If you need assistance with your purchase or want to discuss the genetics selling, please feel free to contact R & R Marketing Company. As a paid marketing agent for Milam Cattle Company we take pride in the opportunity to work closely with this program. We can assist you with your phone order and/or handle your bid in the most confidential manner. Email, call or text and we will be more than honored to assist.

R&R Marketing will now be accepting payment by credit cards.

Sale Consultant...

- Bill Helton256.962.0256
- Skyler Davis770.307.7036

Dear Limousin Breeders and Commercial Cattleman,

On behalf of the Milam Family we would like to welcome everyone to our near complete dispersal. It is with excitement but yet much sadness that we can showcase nearly all of our Limousin cattle in this one big event. I was honored to have accepted a job with Champion Pet Foods as their Ingredient source and development leader. With this new endeavor it will require me to travel extensively throughout the United States and Canada. With this commitment it will not allow me to have enough time to take care of a large group of cattle that we currently have. We as a family have decided to have a near dispersal with the exception of keeping our kids past show heifers and a select few head. In this sale you will find only our finest that we have purchased, raised and shown over the years. This sale marks 24 years of being a seed stock supplier of registered Limousin and Lim-Flex cattle. We are proud of what we have to offer and are in hopes that you can join us for this event and help to celebrate what we love so much about our breed "The People and The Quality of the Cattle".

With this size of sale we have decided to move the sale from our farm to one of the finest Stockyards in the local area that has a tremendous presence in the commercial market place, The Cattleman's Livestock Market, Rockfield, KY.

"For 24 years and counting we have enjoyed ever step of the way in raising, showing and promoting Limousin cattle"

We welcome your inquiries and look forward to seeing you at the sale,

Chris Milam
Milam Cattle Co.

Chris, Laura, Caroline, Andrew & Zachary Milam
785 Cedar Grove Road Olmstead, KY 42265
270.847.0634
Cmilam@championpetfoods.com

DIRECTIONS ... Sale location for GPS - 210 Stamps Rd, Rockfield, KY 42274

From the Louisville, KY airport.

Take I-65 South towards KY-61/Nashville for approximately 110 miles. Take Exit 20B towards Owensboro. Keep right to merge onto William H. Natcher Pkwy North toward Owensboro. After 4-5 miles take US-68, Exit 7 toward Russellville/Bowling Green. Turn left onto Russellville Rd toward Russellville. In roughly 8.3 miles, turn left onto Stamps Rd. The Cattleman's Livestock Market will be on your left.

From the Nashville, TN airport.

Take 1-40 West to exit 215B and merge onto TN-155 toward Opryland. Continue for about 8.5 miles and then merge onto I-65 North via Exit 16A (toward Louisville). Keep left to stay on I-65 North into Kentucky, and take US-31 West, Exit 2 toward Franklin. Turn left onto Nashville Rd/US-31 W and continue until you reach Petros Rd. Turn left onto Petros Rd. After about 5.5 miles, turn left onto US Highway 68. In half a mile, turn left onto Stamps Rd. The Cattleman's Livestock Market will be on your left.

From St. Louis, MO airport.

Take 1-70 East toward I-70 East/St Louis(Crossing into Illinois). Merge onto I-64 East via EXIT 3 toward Louisville. Stay on I-64 East via merging onto EXIT 92 on the left toward Louisville (Crossing into Indiana). Continue until the I-69 junction and take I-69 South via EXIT 29A toward Evansville/Henderson KY. Take Exit 7A to merge onto Interstate-66 East. Turn right onto North State Road 161/IN-161(Crossing into Kentucky). N State Road 161/IN-161 becomes J R Miller Blvd. Turn left onto East 4th St. Turn right onto US-60 W/US-231 W/Wendell Ford Expy West. (just past Barton Ave). Take Exit 17 toward Bowling Green. Merge onto William H. Natcher Pkwy S. Take the US-68 exit, EXIT 7, toward Bowling Green/Russellville. Turn right onto Russellville Rd/US-68 W/KY-80. Continue to follow US-68 W/KY-80. Turn left onto Stamps Rd. The Cattleman's Livestock Market will be on your left.

TERMS AND CONDITIONS ... Terms of the sale are check and or/cash unless satisfactory credit arrangements have been made prior to the sale. All cattle must be paid for immediately following the sale.

SALE ORDER AND SUPPLEMENT SHEET ... The cattle sell in catalog order. The supplement sheet will be posted on www.RRMktg.com Thursday evening, February 5th.

SEMEN & EMBRYOS ... Can be picked up at the sale, or otherwise you will need to send a semen tank directly to Milam Cattle Company. Call 270.847.0634 for details.

AIR TRANSPORTATION ...

Nashville TN ... A little over 1 hour
Louisville, KY ... Approximately 2 hours
St. Louis, MO ... Approximately 4.5 hours

LIABILITIES ... Please note: The sale manager is only an agent for the seller and has no responsibilities other than those involved in conducting the sale. All persons who attend the sale do so at their own risk. Neither the sale manager or Milam Cattle Company assume liability, legal or otherwise, for any accidents which may occur

ANNOUNCEMENTS ... Announcements at the sale by the owners, auctioneers or sale management will take precedence over statements in the sale catalog.

GUARANTEE ... All cattle sell under the standard guarantee of the North American Limousin Foundation.

- Selling 1/3 semen interest only
- Owned with Sugar Bush Cattle, Inc., Allen, MI
- Polled and homozygous black
- One of the finest herd sire prospects in our breed
- Sired by the ever popular Angus sire Dameron First Class, the leading A.I. sire and possibly one of the breed's most prominent beef bulls
- From the MAGS Manuela 662M donor that has earned her way to the top in the breed as one of the all time great donors. Her influence around the country and in the breed is like no other and this without a doubt could be one of the very sons that she has
- His biggest attribute is that he is extreme in his foot size and is very heavy boned.
- We love his fluid movement, heaviness of muscle and the amount of thickness that he has

- Selling 15% semen interest only
- Owned with Wies Limousin, Wellsville, MO
- Homozygous polled and homozygous black
- Recognized in the Limousin breed as one of the very finest and most prominent producing sires
- He is a complete outcross to most established lines of cattle in being sired by TC Aberdeen and from the once national champion female MAGS Ramada
- He has earned a 0.9 for birth, 60 for weaning weight, 109 for yearling weight, 40 for milk and .42 for marbling
- His influence is as positive as you would ever want in big time Limousin bull and 15% semen interest is being offered where his semen is not on the open market
- Possession is owned by Sugar Bush Cattle, Inc and Stowers Limousin and a semen interest is owned by Salt Creek Cattle & Genetics, LLC

- Selling 25% embryo interest with Riverside Valley Farm retaining possession
- Sells Open and ready for immediate reproduction
- This 50% Lim-Flex female can easily be recognized as one of the very best daughters of MAGS Manuela 662M. She is sired by the big numbered Angus sire SAV Providence 6922. This young donor female is made absolutely perfect in her design and has tremendous balance. She is owned with Riverside Valley Farm and Sugar Bush Cattle, Inc. She is has earned a breed leading set of numbers with a 1.8 for birth, 105 for yearling weight, 40 for milk and .41 for marbling
- This donor cow has only just began in production and we are certain she has nothing but a bright future. Her first natural calf sold to Stowers Limousin in Bridgeport, TX
- Owned with Sugar Bush Cattle, Inc, Allen, MI and Riverside Valley Farm, Hohenwald, TN

The Ideal Complement to British Based Cows

Maternal Efficiency, Limousin's Best Kept Secret

- Leading major continental breeds in Calving Ease, Calf Vigor, and Calves Weaned per Cow Exposed
- Low maintenance requirements and high efficiency over wide range of feed resources
- Unrivaled Longevity

¹Breed Differences for Maternal Efficiency

Breed	² Biological Efficiency Rank			First Calf Heifers (2 years old)		Mature Cows (5 years old)	
	Low Feed	High Feed	Composite Rank	Birth Wt. (lbs)	Weaned %	Born %	Wean %
Limousin	2	2	1	80.1	73	95	91
Hereford	3	6	5	81.4	70	94	91
Angus	1	5	2	79.6	76	95	89
Gelbvieh	4	4	4	83.4	68	90	86
Simmental	6	2	5	79.4	69	90	87
Charolais	5	1	3	81.4	73	90	86

¹ Germplasm Progress Reports, ARS-USDA Meat Animal Research Center

² Ranked by grams of calf weaned per kilogram of dry matter intake per cow. Composite rank across high and low feed compiled by NALF

"A carefully constructed British X Continental can come a lot closer to hitting most of the targets for reproduction, production and end-product than any straightbred I'm aware of."

~ Dr. Jim Gosey,
University of Nebraska
Beef Specialist

Hybrid Vigor Made Easy with LIM-FLEX

Progressive producers recognize the advantages of hybrid vigor

-20% more pounds of calf per cow exposed (due to hybrid advantages in age at puberty, conception rate, survival to weaning, milk production, and weaning weight)

-1.3 years of additional cow longevity

-30% greater lifetime production

-Increased fertility and decreased gestation length with hybrid bulls

"Not only do Lim-Flex females offer unprecedented longevity, but they are extremely fertile and maternally inclined."

~ Andy Bailey,
Star Valley Ranch, Hiko, NV

"Our cattle have to be stout, easy fleshing, maternal, and able to fend for themselves. Lim-Flex do this better than any other type of cattle we've ran."

~ Casey Deuter,
Deuter Ranches, Ree Heights, SD

North American Limousin Foundation
303/220-1693

Here is a guide to understanding the whole herd report. Utilize this tool to determine an animals horned/poled and color status, performance and carcass EPDs. Refer to the breed averages under the 'Genetics & Performance' tab on the NALF web site to familiarize yourself with the breed EPDs. Evaluating breed averages and percentiles will allow you to narrow down your bull selection. NALF has a useful tool on its website called the "Sire Selector," which allows you to search for sire prospects based on your own selection criteria and benchmarks.

1 TATTOO identification number along with a herd prefix typically located in the upper or center rib of the ear

2 SEX of animal indicated by M for Males, F for Females, S for Steers.

3 PLD - Polled Status of the animal with P denoting a polled animal

4 BLK - Black color status of the animal with B denoting a black animal

5 CED - Calving Ease Direct EPD and accuracy. When sires A and B are bred to similar replacement heifers, you'd expect 5 percent (the difference between +10% and +5%) more of sire A's calves to be born unassisted as compared to sire B's calves. Said another way, due to genes for calving ease passed on from the sires to their calves, each of sire A's calves out of first-calf heifers have a 5 percent greater chance of being born unassisted as compared to sire B's calves.

6 BW - Birth Weight EPD and accuracy. When mated to equal dams, progeny of sire A (listed above) are expected to weigh 4.0 lbs. less at birth than progeny of sire B (-1.0 - 3.0), due to genes for birth weight passed on from the sires.

7 WW - Weaning Weight EPD and accuracy. Weaning weight EPDs are predictors of pre-weaning growth of progeny. Of the two sires represented above, progeny of sire A are expected to weigh 6 lbs. less than progeny of sire B (44-38) at 205 days of age (when bred to dams of equal value), due to genes inherited for pre-weaning growth from the sires.

8 YW - Yearling Weight EPD and accuracy. Yearling weight EPDs are predictors of progeny growth to yearling ages. For example, progeny of sire A are expected to weigh 20 lbs. less (92-72) than progeny of sire B at 365 days of age (when mated to equal dams), due to genes for growth from the sires.

9 MA - Milking Ability EPD, and accuracy. Milk EPDs are predictors of pounds of daughters' progeny weaning weight due to genes for milk the daughters inherit from the parent in question. For example, daughters of sire A are expected to wean calves which are 7 lbs. heavier than calves from daughters of sire B (30 - 23 lbs.), due to genes for milk passed on to daughters.

10 CEM - Calving Ease Maternal EPD and accuracy. When daughters of sires A and B are bred to similar bulls, daughters of sire A have a 4 percent (14% -10%) greater chance

of calving unassisted with their first calf as compared to daughters of sire B, due to differences in genes the daughters inherited from their sires for easy delivery of their first calves.

11 SC - Scrotal Circumference EPD, and accuracy. Scrotal EPDs are expressed in centimeters (cm), with higher values indicating the expectation of genes for larger average yearling scrotal circumferences to be passed on to sons. If mated to equal dams, sire B would be expected to produce sons which average 1.0 cm larger (1.0 - 0) than the average of sons of sire A. Scrotal circumference has also been correlated to the age of puberty in heifers

12 ST - Stayability EPD and accuracy. Stayability EPDs predict genetic differences in the probability that daughters will produce calves at the age of six years or beyond, given that at least one calf was produced prior to the age of six. Generally, higher stayability EPDs represent genetics for greater longevity. Sire B above is expected to have 15% more daughters still in production at the age of six or beyond (+20% vs. +5% = 15% difference) as compared to the percentage of daughters of sire A.

13 DOC - Docility EPD and accuracy. Docility EPDs predict genetic differences in the probability that offspring are scored as 1 (docile) or 2 (restless) as opposed to 3, 4, 5 or 6 (nervous to very aggressive). The higher docility EPD for sire A above is preferred to that of sire B; specifically indicating that 25% more (+15% for sire A to -10% for sire B = 25% difference) of sire A's offspring are expected to have scores of 1 or 2 as compared to offspring of sire B. Generally, the higher the accuracy value, the more progeny with docility scores in groups which have contributed to the EPD, making the EPD more reliable and less subject to change. Only groups with variation in docility scores are used in EPD evaluation.

14 CW - Carcass Weight EPD and accuracy. Carcass weight EPDs are used to genetically design carcasses with weights that fall within an acceptable industry weight range. Optimum carcass weight EPDs for sires will vary according to the types of cows to which the sires are mated and the calf growing/finishing management regime. If mated to cows of equal value, sire A would be expected to produce progeny with carcasses 10 pounds heavier (20 - 10) at harvest than sire B.

15 REA - Ribeye Area EPD and accuracy. Ribeye area EPDs offer an objective

measurement of genetic differences in muscularity. EPDs for ribeye area are expressed in units of square inches, with larger values indicating larger ribeye area and increased expected overall carcass muscularity. Sire A is expected to produce progeny with ribeye areas that are .30 square inches larger (.50 - .20) on average than progeny of sire B.

16 YG - Yield Grade EPD and accuracy. Just as lower carcass yield grades are favored and indicate greater cutability, lower YG EPDs are favored and indicate genetic differences for yield grade and cutability of offspring. When bred to similar cows, offspring of sire A are expected to average .10 (-.10-0) units of yield grade lower than offspring of sire B.

17 MARB - Marbling Score EPD and accuracy. The marbling score EPD is expressed in units of numeric USDA marbling score, with higher values indicating genes for greater deposition of intramuscular fat, or higher expected marbling score and USDA quality grade at a constant age. When mated to similar sets of cows, sire A would be expected to produce progeny with average marbling scores .20 units lower (-.10 - .10) than sire B.

18 \$MTI - Mainstream Terminal Index. The mainstream terminal index takes both genetics and economics into account to rank animals in terms of expected profit per carcass produced from weaning to mainstream market endpoints of yield grade 1s and 2s and Select to low-choice quality grades. It is based on the assumption that Angus-Hereford cows in a two breed rotation are mated to Limousin-influenced terminal sires and is determined primarily by genetics and economics associated with post-weaning growth and yield and quality grade. In this example, if sire A and sire B were mated to similar sets of black baldy cows, sire A would produce progeny with carcasses worth \$15 (\$55 - \$40) more than those of sire B. The mainstream terminal index does not have an associated accuracy value.

*ACC - Accuracy. Accuracy is a measure of the reliability associated with an EPD. For Limousin cattle, accuracy is designated by either a P (pedigree only), P+ (interim pedigree plus own performance in contemporary group) or a numeric value (performance of individual and subsequent progeny in contemporary group) which ranges from 0 to 1. Accuracy indicates the amount of performance information which was used to calculate the EPD.

Note: Carcass EPDs are only calculated for animals have had carcass data collected on them, their parents, or their progeny by either ultrasound or actual carcass data collection. So in the case of Bull B, for him to have pedigree estimates for his carcass values, his parents would have had data collected on themselves or their progeny.
