ANGUS

A herd of black Angus cattle is silhouetted against a light sky in a grassy field. The cattle are of various ages and are looking towards the camera.

PRODUCTION SALE

2.27.22

Dexter, Iowa

Dear Angus Friends,

Happy New Year from all of us at Voss Angus!

I would like to start this letter off by saying a few very important things about the cattle business. Quality is our number one goal and service is number two. We want to earn your trust in our program by providing you with the highest quality and most trusted seedstock source in the Midwest. Defining quality, number one should be fertility. Without excellent fertility in bulls and females we are already backwards. It is essential that the cattle reproduce each and every time. In our females, we strive for longevity, fleshing ability, phenotype, feet quality, utter quality and pure maternal power. In our bulls, we breed for calving, ease bulls and power bulls. Bulls absolutely must have docility, good feet, muscle, body capacity, fleshing ability, excellent phenotype and the ability to produce heavy 205-day weighted calves. Muscle equates to pounds, pounds equate to profit, profit equates to sustainability. The commercial cattlemen's needs are at the forefront of our mindset. Your success will define our success! We have gone the extra mile in finding the very best in the breed to expand this program. We are excited for you to come and praise this sale offering. Each and every year we aim to make the calf crop better than the last. We believe that the 2022 sale offering will not disappoint. We appreciate the past 6 years of your solid support of our program; we do not take it for granted. We want to say thank you to all of our customers and friends, we look forward to helping you build a rewarding future for all of our Angus family and friends.

Sincerely,
Voss Angus
Brent & Teresa Voss

PS.

As we look back at 2021 it has once again given us another year of great adversities. From severe droughts in the north through the mid-section of our nation, December storms in Kentucky and the devastating fires in Kansas, the significant loss of life and property has left all of us very saddened. Moving forward into the new year, as we always do because that's just how we are all made, we lean heavily upon our faith and trust in God and family. I ask you to keep all those families affected in your prayers throughout the new year. God Bless you all!

Nick Boyle

VOSS ANGUS PRODUCTION SALE

Sunday
FEBRUARY 27, 2022
VOSS ANGUS SALE FACILITY - DEXTER, IOWA

1:00 pm

Sale Location

Voss Angus Sale Facility
14440 Bear Creek Road - Dexter, Iowa

Directions To The Sale Site

The state-of-the-art Voss Angus sale facility is located 20 minutes west of Des Moines, Iowa on I-80. From I-80 take Exit 100, go north 1 mile. Look for Andy Angus out front to greet you!

Motel Accommodations

Americinn - Stuart, Iowa (515) 523-9000
America's Best Value Inn and Suites - Stuart, Iowa (515) 523-2888
Hampton Inn - West Des Moines, Iowa (515) 223-4700
Holiday Inn Hotel and Suites - West Des Moines, Iowa (515) 309-3900

Term & Conditions

Cattle will sell under the suggested Terms and Conditions of the the American Angus Association http://www.angus.org/Pub/suggested_sale_terms.pdf Voss Angus is retaining a 1/3 semen interest in all bulls. Bulls that are not settled for in full within 7 days of the auction are not eligible for free delivery.

Supplemental Information

A supplemental sheet will be available sale day with complete and genomically enhanced information. Announcements from the auction block take precedence over sale book information. All registered lots are AM, NH, CA, M1, D2, DD, OH and OS free unless otherwise noted.

Herd Health

All cattle will be accompanied by proper health certificates for immediate shipment.

Delivery

Voss Angus is offering free delivery on all bulls selling in the sale. We will either deliver the bulls personally or contract suitable trucking to accomplish safe and prompt arrival of your investment. All cattle will be delivered to the buyer within a week or two after the sale unless otherwise negotiated with Voss Angus. Canadian purchases will be available to be picked up at the farm following completion of health testing and delivery arrangements will be the buyer's responsibility. Voss Angus will assist in any way we can. Bulls can be kept at Voss Angus until May 1, 2022.

\$200 discount off total bull invoice, if lots are picked up on sale day.

Trucking

Truckers believed to be reliable will be available to assist you in shipping your purchases.

Livestock Mortality Insurance

Jared Mohnen (605) 682-1368

Dakota Ag

Food And Refreshments

Cattle available for viewing throughout the week! A meal will be served Saturday evening, from 4pm to 6pm. Lunch served on sale day.

Weather Date

Monday, February 28, 2022

Visit the Angus Journal Website, www.angus.org, and view this sale book online. Updated EPDs can be viewed anytime at www.angus.org

COMMENTS FROM OUR SALE MANAGERS:

Plan now to be on hand February 27, 2022 for the Voss Angus Annual Production Sale. It is a pleasure and great opportunity to work with Brent and Teresa Voss and the entire Voss family and crew in the presentation of this power packed sale offering that promises to be a highlight of the 2022 sale season. The extraordinary dedication and commitment to the Angus breed is second to none.

The Voss family focuses on breeding cattle with performance and phenotype backed by pedigrees stacked with generations of predictable quality. The cattle in this sale are bred with the best of the basics in mind. The most dominant cow families in our industry are represented along with breed leading sires of international renown. The concentration of blood from Schaff Angus Valley is monumental.

Plan now to be on hand with us in Dexter, Iowa for this great event. Please don't hesitate to call on us at American Angus Hall of Fame if we can be of assistance in any way.

Sincerely,

Tom Burke

Voss Angus Sale Cattle Nutrition

We are very conscious here at Voss Angus of how we develop these sale cattle for their new owners. Whether you buy a bull or heifer from our sale we want them to be in your herd for a long time. All the bulls and heifers on this sale were started on a high forage diet with Purina Stress Care 5 at weaning time for 14 days. Throughout the developing process we kept both bulls and heifers on a high roughage, lower energy TMR consisting mostly of corn silage and ground hay along the side of a complete Purina mineral program.

We are confident the animals on this sale will go out and perform and do their job for their new owners.

The opportunity of a lifetime!

- This tremendous trio of full-brothers-in-blood are the result of mating the great breeding bull Rito 707 of Ideal 3407 7075 with Voss Blackcap May 4136, the \$50,000 clone of SAV Blackcap May 4136 who was the all-time world record income-producing cow with more than \$10.2 million in progeny sales.
- These bulls have the important distinction of being full-brothers-in blood to the \$110,000 Genex Pathfinder Sire SAV Resource 1441, the \$175,000 Genex Pathfinder Sire SAV Renown 3439 and the \$80,000 Select Sires bull SAV Recharge 3436.
- These bulls are also full-brothers-in-blood to an impressive array of outstanding cows who have served as featured donors at Schaff Angus Valley including SAV Blackcap May 1416, SAV Blackcap May 1420, SAV Blackcap May 1433, SAV Blackcap May 3501 and more.

- A member of the famous Rosetta family sired by the all-time world record-selling bull SAV America 8018.
- The dam is sired by the one-time world record-selling bull SAV Pedigree 4834.
- The grandam is a maternal sister to the Pathfinder Dam SAV Rosetta 7428 who produced the Pathfinder Dam SAV Rosetta 5171 and the Alta Genetics sire SAV Paramount 0115.

COMMERICAL HEIFERS

This year we will be offering 5 sets of commercial heifers in groups of 3.

*The winning bid will have the choice of buying out the remaining lots.
We will sell each remaining set until all 5 sets are sold.*

A total of 15 commercial heifers from Voss Angus will sell.

NEW ARRIVAL at VOSS ANGUS

COLEMAN *Chloe* 9275

\$375,000 half interest for a total valuation of \$750,000.

A very special 2-year-old female who is a full sister to the top selling \$225,000 bull in the 2020 Fall Production Sale at Colemans, Coleman Triumph 9145. This direct daughter of the \$450,000 record selling bull in the state of MT, Coleman Bravo 6313 and back to the foundation Chloe female, Lawson's Chloe C815. This female is a full sister to the \$70,000 top selling female in the 2020 Fall Production Sale, Coleman Chloe 9274. Another full sister to this female was the \$60,000 one-half interest for a \$120,000 top selling heifer calf of the 2019 Production Sale, Coleman Chloe 975.

We are proud to be partnered with Coleman Angus on this amazing female!

NEW ARRIVAL at VOSS ANGUS

MARCYS *Erica* 337

As the top-ranked maternal trait cow in the Marcy program, Marcy's Erica 337 has also had two daughters in production who post a collective progeny weaning ratio of 104. Marcys Scale Crusher, her more-famous full brother, sired the top selling sire group of bulls in the Marcy sales for the past seven years, as well as the record selling sire group of the entire 2021 Angus Sale season through the record setting 2021 SAV Sale. The Pathfinder Dam of this cow balanced a progeny birth ratio of 93 with a progeny weaning ratio of 108 on 10 natural calves and generated more than \$150,000 in progeny sales in the Marcy program where 18 sons averaged \$8,422 - she continued her donor carrier well into old age as Elston Lone Tree Angus. The impressive dimension, power, length of body and length of hip combined with superior structural soundness, feet and legs, and femininity of this great cow complete a package second to none.

SAV EMBLYNETTE 7566

A tremendous blending of the Blackcap May and Emblynette families. She is a Net Worth x EXT. This feminine power house has many big time off spring to her name.. Her most famous would be SAV Emblynette 2369 one of the best to ever walk Schaff Angus Valley. 2369 is the Dam of Bloodline, Ajax, and Emblem and countless invaluable females!

American Angus Association Selection Tools

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Yearling Weight (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Yearling Height (YH), is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

Scrotal Circumference (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Docility (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility in a sire's offspring compared to another sire.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk (Milk), is a predictor of a sire's genetic merit for milk and mothering ability in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Mature Weight (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

FOOT SCORE

Claw Set (Claw), is expressed in units of claw-set score. A lower EPD is more favorable, indicating a sire will produce progeny with more ideal claw set, which is toes that are symmetrical, even and appropriately spaced.

Foot Angle (Angle), is expressed in units of foot-angle score. A lower EPD is more favorable, indicating a sire will produce progeny with more ideal foot angle, which is a 45-degree angle at the pastern joint with appropriate toe length and heel depth.

CARCASS

The genetic evaluation produces a single set of EPDs for carcass traits where the units of measure are in trait format and analyzed on an age-constant basis.

Carcass Weight (CW), expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling (Marb), is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value Indexes, reported in dollars per head, are multi-trait selection indexes where a higher value suggests more profit. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal Weaned Calf Value (\$M), expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W), expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. Increased selection pressure on \$W increases weaning and maternal milk traits while increasing mature cow size.

Cow Energy Value (\$EN), expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals. Components for computing \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

Feedlot Value (\$F), expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

Grid Value (\$G), expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), expressed in dollars per carcass, represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase, and market these animals on a quality-based carcass grid.
