DEXTER, IOWA**

Welcome to Voss Angus!

Dear Angus Friends,

First and foremost, we would like to extend a huge thank you to everyone who showed interest in our 2022 Production Sale. We truly appreciate your business and confidence in our program, and we cherish the friendships we have created with each and every one of you. We truly believe that the people we have met on this journey are some of the finest people you could find anywhere.

We would like to personally invite you to our 8th Annual Production Sale on Sunday, February 26, 2023. We look forward to having you view this offering, which will contain some of the best genetics available in North America. There will be progeny by Scale House, Scale Crusher, Landmark, America, Resource, Bloodline, Quarterback, Pancho Villa, Renovation and many more. We are building this program with some of the most elite female families in the industry and with multiple cows having Pathfinder status. Some of these cow families include Blackcap May, Madam Pride, Emblenette, Donna and Elba, to name a few. This program focuses on maternal traits such as phenotype, udder quality, feet and fleshing ability that will stand the test of time. Let's not forget that longevity and fertility are equally important traits in our program, as well.

This group of sale animals was developed on a notably sensible roughage diet to enhance longevity, fertility and easy-fleshing ability. This diet has been developed to express the highest genetic potential out of these high-powered generational bloodlines. The best nutritional diet ever at Voss Angus! We look forward to seeing you on sale day. Please feel free to reach out to me or anyone on our team regarding our program or animals offered in this production sale.

Again, thank you for your past and future business and ongoing support.

God Bless,
Brent and Teresa Voss

COMMENTS FROM OUR SALE MANAGERS:

Plan now to be on hand February 26, 2023 for the Voss Angus Annual Production Sale. It is a pleasure and great opportunity to work with Brent and Teresa Voss and the entire Voss family and crew in the presentation of this power packed sale offering that promises to be a highlight of the 2023 sale season. The extraordinary dedication and commitment to the Angus breed is second to none.

The Voss family focuses on breeding cattle with performance and phenotype backed by pedigrees stacked with generations of predictable quality. The cattle in this sale are bred with the best of the basics in mind. The most dominant cow families in our industry are represented along with breed leading sires of international renown. The concentration of blood from Schaff Angus Valley is monumental.

Plan now to be on hand with us in Dexter, Iowa for this great event. Please don't hesitate to call on us at American Angus Hall of Fame if we can be of assistance in any way.

Sincerely,

Tom Burke

NUTRITION PROGRAM

Overview

Welcome to the Voss Angus Annual Bull & Female Sale. I think you will agree that the Voss family and crew have put together an excellent set of Angus bulls and females for your consideration. As the consulting nutritionist, I strive to develop optimal nutrition and management programs to match and express the genetic potential of the cattle while giving special attention to safeguarding soundness and reproductive longevity.

Nutritional Philosophy

The nutritional treatment of breeding stock from conception to breeding can have a profound effect on their lifetime potential. Nutritional influences on future health and productivity have been traced as far back as early embryonic development; a concept termed "fetal programming". That is why we focus not only on the nutrient requirements of the cow throughout her life cycle, but also the nutritional factors that affect gene expression of economically important traits in the developing calf. From conception to turnout, we focus on expressing the genetic potential of the cattle without compromising structural soundness and breeding performance.

Bull and Heifer Development

We believe in the concept of developing cattle, not finishing them. To properly develop breeding stock, we pay special attention to their energy, protein, trace mineral, and vitamin requirements. The bulls and heifers were developed on high-roughage, low to moderate-energy, high-protein diets. Particular attention was given to optimal vitamin and trace mineral supplementation to promote proper reproductive development and ensure reproductive longevity. We think that you will agree that our nutritional philosophy has produced an exceptional set of fertile Angus breeding bulls and females that are ready to go to work for you. Buy with confidence.
