the finest ever created out of world renown donor MAGS Lady Ace.
- Homozygous polled / homozygous black and in the top 15 % for MB

- The pleasing sire of LVLS 100C is none other than EXAR Upshot, who was easily the most talked about Angus bull at the 2011 National Western Stock Show. He headlined Express Ranches champion carload of bulls. He combines phenotype and genotype as well as any bull in the industry. We are blessed to have several Upshot sons to offer you this year in both our Angus and Lim-Flex programs.
- +95 for YW EPD and +27 for Milk makes 100C even that much more of a valuable investment.

❖ **WATCH OR BID LIVE**
 The 25th Annual Lonely Valley Keepin' Kind Bull Sale can be viewed and bids can be accepted through www.dvauction.com.

Cow-Calf Producers - Add Value with Limousin

“Limousin cross cattle give me more pounds to sell while combining quality grade and carcass yield. I highly recommend using Limousin cattle in any program as they add profitability to all segments of production.”

-Fred Wacker, Miles City, Montana rancher and cattle feeder

“Limousin and Lim-Flex bulls have added pounds to my calves at sale time. They have topped the market year after year and sell to the same buyer. They work for him.”

-Galen Peterson, Kansas rancher and cow-calf producer

Limousin are the ideal complement to British-based cattle. Limousin females are biologically efficient and flexible enough to be used under a variety of environmental conditions. Limousin are the leading major Continental breed for calving ease along with moderate milk and mature cow size. The first breed to develop a docility EPD, Limousin cattle have 20 years of documented and improved docility.

THE LIMOUSIN ADVANTAGE

Limousin and Lim-Flex® (Limousin x Angus hybrid) deliver to your bottom line.

- ‡ Calving ease & calf vigor
- ‡ More pounds to sell at weaning
- ‡ Feed efficiency
- ‡ Tested & proven docility
- ‡ Cow & bull longevity
- ‡ Carcass merit

To learn more about the Limousin advantage,
visit www.NALF.org or call 303-220-1693.

EPDs Backed by the Most Powerful Database in the World

Buyers of Limousin and Lim-Flex® bulls and females can be confident in the predictive power of the North American Limousin Foundation EPDs. NALF has partnered with 11 other U.S. and Canadian breed associations to form International Genetic Solutions. This partnership has created the largest multi-breed database of performance records in the history of the beef industry. The power behind this evaluation enhances predictability, enables direct

comparisons across breeds, and adds opportunity for technological advancement.

Growth and carcass EPDs for Limousin and Lim-Flex animals can be directly compared to those for Red Angus, Simmental, Maine-Anjou, Chianina, Shorthorn, Gelbvieh, and their breed hybrids. This simplifies the selection process for cow-calf producers.

"We have used Limousin for 30 years. They run at high elevation on our western slope ranch in Colorado with little or no problems with PAP. They adapt very well to our SW Nebraska operation when taken there. We retain our calves to finish when the market is right and have seen dressing percentages up to 67% with 75-85% Choice carcasses. We like the longevity of the females as they stay in the herd a long time and have excellent udders." – *Frank Daley, rancher, New Castle, Colo., and Haigler, Neb.*

Marketing Opportunities through NALF-Tyson Fresh Meats Alignment

The North American Limousin Foundation has aligned with Tyson Fresh Meats to offer commercial cattle producers and cattle feeders the ability to market cattle through existing branded programs that Tyson is currently marketing today.

Producers can elect to market cattle into one of two natural cattle feeding programs, NHTC (non-hormone treated cattle), or utilize the Lim-Choice conventional fed cattle grid with Tyson.

Premiums for qualifying cattle under the NALF/Tyson procurement agreement for these programs are substantial depending on the program and the time of year the cattle are marketed for harvest. Commercial cow-calf producers will be able to increase the value of their feeder cattle offering by purchasing Limousin and Lim-Flex® bulls to utilize into their Angus or Red Angus based cow herds through these programs.

To find out more about the Limousin Advantage, or to locate Limousin or Lim-Flex® bulls and females to fit your program, visit www.NALF.org or call 303-220-1693.
