*All bred heifers will be guaranteed to be safe in calf.*

### SEMEN & TRICH TESTS

*All bulls will be Semen & Trich tested.*

### HEALTH PAPERS

*All cattle sell with proper interstate health papers.*

### ONLINE BIDDING

**This sale will be broadcast live on the internet.**

**DVAuction**  
*Broadcasting Real-Time Auctions*

Real time bidding & proxy bidding available.

### FELLOW CATTLEMEN,

*We welcome you to Bradley Cattle's Annual Bred Heifer and Bull Sale. We feel that this year's set of cattle offer as much value to the cattleman as any that Bruce has put together. Bruce's reputation for producing and selling fault free, low maintenance cattle that return profits for the buyer is evident in this set. As always Bruce has put these cattle through the paces to remove all the guess work for you. All the heifers will sell bred, pelvic measured and with strong pedigrees stemming from some of the best cow families in the country. The bulls will be fed for longevity and ready to go to work for you. If any of the sale staff or consultants can be of assistance, please feel free to reach out to us.*

# Charolais HERD SIREs

## CHAROLAIS AVERAGE BREED EPDs

**CE: Calving Ease** A higher value indicates greater calving ease

**BW: Birth Weight** A lower value indicates the difference in average birth weight

**WWT: Weaning Weight** The expected difference in average weaning weight of calves

**YWT: Yearling Weight** The expected difference in average yearling weight of progeny

**Milk: Maternal Milk** The genetic ability to express pounds of weight through dam's milk

**MCE: Calving Ease Maternal** A higher value indicates greater calving ease with a sire's daughters

**MTNL: Total Maternal** A value to predict weaning weight due to genetics for growth & maternal ability

**SCRO: Scrotal Circumference** The expected difference of bull's in circumference at yearling

**CW: Carcass Weight** Expressed in pounds and is a predictor of hot carcass weight at age constant endpoint

**REA: Ribeye Area** Expressed in square inches and results in larger ribeye's and lower yield grades

**FAT: Fat Thickness** Expressed in inches, decreased fat should result in lower yield grades

**MARB: Marbling Score** A primary component of USDA Quality grade, selection for increased Marbling Score should result in cattle with higher quality grades at the same age endpoints

**TSI: Terminal Sire Index** Is a formal method of combing many EPD traits into one single value. The TSI represents a dollar index per terminal progeny produced, ranking them for profit potential. Example: If Sire A's index is \$191.00 and Sire B's index is \$200.00, then we would expect Sire B's offspring to average \$9.00 more net return than Sire A's offspring

**HB – HerdBuilder** is a maternally focused selection index that predicts the probability of developing profitable cowherd traits while maximizing the value of marketed progeny. Expressed as dollars per cow exposure, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained, and all remaining progeny are marketed on a quality based carcass grid. (Index/High Value)

**GM – GridMaster** is a terminally focused selection index that predicts the probability to increase the value of marketed calves. GM places selection pressure on growth, feedyard performance and carcass quality, predicting differences in profit as expressed per cow exposure. GM is calculated based on the scenario that bulls are mated to cows only, and all progeny are marketed on a quality-based carcass grid. (Index/High Value)

**CED – Calving Ease Direct** predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

**BW – Birth Weight** predicts differences in actual birth weight of progeny. (Pounds/Low Value)

**WW – Weaning Weight** predicts differences in 205-day weaning weight. (Pounds/High Value)

**YW – Yearling Weight** predicts differences in 365-day yearling weight. (Pounds/High Value)

**ADG – Average Daily Gain** predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

**MILK – Milk** predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

**CEM – Calving Ease Maternal** predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

**STAY – Stayability** predicts differences in the ability of an animal's retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

**MARB – Marbling** predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

**YG – Yield Grade** predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

**CW – Carcass Weight** predicts differences in actual hot carcass weight. (Pounds/High Value)

**REA – Ribeye Area** predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

**FAT – Fat** predicts differences in the depth of backfat measured between the 12th and 13th ribs.
