TERMS & CONDITIONS -

Terms of the sale are cash unless satisfactory credit arrangements have been made prior to the sale. A representative will be on hand sale day if your wishes are to insure your purchases. Please note: The sale manager is only an agent for the seller and has no responsibility other than those involved in conducting the sale. All persons who attend the sale do so at their own risk. Neither the sale manager nor Liberty Ranch assume liability, legal or otherwise, for any accidents which may occur.

SALE ORDER & SUPPLEMENTAL INFORMATION -

Sale order and supplemental information will be posted at www.RRMktg.com for your convenience on Friday evening, February 10th.

TRUCKING -

Free delivery on Central Locations. Liberty Ranch offers its customers free delivery to anywhere in the lower 48 states. As a part of that delivery we work with reputable livestock transportation companies that we feel comfortable with the handling of your cattle in both a professional and conscientious way. Liberty Ranch will do everything possible to deliver your cattle to a central location that is convenient for both you and the trucking company. Central locations for delivery will include auction barns, vet clinics and ranches that offer to serve as a delivery point. We will map out the route after the sale and do our best to get your bulls to you as quickly and conveniently as possible. If you would like to insure your cattle, you can do so on sale day. Most of the cattle will be delivered within 30 days following the sale. If you have questions on delivery then please call the Liberty Ranch office at 785.885.4881.

REBATE -

We will also be offering a \$50 PER HEAD REBATE for customers that arrange to pick up their bulls here at the sale location or within one week of the sale.

PAYMENT -

Cattle must be paid for at the time of the sale unless prior arrangements are made with sale management at the time of the sale at 615.330.2735.

Roger Comeau and Family along with myself, Debbie, Cole and Jonah would like to welcome everyone to our annual Limousin, Lim-Flex sale.

This year's sale will be 2.11.17 with our annual Liberty Ranch Customer Appreciation Supper and Social taking place on Friday evening 2.10.16 at 7 p.m. at the Knights of Columbus in Plainville, KS. We urge you to come join us for a Limousin steak, refreshment of your liking and most important fellowship amongst new and old friends. Lets celebrate together all that our breed has to offer the industry and people that make a living in the cattle business.

Since the inception of Liberty Ranch we have been able to work closely with noted cattlemen around the country and have realized their main goals and demands on their programs to make it more profitable. In doing so it has aided us in keeping grounded as to what kind of cattle to produce and what will be in demand. We think we have met this goal with this strong set of sale cattle.

Thirty-three years ago Liberty Ranch was established as a seedstock producer and propagator of registered Limousin cattle. The main goal was to create a product that would be accepted by serious cattlemen and purebred breeders alike. Since the inception Liberty Ranch has evolved to ranking in the top 10 list of the most cattle registered in the Limousin breed. Liberty Ranch encompasses over 20,000 acres of land and we continue to grow as necessary. We consider everyone that works at Liberty Ranch to be a part of our family and for sure approach every endeavor as a team. We know that putting on a sale of this size it takes a lot of time and dedication and we appreciate everyone involved in making this come to fruition. Our number one focus at Liberty Ranch is to make sure we take care of the customers. Without our long list of dedicated customers and new clients coming on at a very steady pace we would not be what we are today. This year we are offering over 130 head of beef bulls. We will offer for sale the stoutest set of BEEF BULLS ever assembled at Liberty Ranch. They are coming two years that are ready to work and add pounds and performance to your calf crop.

Best Regards,
Michael L. Smith, Manager
Liberty Ranch

In an attempt to bring our customers the very best service, product and added growth we have joined forces with one of the Nation's prominent Seedstock Producers Lonely Valley Seedstock of Creston, NE. The Settje Family has joined forces with Liberty Ranch to mesh two prominent firms with the end result being one of the nations largest bull suppliers. For 30 plus years Lonely Valley just like Liberty Ranch has built their family operation on customer service and product.

We refer to MAGS Unreal around here, as the "options bull" who ties together so many impressive physical traits, especially for a calving ease sire. If you ever have an opportunity to see him in person, you will be blown away by his mass and substance. When you study him on paper, his CED epd puts him in the top 2% of the breed and his DOC score makes him a trait leader in the particular column. In addition to his exceptionally balance statistical alignment and phenotypic power, Unreal is direct son of two proven producers in the Purebred Limousin population. His sons replicate his look, calving ease traits and functionality year in and year out.

This Purebred Limousin bull has proven his worth at Liberty Ranch. He is a son of MAGS Unreal the all-time great herd sire to ever hit the soil at Liberty Ranch. MAGS Unreal is the big numbered son of the multiple trait-leading AUTO Dollar General 122R and from the famed donor MAGS Passion Flower. RRDC Zamba 3304 was selected as one of the many herd sires to influence the Liberty Ranch females.

It has been a real treat to have RRDC Zarka 3010Z in our herd bull arsenal the past two years as a CED specialist. Perfectly designed to use on heifers effectively with a 14 CED EPD. Maternally he traced back to an exceptional Red Angus female who's progeny are consistent producers and have proven time and time again that they thrive in our western range conditions. A son of MAGS Unreal who excels for CED and DOC.

We have retained numerous COLE Pistol daughters in our system due to their ability to perform well ad brood cows here at Liberty Ranches, year after year they produce some of our top replacement females and herd sire prospects, such as RRDC Zane 3015Z. Zane is a standout CED purebred sire by MAGS Unreal, our lead off herd sire for the past several years. On milk and pasture alone, Zane recorded an actual weaning weight of 745 lbs.

**YOUR TRUSTED SOURCE FOR
 33 YEARS AND COUNTING!**

Atlas was our top selection out of the elite offering from the Wieczorek program, this HOMO polled Red A.I. sire that is featured in the Grassroots line-up, is certainly one that has a dynamic performance profile and intriguing phenotype. His fleshing ability, softness through his mid-rib and outcross pedigree will have a significant impact on our herd. Study the maternal attributes that he brings to the table and you can't help but be impressed.

MAGS Apply The Soap, was selected to be anything but a clean-up bull! We had brought him to Kansas with great anticipation that he would transmit his statistical and proven actual growth into our system. On paper, he reads with a 77 WW epd and 126 YW epd, which ranks him in the top 10 and 3% of the breed respectively. In addition to the additional lbs of performance, we also tapped into his maternal and carcass strengths; he ranks in top 4% for TM and 1% for MB and SMTI. He is one of the very elite sons of the now deceased MAGS Winston.

MAGS Xtra Wet is the epitome of what a great purebred Limousin bull should be like. He is a purebred son of the national champion bull DHVO Deuce 132R and from a daughter of the now deceased legend JCL Lodestar 27L. His first progeny to sell at public auction are highlighted in this sale and they are true highlights. The biggest attribute of MAGS Xtra Wet is his heaviness of bone and extreme foot size and as we know in any breed of cattle that is the far most important trait. If they are good from the ground up then all is good.

MAGS Wild Bunch has been a top A.I. sire in our breed and is one of the top sires in the pasture at Liberty Ranch. He is a complete outcross to most established lines of black and polled cattle. His dam is a past national show champion and his numbers are well above breed average. His sons selling in this sale represent his lineage very well and are some of the best in their contemporary groups. Wild Bunch is one of our very top growth bulls, he posts an 82 WW EPD and 119 YW EPD, he also had an adjusted yearling weight of 1,399 pounds.

In the beef business we need calves who aren't going to go off the clock after weaning and are going to keep going strong until their end point, hence why we invest in herd sires such as LH After Hours 019A. Talk about posting numbers from beginning to end; 74 pound BW, 751 Adj. WW, 1,476 Adj. YW and an adjust IMF of 4.22! With the generation of performance sires in his pedigree, we confidently used him heavily this year to add pounds to our calf crop. Homozygous polled and homozygous black.

The facts speak for themselves when you study the pedigree and performance profile of LH Zip Around 146Z. Zip Around's growth numbers are particularly impressive as they are generations deep on both sides of his pedigree. He, his sire and his dam all rank in the top 10% or better for both WW and YW epd as well as being in the top 25% or better for MA and top 20% for SMTI. This LH Rodemaster son, is homozygous polled and homozygous black in addition to have a stacked data set; his combination of so many desirable traits make him a "go-to" sire for us.

MDCS Yahoo 10Y is one of the service sires for Liberty Ranch. This black and polled son of MAGS Seymour is from a daughter of GV Polled Liberty. Seymour is a son of the once all time top selling national sale bull EXLR New Generation 071M. Yahoo continues to amaze the quality conscious cattleman with his sons as they are the heavy muscled and powerfully made beef bulls compared to other sire groups.

LH Xcel Boy 113X is a double homozygous son of LH Rodemaster 338R that has done a tremendous job at Liberty Ranch. He has earned a -0.2 for birth and 117 for yearling weight. He is a 75% Lim-Flex bull that scanned a 15.16 for REA and 3.53 for IMF. His actual performance was 15.16 for REA and 3.53 for IMF. He projects this positive performance into offspring which makes them more in demand.

Check out the "go" in this guy's performance profile, when pounds matter Albert is the answer! He is knocking on the door of the trait leaders in the breed for YW epd and in the top 10% for WW and TM. This balanced trait sire, JCL Lodestar is a high percentage Purebred out of one of our top MAGS Unreal daughters.

3002A is one of the great spread bulls in our herd bull line-up with a spread of 12 CED up to 109 for YW epd. He offers this much explosive growth in addition solid, above average numbers for TM, ST and DOC. This combination of JCL Lodestar back on our MAGS Unreal daughters has worked well for us and we know the cattle work good in our environment, so we will continue to use them fairly heavily.

Straight out of the Coleman program came the genetically rare and clean son of GAR Precision 1680, Coleman Production 608 who was ultimately integrated into the Harley Coleman Lim-Flex program. RRDC Almost 403A reaches back in his pedigree and grabs the influence of such Angus and Limousin breed greats such as Leachman Right Time and JCL Lodestar 27L. 403A isn't extreme in any measures, but comfortable sits above average for all calving ease, growth and maternal traits.

We have identified that 3007A is a simple solution for getting extra hours of sleep during calving season and capturing extra dollars on terminal progeny. This JCL Lodestar son of a leading Red Angus female, is a 13 for CED and -0.7 for BW, and congruently is in the top 5% of the breed for marbling. 3007A is homozygous polled and came off his impressive dam at 734 lbs on milk and grass alone.

As a serious cattle producer, have you ever looked at a pedigree and thought to yourself, "Hmmm, this could really work and is really intriguing?" Study 3001A's lineage and you will find top Red Angus, Black Angus, and Fullblood Limousin genetics. The very same genetics that have helped shaped their respective breed/sector. A great grandson of the time less and time tested EXLR New Generation 071M.

The second maternal dam of 3003A is a perfect example of the type of cows that are welcomed here at Liberty Ranches, at 10 she was still producing and calving on a 365 day calving interval with minimum maintenance requirements. We hope that his progeny will have the same economically positive track record for our customers and us alike. A direct son of JCL Lodestar, the balanced trait sire who is known worldwide.

Broadway was integrated into our herd bull battery as an outcross sire for us, he is a direct son of the \$MTI Trait leader, EXLR Barb 170R who has worked extensively in the Edwards Land and Cattle, Sugar Bush and Pinegar programs. Flushmates to Broadway by MAGS Wazowski can be found from coast to coast and working in a variety of management scenarios. Notably, Broadway ranks in the top 2% of the breed for marbling and \$MTI.

Xerophthalmia is a maternal brother to MAGS Yoko, the past Denver Champion and dam of the popular MAGS Ali. He is a 75% Lim-Flex, homozygous polled son of DHVO Deuce and we absolutely love him statistically from weaning to yearling and for the maternal traits he is passing on. He had a notable start with an actual BW of 60 pounds and adj. WW of 804 pounds. Phenotypically he is extremely powerful in his skeletal construction and sound enough to cover a lot of ground for many years.

42X is our herd sire that we utilize to incorporate some of the very best genetics of the past in a more docile, easier calving and better grading package. When you critical scour over 42X's pedigree you will notice several of the all-time greats such as, LVLS Secret Weapon, JCL Lodestar, AUTO Black Dakota and several standout females from the historic and highly promoted Cane Ridge program. Please notice his 755 weaning weight, a true standout in that calf crop.

0302 is our Purebred Angus herd sire who is absolutely spectacular and predictable for marbling, he, his sire and his dam all convert over to the top 1% for both MB epd and SMTI. His pedigree is one of those coveted, magical matings between Mytty In Focus and GAR Predestined which has produced so many of the leading Angus cattle in the country.

MAGS Seymour is homozygous polled and is a direct son of past national champion EXLR New Generation 0721M. He posted a 783 pounds adjust WW and 1,357 pound adjusted yearling weight and scanned a 14.7 for REA and 3.46 for IMF. His dam is out of the prestigious Twin Eagles Angus program that was home to some of the very finest Angus genetics available in the industry.

With three generation of the RRDC prefix evident into 3004Z's pedigree, we are particularly proud of this young purebred sire. Weaning off of his dam at and ADJ weight of 722 lbs., Zamba has continuously impressed us individually and through his progeny who come easy and hit the ground running.

Here is a guide to understanding the whole herd report. Utilize this tool to determine an animals horned/polled and color status, performance and carcass EPDs. Refer to the breed averages under the 'Genetics & Performance' tab on the NALF web site to familiarize yourself with the breed EPDs. Evaluating breed averages and percentiles will allow you to narrow down your bull selection. NALF has a useful tool on its website called the "Sire Selector," which allows you to search for sire prospects based on your own selection criteria and benchmarks.

1 TATTOO identification number along with a herd prefix typically located in the upper or center rib of the ear

2 SEX of animal indicated by M for Males, F for Females, S for Steers.

3 PLD - Polled Status of the animal with P denoting a polled animal

4 BLK - Black color status of the animal with B denoting a black animal

5 CED - Calving Ease Direct EPD and accuracy. When sires A and B are bred to similar replacement heifers, you'd expect 5 percent (the difference between +10% and +5%) more of sire A's calves to be born unassisted as compared to sire B's calves. Said another way, due to genes for calving ease passed on from the sires to their calves, each of sire A's calves out of first-calf heifers have a 5 percent greater chance of being born unassisted as compared to sire B's calves.

6 BW - Birth Weight EPD and accuracy. When mated to equal dams, progeny of sire A (listed above) are expected to weigh 4.0 lbs. less at birth than progeny of sire B (-1.0 - 3.0), due to genes for birth weight passed on from the sires.

7 WW - Weaning Weight EPD and accuracy. Weaning weight EPDs are predictors of pre-weaning growth of progeny. Of the two sires represented above, progeny of sire A are expected to weigh 6 lbs. less than progeny of sire B (44-38) at 205 days of age (when bred to dams of equal value), due to genes inherited for pre-weaning growth from the sires.

8 YW - Yearling Weight EPD and accuracy. Yearling weight EPDs are predictors of progeny growth to yearling ages. For example, progeny of sire A are expected to weigh 20 lbs. less (92-72) than progeny of sire B at 365 days of age (when mated to equal dams), due to genes for growth from the sires.

9 MA - Milking Ability EPD, and accuracy. Milk EPDs are predictors of pounds of daughters' progeny weaning weight due to genes for milk the daughters inherit from the parent in question. For example, daughters of sire A are expected to wean calves which are 7 lbs. heavier than calves from daughters of sire B (30 - 23 lbs.), due to genes for milk passed on to daughters.

10 CEM - Calving Ease Maternal EPD and accuracy. When daughters of sires A and B are bred to similar bulls, daughters of sire A have a 4 percent (14% -10%) greater chance

of calving unassisted with their first calf as compared to daughters of sire B, due to differences in genes the daughters inherited from their sires for easy delivery of their first calves.

11 SC - Scrotal Circumference EPD, and accuracy. Scrotal EPDs are expressed in centimeters (cm), with higher values indicating the expectation of genes for larger average yearling scrotal circumferences to be passed on to sons. If mated to equal dams, sire B would be expected to produce sons which average 1.0 cm larger (1.0 - 0) than the average of sons of sire A. Scrotal circumference has also been correlated to the age of puberty in heifers

12 ST - Stayability EPD and accuracy. Stayability EPDs predict genetic differences in the probability that daughters will produce calves at the age of six years or beyond, given that at least one calf was produced prior to the age of six. Generally, higher stayability EPDs represent genetics for greater longevity. Sire B above is expected to have 15% more daughters still in production at the age of six or beyond (+20% vs. +5% = 15% difference) as compared to the percentage of daughters of sire A.

13 DOC - Docility EPD and accuracy. Docility EPDs predict genetic differences in the probability that offspring are scored as 1 (docile) or 2 (restless) as opposed to 3, 4, 5 or 6 (nervous to very aggressive). The higher docility EPD for sire A above is preferred to that of sire B; specifically indicating that 25% more (+15% for sire A to -10% for sire B = 25% difference) of sire A's offspring are expected to have scores of 1 or 2 as compared to offspring of sire B. Generally, the higher the accuracy value, the more progeny with docility scores in groups which have contributed to the EPD, making the EPD more reliable and less subject to change. Only groups with variation in docility scores are used in EPD evaluation.

14 CW - Carcass Weight EPD and accuracy. Carcass weight EPDs are used to genetically design carcasses with weights that fall within an acceptable industry weight range. Optimum carcass weight EPDs for sires will vary according to the types of cows to which the sires are mated and the calf growing/finishing management regime. If mated to cows of equal value, sire A would be expected to produce progeny with carcasses 10 pounds heavier (20 - 10) at harvest than sire B.

15 REA - Ribeye Area EPD and accuracy. Ribeye area EPDs offer an objective

measurement of genetic differences in muscularity. EPDs for ribeye area are expressed in units of square inches, with larger values indicating larger ribeye area and increased expected overall carcass muscularity. Sire A is expected to produce progeny with ribeye areas that are .30 square inches larger (.50 - .20) on average than progeny of sire B.

16 YG - Yield Grade EPD and accuracy. Just as lower carcass yield grades are favored and indicate greater cutability, lower YG EPDs are favored and indicate genetic differences for yield grade and cutability of offspring. When bred to similar cows, offspring of sire A are expected to average .10 (-.10-0) units of yield grade lower than offspring of sire B.

17 MARB - Marbling Score EPD and accuracy. The marbling score EPD is expressed in units of numeric USDA marbling score, with higher values indicating genes for greater deposition of intramuscular fat, or higher expected marbling score and USDA quality grade at a constant age. When mated to similar sets of cows, sire A would be expected to produce progeny with average marbling scores .20 units lower (-.10 - .10) than sire B.

18 SMTI - Mainstream Terminal Index. The mainstream terminal index takes both genetics and economics into account to rank animals in terms of expected profit per carcass produced from weaning to mainstream market endpoints of yield grade 1s and 2s and Select to low-Choice quality grades. It is based on the assumption that Angus-Hereford cows in a two breed rotation are mated to Limousin-influenced terminal sires and is determined primarily by genetics and economics associated with post-weaning growth and yield and quality grade. In this example, if sire A and sire B were mated to similar sets of black baldy cows, sire A would produce progeny with carcasses worth \$15 (\$55 - \$40) more than those of sire B. The mainstream terminal index does not have an associated accuracy value.

*ACC - Accuracy. Accuracy is a measure of the reliability associated with an EPD. For Limousin cattle, accuracy is designated by either a P (pedigree only), P+ (interim pedigree plus own performance in contemporary group) or a numeric value (performance of individual and subsequent progeny in contemporary group) which ranges from 0 to 1. Accuracy indicates the amount of performance information which was used to calculate the EPD.

Note: Carcass EPDs are only calculated for animals have had carcass data collected on them, their parents, or their progeny by either ultrasound or actual carcass data collection. So in the case of Bull B, for him to have pedigree estimates for his carcass values, his parents would have had data collected on themselves or their progeny.

LIMOUSIN TODAY PROFIT TOMORROW

"We use Lim-Flex® bulls on our British-based cows because it allows us to achieve our goal of producing a high percentage of cattle that grade Choice, have higher yielding carcasses, while maintaining feed efficiency and uniformity."

-Erik Roen, Sierra Valley Ranch, California

Limousin and Lim-Flex® (Limousin x Angus hybrid) deliver to your bottom line.
