Bid at [www.rrmarketplace.com](http://www.rrmarketplace.com)

Here at Buck Ridge Cattle Company, we have been extremely blessed in 2016. We produced an awesome set of new calves, we added a nice group of Angus females to our breeding program, and a wonderful young lady, Jenna, became an official member of the Buck Ridge family. Logan and Jenna wed on September 24, 2016.

At Buck Ridge, we are passionate about raising the best cattle possible. We strive to create genetics that will offer exceptional EPD's, curve-bending performance, and package them into a sound, functional animal that will work in any operation. This philosophy is the driving force in our vision of success. We believe this set of sale animals epitomizes our philosophy and hope you can find something to suit your herd's needs.

Buck Ridge greatly appreciates those of you that have invested in our program and our genetics in the past. We look forward to new relations with many other breeders who like us are proud to have this great breed of cattle roaming their pastures. If you have any questions regarding the sale cattle or the Buck Ridge program, please feel free to call, text, or email. We always enjoy having visitors at the farm where we can show the cattle we work so hard to produce.

Sincerely,

Mark Haden

Breeding season is right around the corner and you will want this one going out the gate with cows on first day! Long sided, long-spined and huge footed! This herd sire is going to cover some serious ground and leave a significant impact on your program going forward. HBRL Cross Hair 554C is a major player when it comes to growth and performance, 127 for YW ranks him amongst the breed's top 3% and in the WW ranks in the top 1%. In terms of carcass data, 554C is in the top 10% for CW and top 10% for MB, thus calculating out to an MTI of 70.69 which places him in the top 3%. Sired by MAGS Zodiac who has stamped these bulls from coast to coast with significant growth and a tremendous build for longevity, Cross Hair's dam is a maternal sister to the A.I. sire, HBRL Youngblood 189Y, both are outstanding progeny of AUTO Toya 233T.

EBFL Ypsilanti 420Y sons have excelled in terms of balanced traits for us here at Buck Ridge, HBRL Certified 556C is no exception. At 0.5 for BW and 109 for YW, we certainly appreciate his future ability to sire calves that will hit the ground stress-free and offer enough growth for profit potential. 556C is out of one of our highest MTI females here at the farm, and he, himself is in the top 10% for MTI. When you study this individual in person, you can help but be intrigued by his exceptional top shape, ideal designed through his hip and the amount of muscle he carries through his hind quarter. Scan-wise, he ratio'd 108 for IMF and followed suit of his EPD predictors. 556C is an exceptional 50% Lim-Flex sire who brings the best of both breeds to the table.

A direct son of our foundation donor, AUTO Exceptional who is a homozygous polled and homozygous black purebred who we have sampled successfully to a range of bulls from Angus to Purebred Limousin and she never misses. HBRL Crocket 578C is a homozygous black and homozygous polled son of WULFS Zane, who has sired many sale topers the past two years for producers nationwide. 578C has continuously gotten better each day and we are very pleased with the overall quality that he possesses and we are proud to offer him for public appraisal. In terms of ultrasound data, 578C scanned 13.46 REA and ratio'd 115 for IMF. Many maternal sibs sold last year in the spring and were received overwhelming response and have gone on to do great things for their new owners. We always enjoy hearing from those who have invested in AUTO Exceptional progeny, she never lets us down.

This particular individual intrigues us in so many ways, he is a calving ease specialist with tremendous predicted and actual IMF numbers, yet doesn't sacrifice growth. There are many scenarios where he would be absolutely ideal and compliment nearly any mating decision. HBRL Drake 601D is homozygous black and homozygous polled and has exceptional potential for injecting much needed traits into both commercial and purebred herds. 601D has the great outline and extension of his sire, MAGS Winston, who is now deceased and semen is unavailable. Here is one of the rare opportunities to acquire a direct son of Winston out of Magness bred donor, MAGS Uvalda. In terms of specific data, he is a 12 CED, 109 YW, 68 MTI and .50 MB which ranks him in the top 4% for MB and top 5% for \$MTI.

HBRL Dark Knight 603D is one of our favorites of the 2016 calf crop, this MAGS Winston son is a good as they come when considering data, phenotype and pedigree combinations. 603D's genomically enhanced EPD's read exceptional and give you addition peace of mind as a buyer. He spreads from a 17 CED to 116 YW, while still ranking in the top 10% for Milk and marbling. Dark Knight has an immense amount of internal capacity, is ultra sound footed and carries a tremendous amount of muscle throughout. If you are looking to take your program to the next level with the additional accuracy of GeEPD's and with a proven pedigree, HBRL Dark Knight 603D certainly is a legitimate option for you. It's hard to find one with this soft look, sound structure yet loaded with muscle and dimension.

Retaining 50% Semen Interest.

<b>BW</b> 82 lbs.	<b>Adj. FAT</b> 0.37
<b>Adj. WW</b> 793 lbs.	<b>Adj. REA</b> 16.24
<b>Adj. YW</b> 1,281 lbs.	<b>%IMF</b> 5.095

HBRL Derek 604D is doing "exactly what he was planned to," his predicted data and actual performance have gone hand in hand and he has never let us down. His 82 lb birthweight was ideal, he weaned at 793 lbs and posted nearly a 1,300 lb yearling weight; then on scan day he was one of our leading IMF bulls with a score of 5.095. It's bulls like this that make it fun to go to the barn every day. 604D is homozygous polled and homozygous black and looks the part on paper and in the pasture, he is extremely eye appealing, blends from front to back as well as any and reaches off of both ends of his skeleton with tremendous athleticism. After several exceptional natural calves out of MAGS Unibrow, we decided to flush her, and aren't we glad we did! We look forward to future progeny out of her if they all look like this!

We have had the privilege and honor to be able to raise progeny out of both the famous donor EXLR 199H and her daughter MAGS Unibrow, both are once-in-a-lifetime females who have made such a tremendous impact on our program. When we have an opportunity to offer their progeny for public appraisal, we do it with a great deal of pride. HBRL Dynamite 610D is no exception! Homozygous polled and homozygous black with double digit CED and 116 YW, makes him all-purpose sire with a pedigree consisting of the very elite in the Lim-Flex population. This MAGS Wazowski son also records an impressive 74 TM epd! Study his actual numbers and you will see how closely they match his GeEpd's, they prove two things; 1. That sometimes things go how they are supposed to in the cattle business and 2. That investing in 610D is about as close to a sure bet that you will be able to find this bull sale season.

This full brother in blood to the \$120,000 valued EBFL Ypsilanti is a calving ease, maternal and carcass specialist! If you are looking for a sire to lower birthweight, increase milk and improve carcass traits, this TC Aberdeen 759 son is the answer. He is double digit CED, negative for BW, in the top 15% for milk and uniquely combines REA and MB. Scanning a 19" REA ranks him in the top 4% for REA and top 15 for MB. Don't miss this rare opportunity to invest in such an exclusive and highly marketable package. HBRL Draft 612 ET is ultra-attractive on the profile and balances up as well as any. 612D has the actual numbers that we aim for here at the farm, 77 lb BW, 800 lb WW and 1,300 lb YW.

Anytime a first calf heifer lands a bull in our highly selective bull sale, she gets a circle, check and underline near her name in the calving book! Though, in this case we shouldn't have been surprised, HBRL Bijou is a Connealy Consensus 7229 out of our foundation donor, AUTO Exceptional 282S, we should have known that she was destined to be a great producer for us. HBRL Dandy 614D is just that, he is a dandy on paper and in person. He is shaped through his front third like a calving ease sire, long fronted and smooth shouldered, however he still has enough capacity and power to make him appealing to even the most discriminating of customers. 614D impressive ranks in the top 10% or better for CED, YW, MB, CW and SMTI.

Due 9.14.17 to HBRL Cross Hair 554C

We used SAV Bruiser on a limited basis as a young sire, but would have used him more if we knew they were all going to look like this! Bruiser currently is the #1 sire for total profit and feed efficiency index through the Angus Sire Alliance, yet in our case he has produced some knockdown good females that we are so proud to have raised! HBRL Catnip, is simply put, a "power cow" in the making. Her dimensions from the bottom side of her skeleton all the way up through her top is unreal, and her mass and volume through her middle is obvious. You get behind this one and she will blow you away with her power through her hip. Data-wise, she is one of the most balanced females we have ever offered for public appraisal; she ranks in the top 20% or better for nearly every economically important trait. 553C is one that someday could become a household name in the Limousin breed, she is that good.

If this one wasn't an August 24th calf, she would be one that is good enough to put a halter on and hit the show road with. She is super attractive through her front end, her neck ties in high at the top of her shoulder and has an ideal shape to her top. You analyze her through the middle portion of her body and you can't help be impressed by her depth and spring of rib. Then in motion, she is as fluid and athletic as you can make one. She is a true gem phenotypically and a total rock star in terms of her EPD profile as well. Superbly balanced data set with highlights in the YW and REA categories.

Due 8.24.17 to EXAR Denver 2002B

Gaze in awe at the look this purebred females gives you from the profile! You can't draw an outline of one any more ideal. This direct daughter of AUTO Exceptional 282S is a maternal sister to so many of the great ones that have been born here and have gone through our sales. We challenged you to find many that are made this good, yet are in the top 10% of the breed for MB and \$MTI. When you study 570C's pedigree, it becomes apparent that she is truly a Crown Jewel who is royally bred, and then you notice that she is safe in calf to EXAR Denver 2002B and your heart really starts beating! Oh, the possibilities ...

Buck Ridge is reserving the right to one flush on HBRL 570C at Four Corners Embryo Transplant. Expenses paid by Buck Ridge. Buck Ridge retains all embryos produced.

<b>Adj. YW</b> 945 lbs.	<b>%IMF</b> 4.695

Due 8.24.17 to EXAR Denver 2002B

This flush mate to Lot 13, has many of the same physical attributes yet records a slight advantage in terms of scan data. Both of them are well above average, however 574B reads with a 12.92 REA and 4.695 IMF, which ratio'd out to be 107 for REA and 115 for IMF. HBRL Cinnamon Roll 574C's sire, MAGS Wazowski was destined for greatness from conception, he is a direct son of BOHI Red Robin and sired by the many time sire of the year, DHVO Deuce. He hasn't gotten by on pedigree alone though, he has gone on to prove himself as a sire and has produced some of the most sought after offspring in herds that focus both on commercial traits and show ring appeal. 574C is the type of female that can certainly go out and raise your next herd sire without doubt.

Buck Ridge is reserving the right to one flush on HBRL 574C at Four Corners Embryo Transplant. Expenses paid by Buck Ridge. Buck Ridge retains all embryos produced.

Bred in the highly reputable P Bar S program in Sand Spring, OK, HBRL Dancer 606D is the result of mating MAGS Universal Time with the time tested LH U Haul. For nearly a decade now, U Haul has been producing leading herd sires, foundation donors and show ring winners; the daughters are so very functional and the sons are stout enough to work in every environment. 606D has a soft sweep to her mid-rib, is flat shouldered and cool topped. We envision her doing great things as she matures. She is homozygous polled/homozygous black and on the desirable side of average for all calving ease, growth and maternal traits, thus making her flexible in terms of mating options. 606D scanned an incredible 6.38 IMF as predicted by her Top 1%, 0.93 MB and Top 1%, 83.75 MTL.

MAGS Ali has all the makings to be one of the best ever, he ties together everything the industry has been looking for in a Lim-Flex sire and we are so pleased that we had the opportunity to use him and produce cattle that look like this. We aren't in the business of specifically producing show cattle, but juniors don't overlook this one. She has such an arrogant appeal to her, this up-headed, straight lined, nicely balanced heifer has a killer profile and the dimension to match it. But, the perks don't stop at here picture perfect design, study her data profile and she is a rock star in terms of growth, milk and marbling and is a trait leader for SMTI! This is one that needs to have 5 stars next her name for any serious Lim-Flex enthusiast.

Buck Ridge is reserving the right to one flush on HBRL 607D at Four Corners Embryo Transplant. Expenses paid by Buck Ridge. Buck Ridge retains all embryos produced.

HBRL Delta Dawn has a pedigree that should resonate with any Limousin enthusiast, the quality and power is stacked generation on top of generation in her lineage. The Anchor daughters and sons that we have had an opportunity to be around are extremely high quality, cowman's kind of stock. They are fault-free, low maintenance and have the type of structure that reads with longevity and functionality. SBLX Zero Out, dam of 608D is a daughter of the world renown MAGS Manuela by the Angus legend SAV Brilliance, which makes her a full sister to so many superb females that are now serving as foundation females in leading programs across the land. 1.8 BW to 112 YW adds further to the appeal of this female.

Here is a homozygous polled and homozygous black LH Rodemaster daughter who has done a lot of things right so far and we suspect she will continue to do so. Her actual data is nearly ideal for many producers, 74 lb BW, 650 WW, 1,075 lb YW, 14.73 REA and 4.40 IMF score and docile. This growth oriented heifer has an extended skeleton, is fresh and youthful in her appearance and traces back to the MAGS Manuela who will go down in history as one of the most prolific females in the history of the Limousin breed.

AUTO Cruze 132X, sire of Lot 19 embryos.

It is always exciting when we can offer embryos out of our foundation donor, AUTO Exceptional 282S. Exceptional is a top homozygous polled and homozygous black purebred female, sired by JCL Lodestar 27L at Buck Ridge. Studying the progeny list of Exceptional, you will see that she consistently produces some of our top cattle who highlight our sales. Sired by one of the breed's hottest bulls at the moment, AUTO Cruze 132X. His semen is not on the open market, however when it has been offered, it has fetched very prominent figures and rightfully so. He is a son of MAGS The General.

**AUTO Exceptional 282S, dam of Lot 19 & 20 embryos.**

No other Angus bull can match Prophet's combination of CED, extra growth and extraordinary marbling, he seemed like a logical choice to flush AUTO Exceptional to in order to reach an optimal performance profile. These embryos would result in breed changing genetic profiles that would be appealing to the most selective of performance producers. Each year we sell a limited number of high quality cattle, as you flip through our sale catalogs you will notice that consistently, AUTO Exceptional progeny are among our top sellers and most sought after lots.
