

LONELY VALLEY'S

KEEPIN' KIND

BULL SALE

Limousin • Lim-Flex • Angus

SATURDAY,
FEBRUARY 28, 2015

1:00 PM CST at the farm, Creston, Nebraska

SATURDAY, FEBRUARY 28, 2015

1:00 PM CST at the farm, Creston, Nebraska

Welcome to our 24th Annual 'Keepin' Kind' Production Sale. After 32 years in the seedstock business, we have been blessed to have so many friends in this business. We are very grateful for the opportunity to bring another set outstanding stout bulls to you, our customer.

We know that there are other places to make your seed stock purchases and we appreciate your loyalty. Last year we sold 90% of our bulls to repeat customers. Taking care of you our customer is out #1 priority. As always, we offer an unconditional guarantee on all cattle sold. If you should have a bull go down during breeding season, we can usually have a replacement for you within a few days, available at our ranch or we will try to meet you half way, depending on the distance. We are very proud to say that we replace very few bulls each year.

We continue to run our cows in pastures ranging from across Nebraska. Our herd consist of over 400hd of registered Limousin, Lim-Flex and Angus cattle. Our goal is to become a one-stop bull shop for all your genetic needs. Lonely Valley's Bull Battery continues to be ranked in the top 10% for all EPD traits.

Currently our bull battery ranks in the top of the breed for weaning and yearling growth and milk and does so with a low to moderate birth weight. Our Marbling and Scrotal circumference EPD is unsurpassed, not just on one bull, but all LVLS herd sires combined. 30 plus years of selection pressure really do pay off. We continue to place extensive selection pressure on calm, easy doing cattle. This set of bulls have been easy to work with. You will notice the difference. As well, cows that fail to breed being sent down the road. Fertility in these bulls is excellent with an average scrotal measurement that is unequaled in the Limousin and Angus.

The bulls will be available to be viewed at the ranch near Creston a few days prior to the sale. As well, we will have 300 calves on the ground by sale day and several of the herd bulls for your viewing. We will be serving a complimentary Limousin Beef lunch at 11:00 a.m. Should you need assistance with travel plans, trucking and delivery or anything else, please call and we will be happy to assist you. See you Saturday, February 28th at the Ranch.

Sincerely,

The Settje Family

CELEBRATING 32 YEARS IN THE PUREBRED SEEDSTOCK BUSINESS!!

GENERAL INFORMATION

AIRPORTS: Columbus Municipal Airport, Norfolk Regional Airport & Omaha Eppley Airfield

DELIVERY: Free delivery within a 250 mile radius and cost share arrangements will be made for traveling 250+ miles.

ANNOUNCEMENTS: Announcements made sale day will take precedence over printed material in the catalog. Please take note of any changes.

SEMEN: Lonely Valley Seedstock reserves the right to semen int. on any bull in the sale.

TERMS: Terms of the sale are cash unless prior credit arrangements are established between buyer and seller. Settlements are to be made with the clerk immediately after the conclusion of the auction.

MAIL & PHONE BIDS: Mailed or phone bids will be handled in a confidential matter. If you are unable to attend the sale, simply contact anyone at the sale day phone numbers. Please call in advance of the sale so we can help you ringside sale day. All cattle purchased through our 'sight unseen program' are unconditionally guaranteed, if the cattle purchased for you on order are not what you expected, we don't expect you to pay for them, no questions.

BLOOD TYPE FOR PARENTAGE VERIFICATION: All animals sold are guaranteed to be offspring of the recorded parents. Under the rules of NALF, all bulls born after January 1, 1991 that are to be used for artificial insemination or used naturally in a herd other than the owner of record must be parent verified by blood typing to both sire and dam. All females born after July 1, 1987 and December 31, 1990 that are to be used for artificial insemination or naturally in a herd other than the owner of record must be sire verified through blood typing. Sellers shall make the necessary parent blood samples available to purchasers upon written request by the purchaser's so long as a written request is received by sellers within 60 days after the sale of the applicable animal.

LIABILITY: Each animal will be the buyer's risk as soon as it is sold, but will be cared for by the seller for a reasonable period of time. Every precaution will be taken for the welfare of the cattle sold. Neither owner nor sales management can be responsible for accidents, but every effort will be made to provide for safety and comfort of those attending the sale.

INSURANCE: Insurance on your purchase can be provided by Mark Smith, Grass Roots Genetics & Consulting, Ankeny, IA, 515.229.5227

PAYMENT: Cattle must be paid for at the time of the sale unless prior arrangements are made with sale management at the time of the sale at 615.330.2735.

ABOUT OUR CATTLE ...

Feeding:

The yearling cattle are fed to gain 3.25 per day, receiving a ration of corn gluten and alfalfa. We feed our bulls to gain sufficiently, without pushing a lot corn in the ration. We believe that corn causes structure problems later in life and causes yearling bulls to 'melt' when turned out to pasture. We are very proud of the success rate our yearling bulls have had.

Semen Testing:

All bulls have been semen tested and measured and a certificate will go with each bull sold.

Unconditional Guarantee:

If the cattle that you purchase at our sale fail to meet your expectations, we will replace the animal, providing you return the animal to our ranch at your expense. We will provide you with a replacement animal or give you full credit toward next year's sale or a cash refund. This guarantee expires after the first breeding season. We ask that you provide travel expenses for the replacement animal. Customer Service is #1!

ANALYZING THE PERFORMANCE DATA ...

BW - Birth Weight:

We take birth weights on our cattle in order to give you some method of determining calving ease. Larger calves will sometimes come very easy. We believe that calf structure determines calving ease along with size.

WW - Weaning Weight:

This is the weight of the cattle taken at weaning time adjusted to a constant age of 205 days, and a good indication of early growth.

YW - Yearling Weight:

This is the weight of the cattle taken at approximately one year of age and adjusted to a constant age of 365 days with at least 150 days between actual weaning and yearling weight dates.

ADG - Average Daily Gain:

Growth rate is highly heritable and these numbers will give you an idea of how the cattle respond to environmental conditions. i.e. feed, weather, etc.

HOW TO FIND WHAT YOU ARE LOOKING FOR IN THIS YEAR'S SALE ...

We first select without papers, finding all visible phenotypic defects and problems. Once the outliers are eliminated, we then select on paper, eliminating those cattle with performance, EPD or genetic problems. This two step selection process is done at weaning and repeated again just before the sale with yearling data and semen checking added to the criteria. Of course, disposition is still the number one culling criteria in our herd. Choose the type of bull that best meets your cowherd or feel free to call us to further discuss your options. We would be happy to visit with you.

'Maximizers' - Purebred & High Percentage Limousin Bulls:

These lean, red meat machines will maximize hybrid vigor on your British and British X cows. These bulls will maximize performance without sacrificing calving ease. Several of these prospects go back into the purebred industry each year, being purchased by other purebred breeders.

'Lim-Flex 75' - 75% Limousin x 25% Angus Bulls:

Our most popular hybrid for 28 years, these ultra thick and deep machines are unequaled in their muscle, volume and phenotype. These bulls work well on most any cowherd, offering the extreme thickness of Limousin and the volume of Angus. Hybrid vigor can be increased and maintained with these bulls on most all straight bred and crossbred cows.

'Lim-Flex 50' - 50% Angus x 50% Limousin Bulls:

These Angus x Limousin F1 Composites have been a hit on our sale for many years as well. Many cattlemen are using these bulls to moderate their cow size and create consistency or in a four way cross breeding system. Optimizers are moderately framed, very deep and offer much more thickness than the purebred Angus cattle.

'Lim-Flex 25' - 25% Limousin x 75% Angus Bulls:

They are 25% Limousin and 75% Angus. These bulls combine the best of the numbers of the elite Angus combined with the prominent Limousin. These bulls are huge numbered and have some of the strongest weights and stats of the entire sale offering. These bulls bring the statement of Lim-Flex to a whole new level in our breed. We urge you to see for yourself how any one of these bulls might fit into your program to sire a uniform and very desirable calf crop.

'Angus' - Purebred Registered Angus Bulls:

Over the past several years we have acquired over 100 Registered Angus females, along with flushing one of our top Angus cows in our Embryo Transfer Program, to promulgate a complimentary breed to our existing lines of seed-stock. Our goal is to provide Purebred Angus bulls that can offer an ideal compliment to high percentage Limousin based cows. We have known for years that the Limousin x Angus cross is the best, now we will be offering both sides of the equation.

Crossbreeding, the only **FREE** Lunch in the Cattle Business

The Benefits of Hybrid Vigor without the Hassle: Crossbreeding made easy with Lim-Flex®

Crossbreeding for the right blend of muscle, maternal ability and profit is easier with Lim-Flex. Registered Lim-Flex seedstock, the pedigreed blend of 25-75% Limousin with Angus (black or red), features the muscle and cutability of Limousin with the marbling and fleshing ability of Angus.

Lim-Flex takes the hassle out of crossbreeding. Lim-Flex provides the right amount of Limousin and Angus to excel in any market, without the extra management of rotational crossbreeding. Whether you're breeding calves to sell through Strauss Brands, CAB or the local livestock market, Lim-Flex not only fit, but can top the market.

Progressive producers recognize the advantages of hybrid vigor:

- ...20% more pounds of calf per cow exposed (due to hybrid advantages in age at puberty, conception rate, survival to weaning, milk production and weaning weight)
- ...1.3 years of additional cow longevity
- ...30% greater lifetime production
- ...Increased fertility and decreased gestation length with hybrid bulls

LIM-FLEX ADVANTAGES

- ...Flexible seedstock for simple, easily managed crossbreeding
- ...Flexible marketing options to maximize profit
- ...Flexible market progeny that consistently hit dressing percent, along with yield and quality grade targets for mainstream markets
- ...Flexible females adapted for efficiency across a wide range of environments

North American Limousin Foundation
303/220-1693 • www.nalf.org

"Not only do Lim-Flex females offer unprecedented longevity, they are extremely fertile and maternally inclined."

Andy Bailey
Star Valley Ranch, Hiko, NV

"Our cattle have to be stout, easy-fleshing, maternal, and able to fend for themselves. Lim-Flex do this better than any other type of cattle we've ran."

Casey Deuter
Deuter Ranches, Ree Heights, SD

Rancher Approved

Market Driven

“Using Limousin bulls on my Angus-based cows has all but eliminated calving difficulties, plus those calves are up and nursing right away. This helps maximize the pounds of calves I have to market.”

- Wayne Hepper, Flying O Ranch

Hepper is a progressive rancher who uses Limousin genetics to add performance to his natural, NHTC calf crop. The calves graded 80% Choice with 80% YG 1&2 last year, yielding a premium for himself, the feeder, and the packer.

- This homozygous black, 75% Limousin lead-off bull is designed to add performance and profitability to any breeding program.
- Impressively growth oriented, a trait leader for both weaning weight and MTI, and sits in the top 1% of the Limousin breed for weaning weight.
- Recorded an individual weaning weight ratio of 115% in a performance driven Lonely Valley program.
- Generations of proven and predictable genetics going back to many breed shaping individuals such as DHVO Deuce, MAGS Manuela, BOHI Red Robin and LVLS Top Criteria 8862P.
- Dam, LVLS Wilma 8116W is making her mark in the LVLS program with her first 4 progeny posting an average weaning weight ratio of 107.
- Very rarely do we get a bull with this type of structural integrity and perfectly designed front end, that also posts such performance numbers.

- Homozygous black and homozygous polled, 68% Lim-Flex bull with an extremely balanced set of EPDs across the board.
- With a .28 MARB EPD, he earns a place in the Limousin young sire list as a trait leader.
- Son of the famed and now deceased, MAGS Winston.
- His dam is the popular LVLS 7428L who has produced top selling genetics for Lonely Valley, Linhart Limousin and Hager Cattle Co. including A.I. sire, LVLS Wolf Track. Certainly a cow we are going to hear a lot about in the future as part of the Linhart Limousin donor line-up.
- If a muscular, masculine look and massive foot size are your desires, there is no need to look any further.

- 50% Lim-Flex bull who sorts himself to the top in terms of structural design. With tremendous eye appeal and balance, we love how much muscle he carries out of his hip when viewed from behind.
- He is a homozygous polled son of MAGS Unwashed who sired the \$7,000 favorite in the 2013 Keepin' Kind Sale, going to Loving U Ranch of Colorado. MAGS Unwashed is a true outlier in terms of actual carcass data, ratios a 105 for UREA, 102.9 for UIMF and still maintains a 85.7 ratio for UFAT. He is the type of sire who makes bulls that will make you and your customers money.
- MTI of 57 & marbling EPD of .16, put this outstanding bull in the top of the breed.
- Like most SAV 8180 Traveler 004 daughters, this bull's dam LVLS Miss Traveler 5048W excels in maternal function. Further proving why "004" lead the Angus breed for numerous years for number of registered progeny and total units of semen sold.

- With off the charts breed topping marbling and MTI numbers that will take your program to the next level, this 75% Lim-Flex bull is the solution you have been looking for to improve quality grade and increase your average profit per carcass.
- Homozygous polled and homozygous black and out of one the most heavily used A.I. sires in the business in 2013/2014, WULFS Xclusive 2458X was the lot one lead-off bull in the 2012 WULF Cattle sale and came back to sire the lot one bull in the same sale in 2013, WULFs Zane.
- His dam is one of our extremely fertile and productive Angus cows by Woodhill Foresight. We chose Foresight to bring scrotal circumference and muscle to the Angus side of our operation. His daughters are working great in our Lim-Flex program.
- Conventional Limousin top shape combined with an ideal set to his hock and pastern makes him a favorite of ours.

- A January purebred bull who is polled and black and by the breed changing WULFS Xclusive 2458X.
- It isn't every day that we are able to offer a bull like this who is a trait leader across the breed for marbling and in the top 1.5% for \$MTI. Don't miss your opportunity to progress in the industry with LVLS Maximizer 806B.
- In addition to his tremendous projections for profit and quality grade, his impressive data set lands him in the top of the breed for weaning and yearling weight and the top 4% for milk and calving ease maternal.
- His dam has succeeded on her first three calves when we have mated her to Angus, Purebred Limousin and Lim-Flex. Her versatility proves to us that her maternal strength is dominant and is passed on to her progeny.

- Homozygous Black and Double Polled bull with a .7 birth weight to 104 yearling weight spread and solid growth, maternal and carcass numbers across the board.
- If you are seeking a bull with balanced numbers, here is a great option for your program.
- Liberty Ranch, Plainville, KS selected this bull's sire, MAGS Xtra Wet, in 2012 and has since made his way into A.I. programs nationwide. Xtra Wet, in our opinion is the "fix-it" bull for improving movement as very few mature bulls in any breed can cover ground like he can.
- 75% Lim-Flex bull offers double digits calving ease direct combined with an actual birth weight of 83 pounds.

- Homozygous black and polled, 87.5% Limousin son of the world renown AHCC Westwind W544, member of the Hager Cattle Co.'s People's Choice pen and the talk of Denver in 2010. Westwind is a KAJO Responder out of a stand out WULF Hunt daughter, he currently shows a yearling EPD of 134.
- Not only does he get power and growth from his sire's side, his dam offers a tremendous amount of predictably maternal ability. She has eight calves recorded with the North American Limousin Foundation, with an average weaning ratio of 106!
- Individually he is a 1.5 for birth EPD, 67 for weaning EPD, 106 for yearling EPD and 32 for milk.
- 1000B's maternal brother are working in herds throughout Nebraska and South Dakota, including at Fott Farms, Hamill, SD. Richard Fott, was recognized as the 2013 NALF "Commercial Producer of the Year" for utilizing Limousin genetics to advance his cowherd and increase profits.

- Top \$MTI bull in the offering with an astonishing EPD of 77. If you are in the business to make money on terminal cattle, here is the answer.
- Top 5% of the breed for marbling bulls to sell in the 2015 bull sale season
- LVLS 1023B had an adjusted weaning weight of 730 pounds, which calculated to a 105.2 ratio.
- This black and polled, marbling trait leader is one the only Connealy Consensus 7229 sons that is available in this year's offering. 7229 was the most sought after Angus sire of the 2010 bull sale season. Express Ranches/Bobo Angus Farm/Sand Point Cattle Co. were the winning bidders at an impressive \$210,000. Since that point, his sons and daughters alike have been bringing record prices across the country to both commercial and purebred cattlemen.

- Out of a Mytty In Focus son that we used extensively in our herd on heifers and mature cows.
- Dam is twelve years old and still in production in our zero tolerance culling program, which means that she has never come up open.
- CED EPD of 13 and -0.8 for birth weight will give you the peace of mind you deserve next calving season.
- A 65 \$MTI puts him as a trait leader for the breed.

- Double digit calving ease direct doesn't come as a surprise when you combine Mytty In Focus and the dam of EXT in this bull's pedigree.
- Homozygous black, 25% Lim-Flex bull out of one of our favorite females from Express Ranches, Yukon, OK, EXLR Splash 563N. 563N has an average weaning weight ratio of 102 on six calves. She also recorded an impressive ultrasound IMF of 4.24 to ratio 111.
- 239B is the highest marbling EPD son in the sale out by LVLS Focus. He offers an impressive .64 marbling EPD, which earned him a spot on the North American Limousin Foundation's Young Sire Trait Leader list of marbling.

- From a statistical stand point, here is a bull that we feel that a lot of producers will get excited about, especially when you get to the marbling and \$MTI columns. Very few bulls will sell this year with a profile as complete as this.
- Maternal brother to Jamie Webben's LVLS Artic bull, who was a member of the 2014 Lonely Valley pen in Denver at National Western Stock Show.
- 4751's dam is two for two, she has had two calves and both of them have been selected for our "Keepin' Kind" sale. We feel that her future here at the ranch is promising and we are excited what her sons are going to do for our clients.
- Adjusted weaning weight of 784 pounds.

- Homozygous polled and homozygous black, 71% Lim-Flex.
- If you are looking for a proven pedigree with generations of excellence on both sides, here is your answer. The list of both Angus and Limousin legends in 2206B's lineage is extensive, but some of the highlights are DHVO Deuce, MAGS Manuela, JCL Lodestar and SAV 8180 Traveler 004.
- A yearling weight EPD of 124 and weaning weight EPD of 83 puts 2206B in the top 1% of the Limousin breed for growth traits.
- MAGS Wazowski, the A.I. sire owned by Fuchs Limousin and Magness Land & Cattle, is massive footed and extremely sound, with an impressive EPD profile for growth and carcass. His sons, such as 2206B, are going to make an impact on the breed in the upcoming years.

- Numbers and phenotype have calving ease written all of this 25% Lim-Flex young herd sire. He lays in beautifully at his shoulder, and is refined in his joint design and long, clean fronted. Statistically speaking, he is a 13 calving ease direct and -4 birth weight.
- Top 10% for CED and Marbling.
- Sire was our \$9,750 selection out of the 2012 Hall/Coyote Hills Bull Sale. We fell in love with his actual growth and his numerically strong calving ease. LH Explorer 152X had a dynamic spread to his actual numbers as well, 81 pound birth weight, 747 pound of weaning weight and a 1,409 pound adjusted yearling weight.

LVLS 703R
LVLS BECHA 703B

- Homozygous polled and homozygous black.
- Look at the lean, muscular shape this LVLS X-Ternal 3506X son offers. He displays a tremendous amount of muscle through this stifle and forearm and gives you a more traditional purebred Limousin look. Will work perfectly on British based cows.
- One of the lower adjusted birth weight bulls in the offering at 70 pounds and a 89.7 ratio.
- Adjusted weaning weight of 812 pounds.
- Four generations of proven Lonely Valley cows on the dam's side of his pedigree.
