SBLX Carbon Copy is anything but a duplicated, the uniqueness of this mating is clearly one of the most dynamic combinations that will sell in 2016. As any truly successful cattle person will proclaim, "the great breeding bulls, come from great cows." Carbon Copy is fortunate to not only be a product of the same cow family that produced AUTO Luckie 246W, the 2012 All American Futurity Grand Champion female and AUTO Luckie Too 423Y, the 2013 National Junior show grand champion Limousin female for Cody Heavin, Springfield, MO as well as SSTO After Hours a past sale highlight for Stowers Limousin, Bridgeport, TX. Her progeny can be found at the top of numerous programs who are serious about performance and phenotype. She is unquestionably one of the "great cows," of the Limousin population.

Andras New Direction R240 is the solution for many cattle producers, his mass, fleshing ability, cat-like athleticism, and predictable pedigree; his completeness has made him a favorite in the Genex Line-up. SBLX Carbon Copy inherited all of the desirable traits, when you analyze him from head to tail, he is absolutely ideal as a Lim-Flex breeding option, he clearly isn't just a piece of the puzzle. He is the complete package coming with generations of excellence in his lineage representing the very best of the Limousin, Black Angus and Red Angus breeds.

On paper, you can study his performance profile and quickly see that he is solid across the board for calving, growth and maternal traits and slams a homerun in the Marbling category with an exceptional .71 MB PED, landing him in the top 1% of the breed. We couldn't be more excited to offer you this opportunity to totally reshape your herd with this flawless homozygous polled individual who represents everything the Sugar Bush program stands for.
