Plainville Livestock Auction, 1/2 mile West of the US Hwy. 183 & K-18 junction in Plainville, Kansas

9.16.17

Limousin and Commercial Cattleman,

We would like to invite you to LV Bar's First Annual Limousin and Lim-Flex Production sale on Sept 16, 2017 at the Plainville, KS Livestock Auction Barn. We are excited to announce that over the past year Lonely Valley Feedstock Creston, NE has purchased the cowherd from Liberty Ranch. Since the purchase we have developed and branded a new name for our Kansas operation which will be LV Bar. Even though ownership has changed the cow herd and bulls will still be managed by Mike Smith and his family. So, rest assure that the customer service and high-quality cattle that you come to expect at Plainville, KS will remain and only get better.

We have been in the Limousin business for over 30 years and with this acquisition we have grown our cowherd to over 1,000 hd of Limousin, LimFlex and Angus females. Making us one of the largest Limousin Seedstock producers.

In this upcoming sale we will be featuring the dispersal of the entire fall calving cowherd consisting of 120 head. This was mainly to simplify the operations and focus on the spring calving cowherd. Along with that there will be 100 head of first calf heifer pairs we will be offering. These young ladies have the freshest genetics in the breed. They sell with a calf at side and bred back to calve next spring. To be honest someone could start a great herd with these diamonds. To round out the sale we will be featuring five open heifers and 10 herd sire prospects that were hand picked for this sale. You won't be disappointed.

With this sale offering we feel we brought you a volume of cattle that would work in the seedstock business as well for the commercial cattle producer. Whether you need one head or looking for 30 head you can find it on September 16th at Plainville, KS.

We appreciate all loyal customers in the past and look forward to developing those relationships and forging new ones along the way. If you have any questions regarding the sale or the cattle please give us a call anytime.

Sincerely,
Chad Settje, Owner
LV Bar Ranch

On behalf of myself, Debbie, Cole and Jonah we would like to welcome everyone to the LV Bar Ranch Limousin and Lim-Flex production sale.

LV Bar Ranch owners, the Settje Family has committed the last 30 plus years in the production and promotion of Limousin cattle. Their new division named LV Bar Ranch is one of the largest seedstock sources in the entire breed. With well over 1,000 head of cattle at this Plainville, KS location LV Bar will serve as a location and source for commercial and purebred cattleman alike.

As always the #1 goal for us at LV Bar Ranch is making sure the customer is taken care of and treated the way we would like to be treated. We realize that we are not the only source in the business but we firmly believe in what we do, how good our product is and we enjoy the process of teaming up with repeat and new customers to offer them a very best service possible. We know a sale of this size takes a lot of time, effort, resources and labor to make it happen. We would like to extend a big thank you to my family, our employees and all the businesses in the area that have been with us from the start.

To better serve our customers LV Bar Ranch have decided to offer a financing option for the buyers. They will offer free financing through the year 2017. We want our clients to be able to easily invest in our product and build a program that works best for them.

Please log on to our new website at www.lonelyvalley.com where you can stay up to date with what we have going on at LV Bar Ranch.

If I can answer any questions please don't hesitate to give me or any of the staff a phone call as we love to talk cattle.

Best Regards,
Michael L. Smith, Manager
LV Bar Ranch

LV Bar Customer Service is Our #1 Priority

FREE Trucking ...

Free delivery on Central Locations. LV Bar offers its customers free delivery to anywhere in the lower 48 states. As a part of that delivery we work with reputable livestock transportation companies that we feel comfortable with the handling of your cattle in both a professional and conscientious way. LV Bar will do everything possible to deliver your cattle to a central location that is convenient for both you and the trucking company. Central locations for delivery will include auction barns, vet clinics and ranches that offer to serve as a delivery point. We will map out the route after the sale and do our best to get your bulls to you as quickly and conveniently as possible. If you would like to insure your cattle, you can do so on sale day. Most of the cattle will be delivered within 30 days following the sale. If you have questions on delivery then please call the LV Bar office at 785.885.4881.

FREE Financing ...

LV Bar will offer free financing to any qualified buyer through year 2017. Email Randy@RRMktg.com or call at 615.330.2735

Payment ...

Cattle must be paid for at the time of the sale unless prior arrangements are made with sale management at the time of the sale at 615.330.2735.

BW: 91 lbs. WW: 805 lbs. YW: 1,485 lbs.

Highlighting this LV Bar Sale will be a limited number of semen packages on this big numbered 75% Lim-Flex bull. Though he is now deceased, he is more popular than ever and rightfully so. Not only is he deceased but so his is sire MAGS Wazowski, the popular son of the national champion sire DHVO Deuce from the breed matron BOHI Red Robin. The dam of LVLS Bank Account is LVLS Wilma 8116W, a daughter of LVLS Top Criteria. LVLS Bank Account has earned the ranking in the breed as one of the top EPD profiling bulls in the breed. He ranks in the top 1% of the breed for weaning weight with a 95 and yearling weight with a 151 and carcass weight with a 63. He also ranks in the top 10% of the breed for total maternal with a 71, top 20% for \$MTI with a 64.66 and top 25% for ribeye with a .65. He posted a birth weight of 91 pound, weaning weight of 805 and yearling weight of 1485. This huge numbered bull has his second calf crop of calves on the ground now. His first calves were met with great demand and what few have been sold were very well accepted in the market place.

LV Bar Ranch will offer 20 units semen packages for \$1,500. The bull will never go on the open market and there will just be a limited number of packages offered. Thanks to Sullivan Farms, Dunlap, IA and Brown Land & Cattle Co. for their early purchases. Email Randy@rrmktg.com or call/text at 615.330.2735 for details and purchasing your semen.

Lot 2 | LVBR Dax 605D

2 } LVBR Dax 605D

BW: 86 lbs. WW: 775 lbs. YW: 1,210 lbs.

LV Bar is proud to have this young red and double polled purebred bull as one of the highlight lots of this sale. He is sired by the now deceased but once breed top seller WZRK Atlas 8012A. Atlas was a top selling bull in the breed a few years ago as one of the hottest red purebred bulls to hit the market. His first calves are highlighted in this sale and we think will have tremendous interest since he is now deceased. This young bull LVBR Dax 605D is solid in his EPD profile and for sure has a very desirable conformation and unique profile. He posted an 86# birth weight, 775# weaning weight and 1210# yearling weight. We admire that amount of mass, thickness and power he has combined with a tremendous depth of flank and plenty of rib shape and volume. LV Bar Ranch would like to retain semen for in herd use only.

BW: 89 lbs. WW: 718 lbs. YW: 1,175 lbs.

WZRK Atlas is the sire of many of our favorites over the past two years, 608D is no exception. Like the Atlas female that sells in this offering, 608Z is balanced numbered and has a breeding stock look to him. "Dapper Dan" is terribly masculine and rugged in his appearance, much like his impressive sire who was one of the most talked about sale bulls in 2014. 608D pushed down the scales with a 102 WW ratio and an adj YW ratio of 103.

BW: 88 lbs. WW: 740 lbs. YW: 1,210 lbs.

This red, double polled herd sire prospect is a proud representative of the LV Bar breeding program. He is sired by the purebred bull, MAGS Xtra Wet. He has been such a solid producer over the last few years. He posted an 88# birth weight, 740# weaning weight and 1210# yearling weight. He is very clean and sharp up through his head and neck. He is very strong and level across his top line and stands very solid and strong on big feet. This herd sire prospect is red, double polled and a 75% Lim-Flex.

BW: 81 lbs. WW: 680 lbs. YW: 1,165 lbs.

This purebred bull has a world of potential and value and in the market place. He is sired by the once breed top selling WZRK Atlas 8012A. He was the Wulf's Xtractor X233X son that was the breed top seller bred in the Weizerick program. LVBR Doolittle 610D is from a daughter of the multiple trait leading JCL Lodestar on the bottom side of his pedigree. This bull ranks in the top 15% of the breed for ST with a 13 and CEM with a 9. He also ranks in the top 20% for yearling weight with 108 and CW with a 36. He ranks in the top 20% for FT with a -0.016 as well. He posted a birth weight of 81# as we think he will make a very nice calving ease bull. We admire this bull for his extreme depth of flank, fleshing ability and over all desirable look that he has.

BW: 82 lbs. WW: 775 lbs. YW: 1,218 lbs.

This homozygous polled and double black son of MAGS Zarah is one that we think quite a bit of, he is a true herd sire in the making due to his combination of phenotype, pedigree and data. LVBR Dusty 601D is a calving ease specialist who records an 11 CED and 0.3 BW epd. Furthermore, he is end product driven ranking in the top 4% of his contemporaries for MB. MAGS Zarah has withstood the test of time and has been producing leading cattle for over five years now.

LVBR Donnie 604D is a grandson of MAGS Xtra Wet and MAGS Rawhide. Xtra Wet is the Deuce out of the MAGS Puddles cow; we have used his extensively more many years here in KS. He produces cattle that are solid from the ground up and will never make you worry about their structure. 604D will be ready this fall for light service on mature cows. This great lined, nicely balanced bull should add a substantial amount of eye appeal. Marbling is a highlight in his dataset with a .22 MB epd and ranking in the top 20% of the breed.

BW: 87 lbs. WW: 655 lbs. YW: 1085 lbs.

This 68% Lim-Flex bull is double polled and double black. He is a grand son of MAGS Unreal. We admire this bull for his moderation of frame, fleshing ability and depth of flank and rib shape and capacity. It is a bull of this caliber and look that will positively enhance a calf crop and move a new program in the right direction.

Check out this MAGS Apple Jack heifer who is big boned, has lots of rib shape. She is a powerfully constructed heifer, that will make a tremendous cow prospect. Mags Apple Jack combines the genetics of MAGS Xukalani and WLR Ugly Betty. These calves are going to be really good. WLR Ugly Betty will go down as one of the premier females produced in the Wies Limousin program. Her dam is a direct daughter of Coleman Regis.

This Xukalani granddaughter is also goes back to WLR Ugly Betty, who is a son of MAGS Xukalani 691X and from the big league donor WLR Ugly Betty. She is the dam of AUTO Bette, the 2012 National Junior Heifer show grand champion female for Adam Griffiths, Boonsboro, MA. On the bottom side of her pedigree, this premium female goes back to MAGS Yip, Coleman Production and one of our favorite Traveler daughters.

In terms of data, 64D is balanced for calving ease and growth traits, carcass wise she is in the top 20% for MB and top 25% \$MTI.

LVBR Deb is a true diva! Man, this one is sharp! She is striking on the profile, impressive from behind and reads with a ton of quality and balance. Just an October baby, we are really impressed with how good this female is, she just gets better and better each and every day! 65D ranks in the top 15% of the breed for MB and top 20% for \$MTI and is solid in her growth and remaining carcass traits. If you are in the market for an exceptional open heifer who is going to hit home runs as a breeding piece, this is one lot that you need to seriously research.

MAGS Wild Bunch has been a top A.I. sire in our breed and is one of the top sires in the pasture at Liberty Ranch. He is a complete outcross to most established lines of black and polled cattle. His dam is a past national show champion and his numbers are well above breed average. His sons selling in this sale represent his lineage very well and are some of the best in their contemporary groups. Wild Bunch is one of our very top growth bulls, he posts an 82 WW EPD and 119 YW EPD, he also had an adjusted yearling weight of 1,399 pounds.

0302 is our Purebred Angus herdsire who is absolutely spectacular and predictable for marbling, he, his sire and his dam all convert over to the top 1% for both MB epd and \$MTI. His pedigree is one of those coveted, magical matings between Mytty In Focus and GAR Predestined which has produced so many of the leading Angus cattle in the country.

This bull has really made a positive impact in the LV Bar program. He is a son of Coleman Regis 904 and from the proven dam HC Passion 928. He is double black and homozygous polled. He ranks in the top 1% of the breed for scrotal with a 2.10, top 10% for CED with a 15 and top 20% for REA with a .67. You will find his daughters in this sale to have plenty of fleshing ability and solid in their design.

SPRING BRED COWS } daughters of MAGS Xtra Wet

MAGS Xtra Wet is the epitome of what a great purebred Limousin bull should be like. He is a purebred son of the national champion bull DHVO Deuce 132R and from a daughter of the now deceased legend JCL Lodestar 27L. His first prog-eny to sell at public auction are highlighted in this sale and they are true highlights. The biggest attribute of MAGS Xtra Wet is his heaviness of bone and extreme foot size and as we know in any breed of cattle that is the far most important trait. If they are good from the ground up then all is good.

We refer to MAGS Unreal around here, as the "options bull" who ties together so many impressive physical traits, especially for a calving ease sire. If you ever have an opportunity to see him in person, you will be blown away by his mass and substance. When you study him on paper, his CED epd puts him in the top 2% of the breed and his DOC score makes him a trait leader in the particular column. In addition to his exceptionally balanced statistical alignment and phenotypic power, Unreal is direct son of two proven producers in the Purebred Limousin population. His sons replicate his look, calving ease traits and functionality year in and year out.

RRDC Zaneta 11Z has tremendous eye appeal, a proven pedigree and a highly workable data. When you study the pieces that this female brings to the table phenotypically, she is long fronted, level hipped and ideal in her skeletal angles. A daughter of MAGS Unreal, who is the AUTO Dollar General son out of a JCL Lodestar daughter who was one of the most talked about sires to come out of the Magness program. His impact can be felt throughout the the LV Bar cowherd.

On 7.31.17 sells safe bred 7 months to AHCC Zero In 505Z (NXM2018211)

This four-year-old MAGS Unreal daughter sells at the peak of her productive life, we hate to see these good 4 years olds go, especially when they are double polled and double black Purebreds. 25Z is double digits for CED and ranks in the top 10% for ST and top 15% for DOC. This females represents over four generations of RRDC prefixed cattle to be raised here on this ranch. These cattle not only perform well in our environment, they are ideal from an economic predictability standpoint.

This paternal sister to Coleman Windfall is constructed as solid and as stout as any. HC Velvet 007 originated in the production oriented Coleman program; she would be a great place to start if you are looking to add females to your program that are capable of producing future herd sires.

Her sire, Coleman Production consistently sires deep-bodied, moderate-framed, and thick made cattle. They are extremely attractive carcass cattle as well. Production himself scanned an impressive Adj. REA: 15.0 in. and an Adj. IMF: 5.32. As proof, he sired the Reserve Champion Lim-Flex® Pen of 3 Bulls at the 2009 & 2010 National Western Stock Show.

Top 20% for YW, CW, MB and \$MTI.

An impressive homozygous black/homozygous polled mature cow who has proven herself time and time again. This females constantly impresses us from year to year. She has certainly paid her dues here in Kansas. A direct daughter of Coleman Production, who is a very deep, thick-made Angus bull that scanned a 15 inch ribeye and a 5.32 IMF score. He has tremendous growth, carcass and maternal value. She ranks in the to 10% for MB and \$MTI, making her an ideal candidate to produce terminally oriented herd sires.

LH Xcel Boy 113X is a double homozygous son of LH Rodemaster 338R that has done a tremendous job at Liberty Ranch. He has earned a -0.2 for birth and 117 for yearling weight. He is a 75% Lim-Flex bull that scanned a 15.16 for REA and 3.53 for IMF. His actual performance was 15.16 for REA and 3.53 for IMF. He projects this positive performance into offspring which makes them more in demand.

On 7.31.17 sells safe bred 6.5 months to AHCC Zero In 505Z (NXM2018211)

If you are an appreciator of premium genetics and proven cow families, you will enjoy studying the lineage on this female. 18Z goes back to Bohi Red Robin, Amy Jo and Cane Ridge Daphne. They are truly some of the leading matriarchs of the Limousin breed.

RRDC Zeanees is in the top 15% of the breed for docility and in right at 1.0 for BW EPD.

18Z's sire, MAGS With Rhythm is a flushmate to MAGS Wazowski and MAGS Wahoo. He is also a full sibling in-blood to MAGS Water Lily. She profiles just as you would expect her to, particularly cool through her front one third, sleek patterned and sound structured.

We used Bar J Timberline quite heavily for several years and to be quite honest, if we knew all the female were going to last as long as her sisters and look as good as this one does, we would have used him for a lot longer. In terms of skeleton, there isn't a hole in this one. Great hiped, neat topped and ultra cool front-end.

A solid, negative birthweight female who excels phenotypically. We love the maternal look that 82C gives you. She is super high quality, nicely balanced and ideal in terms of her teat size. The maternal side of her lineage traces back to Leachman Grand Canyon and several top Red Angus females. Our Red program was very selective, and as you can see, the quality was passed on from generation to generation.

Atlas was our top selection out of the elite offering from the Wieczorek program, this Homozygous polled red A.I. sire that is featured in the Grassroots line-up, is certainly one that has a dynamic performance profile and intriguing phenotype. His fleshing ability, softness through his mid-rib and outcross pedigree will have a significant impact on our herd. Study the maternal attributes that he brings to the table and you can't help but be impressed.

LOT 127A - LVBR 157E, a 4.15.17 polled, black bull sired by RRDC Bud 4006B LFM2124239, BW. 48 lbs.

Here is one of the few daughters of WZRK Atlas that we are offering for public auction. Atlas was one of the most talked about bulls in the 2014 sale season out of the Wieczorek program. Currently he boast a™ epd of 64 is in the top 1% of the breed for docility EPD.

This female does exactly what the Atlas daughters are supposed to do; she is moderate framed, ruggedly constructed, easy keeping, good tempered and a great milker.

There is a strong argument that this female leads off the sale based on her look and pedigree according to several of our team members.

We refer to MAGS Unreal around here, as the "options bull" who ties together so many impressive physical traits, especially for a calving ease sire. If you ever have an opportunity to see him in person, you will be blown away by his mass and substance. When you study him on paper, his CED epd puts him in the top 2% of the breed and his DOC score makes him a trait leader in the particular column. In addition to his exceptionally balance statistical alignment and phenotypic power, Unreal is direct son of two proven producers in the Purebred Limousin population. His sons replicate his look, calving ease traits and functionality year in and year out.

Talk about a young two-year-old that has an amazing future ahead of her, we are so impressed with her to date. We couldn't ask for a better udder and teat placement, and here is one that is feminine made and neat patterned. 31C is a superstar in terms of calving ease, she is a trait leader for CED with a whopping 18 CED and a -1.2 BW. On top of these birthweight advantages, she also ranks in the top 5% of the breed for MB and top 10% for \$MTI. Being homozygous polled, double black and a total outcross on the bottom side of her pedigree makes this female even more desirable in terms of marketability and mating versatility.

LOT 141A - LVBR 175E, a 4.21.17 polled, black bull sired by RRDC Bud 4006B LFM2124239, BW. 82 lbs.

This grand daughter of MAGS Unreal has done a nice job in production with her bull sired by RRDC Bud 4006B. She has formed a very well structured udder with uniform teats. She is balancing her weight based on how much she is putting into her calf. This young pair is a prime example of what you can expect from the LV Bar Ranch program.

LOT 150A - LVBR 160E, a 6.2.17 polled, black bull sired by RRDC Bounty Hunter 566B, BW. 46 lbs.

RRDC Bounty Hunter is a young sire in our program, however with daughter like LVLS 160C in production, he may get utilized heavier this year. 160C is a long patterned, growth oriented female who is going to inject some additional growth on paper and visually into your cowherd. She recorded a 110 WW ration with WDA of 4.15. This young female is a data spread specialist with several highlights including CED, ST and DOC.

Here is a neat females who ties together CED, ST and DOC traits. Double polled and double black, granddaughter of MAGS Unreal. LVLA 112C is was born and bred at the Kansas ranch, just as the 4 generations before her were. RRDC Lodestar 217W is a household name around here, she truly is a female who stamped her progeny year in and year out.

LVLS 134C covers both ends of the genetic profile readout beautifully, she is a 16 for CED which puts her in the top 2% of the population for that and MB; meanwhile she calculates out a 68 \$MTI as well. This homozygous polled ¼ blood is a Rito 1198 granddaughter by a son of MAGS Unreal. Give this one another year and you won't believe the quality of female that you are going to have on your hands.

The facts speak for themselves when you study the pedigree and performance profile of LH Zip Around 146Z. Zip Around's growth numbers are particularly impressive as they are generations deep on both sides of his pedigree. He, his sire and his dam all rank in the top 10% or better for both WW and YW epd as well as all being in the top 25% or better for MA and top 20% for \$MTI. This LH Rodmaster son, is homozygous polled and homozygous black in addition to have a stacked data set; his combination of so many desirable traits make him a "go-to" sire for us.

LOT 172A - LVBR 83E, a 4.26.17 polled, black heifer sired by RRDC Bounty Hunter 566B NXM2087744, BW. 56#

These LH Zip Around two-year-olds are particularly useful in their design, and functionally made. We are so pleased with this group of females and the particular value that they may add if you bring them to the system. Zip Around himself is an LH Rodmaster son of MAGS Xtra nice who is a Deuce X BOHI Red Robin.

LOT 176A - LVBR 21E, a 5.28.17 polled, black bull sired by MAGS Back Room 111B LFM2056794, BW. 82#

This double polled / red daughter of LH Zip Around has a nicely balanced data profile with a 71 WW, 102 YW and 27 Milk EPD, as well as being one of the most desirably balanced females in terms of DNA potential for carcass traits. LH Zip around is a full brother to MAGS Wazowski and MAGS With Rhythm, who we used heavily in our program. You can't go wrong with those Red Robin X Deuce progeny. They are as good as they come. The bottom side of 21C's pedigree is heavy with Wulf and GV breedings, which can only mean one thing ... this female s bred to perform in any environment!

Our Wolf Creek females have really hit it out of the park in terms of producing cattle that have a great look and are doing an exceptional job as first calf heifers.

This halfblood Lim-Flex is statistically doing exactly what we bred her to, her data profile reads with below average birthweights, above average growth and excellent marbling.

There are many years, that these females would without a doubt wouldn't have made the sale pen, however with the blending of the cowherds, we are able to let some of these exceptional two year olds go.

We have had more inquiries for good red females the past year than we have had in a long time. We are firm believers that the market for quality red polled genetics is coming back on both the dam and sire side of the equation. This particular females goes back to one of your premium Red Angus cows, MBAB M160.

We are not exaggerating when we tell you that this group of two year olds is absolutely exceptional. The future that is ahead of them is so bright; we cannot wait to see them go into programs and really make an impact. This may be one of the best sets of young production cows to sell in quite some time. Like so many of these females out of Wolf Creek cows, they are calving ease deluxe and bring significant marbling to the table. Though just a two year old, she has a tremendous cow look. Deep centered, maternal fronted and level designed. 118C currently ranks in the top 5% of the Lim-Flex population for CED, top 10% for MB and \$MTI, and the top 15% for BW.

We don't often promote our cattle as show cattle, or for that matter we rarely mention them being designed like females who are headed for backdrops; however, this is one that we feel could certainly go on and make someone some superior, first class show cattle. Her skeletal angled, dimension and upheaded look are undoubtedly traits that could help you find your way to the winner's circle with the next generation. Speaking of cow power, 142C goes back to three phenomenal females, SVF Forever Lady 1121, Cna Ridge Daphne and EXLR Luvly 084F.

This 45% Lim-Flex son of Coleman Regis 210 has done a superb job at LV Bar Ranch. He is from a daughter of Coleman Production 608. He has earned the breed ranking of the top 1% for scrotal, top 10% for yearling weight with a 116, top 15% for carcass weight and \$MTI. These two daughters are for sure a prime example of his siring excellence.

Coleman Donna, Coleman Blackcap 211 and the Blackbird cow families all have had a big role in producing many great replacement females and sires over the years. It is special treat that we are able to share this genetic collaboration with you. 133C ranks in the top 20% for CED and MB epds. Both of which have significant economic importance. An eye appealing individual who is long necked, deep centered and as athletic as they can make one.

MAGS Wild Bunch has been a top A.I. sire in our breed and is one of the top sires in the pasture at Liberty Ranch. He is a complete outcross to most established lines of black and polled cattle. His dam is a past national show champion and his numbers are well above breed average. His sons selling in this sale represent his lineage very well and are some of the best in their contemporary groups. Wild Bunch is one of our very top growth bulls, he posts an 82 WW EPD and 119 YW EPD, he also had an adjusted yearling weight of 1,399 pounds.

Stop right here if you are looking for carcass power, this female is absolutely stacked all they way from YG through to MB, making her especially unique. This high percentage Angus Lim-Flex female goes back to the absolutely dominant females in the Limousin breed, MAGS Lady Ace, who is one of the leading revenue generators of the early 2000's for Magness Land and Cattle. 100C is proving to be a heavy milker and is putting everything she has into her calf, we are constantly impressed by the bang up job that she is doing.

MAGS Wild Bunch is a Cornhusker son that we have utilized for nearly 5 years in the KS operation, he has perpetually been one of our top sires who produces calves right at herd average with WW and YW ratios above breed average. 141C is one that has impressed us from day 1 when her Registered Angus dam had her. Her data set is extremely indicative of just how her and her siblings have performed. They do everything that is asked of them and they don't leave anything on the table. Hard working females!

MAGS Zarah is one of the many exceptional bulls that have come out of the Magness program and have been incorporated into our breeding scenario, a direct son of MAGS Whitcomb, who is one of the premier MK sires in the breed! Zarah himself posts a 34 MK epd and ranks in the top 10% of the Lim-Flex sires for milk. Zarah is homozygous polled and homozygous black and has taken the guess work out our selection process to add additional maternal into several pedigrees here at the ranch. A maternal brother to leading A.I. sire, MAGS Yip out of the renown Magness/Linhart donor, AUTO Carminda.

LVLS 15C is truly one of the phenotypic rockstars of this offering, which is no surprise as she goes back the famous Dixie Erica Angus cow family, who has been long known for a very specific look that is unique and desired. The MAGS Zarah progeny have continuously impressed us with their balanced performance profiles, their structural correctness and how well they work in our environment. This homozygous polled, low percentage Lim-Flex female would work in both a performance program or one that made their money producing show cattle. Her numbers indicate calving ease and high marbling, both of which are great predictors of profitability.

LOT 221A - LVBR 140E, a 5.2.17 polled, black heifer sired by MAGS Back Room 111B LFM2056794, BW. 49#

LVLS 140C is double polled and double black 2 year old that is a 1.1 for BW and 93 for YW and ranks in the top 20% for MB and \$MTI. MAGS Xtra Wet has over 150 calves registered in our system; if you know our management team you will know that a bull must be "doing his job" on a consistent basis, for us to allow him to have that much of a genetic impact year after year. Study this one from her shoulder forward, she is constructed impeccably!

MAGS Xtra Wet has sired some of our favorite production cows in this system, thankfully we were blessed to have him walking our pastures for several years, so we have several females that we can sell by him. 26C is an 11 CED female that is in the top 10% for ST and top 15% for DOC. Moderate framed, big hipped and beautiful udder are just a few of these females attributes that make her stick out from the crowd.

What is a Lim-Flex®?

Limousin are the ideal complement to British-based cattle. With Lim-Flex® hybrids, there are genetic options to fit every need, from fullblood and purebred Limousin to Lim-Flex hybrids. Breeders can offer a just-right shot of Limousin to meet the needs of any crossbreeding program.

Lim-Flex stands for Limousin with muscle and efficiency, along with flexibility — the most significant strength of this powerful genetic blend:

- Flexible seedstock for simple, easily managed crossbreeding;
- Flexible market progeny that consistently hit dressing percent, yield and quality grade targets;
- Flexible females adapted for efficiency across a wide range of environments.

FLEX stands for Limousin Efficiency Cross — the beef industry’s answer to profitable system-wide production of case ready products. NALF’s UltraMate Xbreeding System outlines how to use Limousin and Lim-Flex seedstock on different types of commercial cows to hit end-product and maternal targets.

Registered Lim-Flex are backed by documented pedigrees, EPDs, and genomic data provided by the North American Limousin Foundation.

Dr. Jim Gosey, beef specialist emeritus at the University of Nebraska, states, “A carefully constructed British x Continental can come a lot closer to hitting most of the targets for reproduction, production, and end-product than any straightbred I’m aware of.”

ULTRAMATE XBREEDING SYSTEM	Step #1	Step #2	Step #3	Breed
	Scope Out Your Cows	Aim at the target Market	Fire with the Right Bulls	Blends of Progeny*
	Angus (British) & British Cross	➔ Mainstream ➔ Marbling	➔ Limousin ➔ Lim-Flex	== 50/50 == 25/75
	Angus (British) Continental Cross	➔ Muscle ➔ Mainstream ➔ Marbling	➔ Limousin ➔ Lim-Flex ➔ Lim-Flex	== 75/25 == 50-50 == 25/75
	Continental (High percent)	➔ Muscle ➔ Mainstream	➔ Limousin ➔ Lim-Flex	== >75 == 62/37

* Indicates approximate percentage of Limousin and Angus (black or red), respectively (i.e. 50/50 = 50% Limousin 50% Angus). British may also include Hereford and Shorthorn, which impacts sire selection strategy (e.g. when using Hereford cross cows and targeting mainstream market, select sires for higher marbling as compared to Angus and Shorthorn cross cows).

Progressive cow-calf producers recognize the value of hybrid vigor: 20% more pounds of calf weaned per cow exposed; 1.3 years of additional cow longevity; 30% greater lifetime production; and increased fertility. The Limousin and Lim-Flex UltraMate Crossbreeding System makes crossbreeding easy to produce calves that excel in any market and replacement females that have longevity and productivity.

LIMOUSIN

Limousin Today - Profit Tomorrow

Using Limousin & Lim-Flex® EPDs to Aid Selection

The North American Limousin Foundation (NALF) uses all available information to predict an animal's EPD. This information includes: individual performance, pedigree, progeny and grand progeny performance, and genomic information. All this information is combined into one, easy to use, number that helps producers make genetic improvement in their herd.

Since the spring of 2015, NALF joined 11 other U.S. and Canadian breed associations to form the largest international multi-breed cattle evaluation in the world through International Genetic Solutions (IGS). This allows growth and carcass EPDs for Limousin and Lim-Flex® (Limousin x Angus hybrid) animals to be directly compared with Red Angus, Simmental, Gelbvieh, Shorthorn, Maine Anjou, and Chianina animals (and all their hybrid animals). This makes selection decisions easier for commercial producers.

Listed below are the definitions for Limousin and Lim-Flex EPDs and the units in which they are published. For more information visit www.NALF.org or call 303-220-1693.

Maternal and Growth Traits

Calving ease direct (CED): Percent of unassisted births of a bull's calves when he is used on heifers. A higher number is favorable, meaning better calving ease.

Birth weight (BW): Predicts the difference, in pounds, for birth weight of the calf.

Weaning weight (WW): Predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to weaning.

Yearling weight (YW): Predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This is an indicator of growth from birth to yearling.

Milk (MK): The genetic ability of a sire's daughters to produce milk expressed in pounds of weaning weight.

Total maternal (TM): An index that combines growth and milk information as a prediction of the weaning weight performance of calves from a sire's daughters. A greater TM value means a mother that returns comparatively higher weaning weights on her calves. $TM \text{ Index} = MK \text{ EPD} + \frac{1}{2} WW \text{ EPD}$.

Calving ease maternal (CEM): Represented as percent of unassisted births in a sire's first-calving daughters. A higher number represents more favorable calving ease.

Scrotal circumference (SC): Is a good indicator of age at puberty, and is a highly heritable trait. EPDs for scrotal circumference are expressed in centimeters, with higher values indicating genes for larger yearling scrotal circumferences of sons and earlier puberty of daughters.

Stayability (ST): Predicts the genetic difference, in terms of percent probability, that a bull's daughters will stay productive within a herd to at least six year of age. The stayability EPD is one of the best measures currently available to compare a

bull's ability to produce females with reproductive longevity.

Docility (Doc): Predicts genetic differences in the probability that offspring are scored a 1 (docile) or 2 (restless) as opposed to 3, 4, 5 or 6 (nervous to very aggressive). Higher EPD values for docility represent genetics for calmer behavior.

Carcass Traits

Yield grade (YG): Differences in yield grade score, which is a predictor of percent retail product. Smaller values suggest that progeny will have a better lean to fat ratio.

Carcass weight (CW): Differences in pounds of hot carcass weight, adjusted to an industry standard age endpoint.

Ribeye area (REA): Differences in ribeye area in inches between the 12th and 13th rib. Greater ribeye areas are preferable.

Marbling (MB): Predicts the differences in the degree of marbling within the ribeye as expressed in marbling score units. Greater marbling numbers are preferable and are an indicator of higher carcass quality grades.

Fat (FT): Differences for fat thickness, in inches, for a carcass over the 12th rib. Smaller numbers of fat thickness are preferable as excess fat can be detrimental to yield grade.

Mainstream Terminal Index (SMTI): Predicts genetic differences in profit per carcass by combining the potential for and value of post-weaning growth, quality grade and yield.

NALF-Tyson Fresh Meats LIMOUSIN GRID

Marketing opportunity for Limousin cross fed cattle.
For more information on the Limousin Grid, contact
the NALF office at 303-220-1693 or visit NALF.org.

Market Cattle on the Limousin Grid

The North American Limousin Foundation has partnered with Tyson Fresh Meats to provide a Limousin Grid to market commodity cattle.

The North American Limousin Foundation (NALF), in an effort to further promote Limousin genetics, has teamed up with Tyson Fresh Meats to create a value-added cattle feeding pricing program. Tyson is offering feeders the opportunity to market cattle on a Limousin Grid, which is designed to pay substantial premiums for conventionally fed cattle. This grid rewards cattle that excel in quality and yield grade.

The grid uses average harvest results from all Tyson plants for each week's deliveries. The premiums are tremendous for cattle that exceed the week's averages for Prime, CAB, and Yield Grade 1s and 2s.

In the example grid, the USDA 5 Area Weekly Weighted Average Price is used as the initial starting price. Since the cattle are being compared to the weekly average results for all Tyson plants, the actual harvest averages are figured for the week with resulting premiums and discounts for the clean-up cost. The average discount total of \$5.56/cwt was used to subtract the \$3.88/cwt of premiums for a difference of \$1.68/cwt, which is then added to the base price

of \$222.89/cwt for a new starting price of \$224.57/cwt. The producer's cattle are then figured against the results of the plant averages for each category and the variances are calculated for the final price.

As a result, the starting base price is adjusted upwards since the cattle are competing against all cattle harvested for the week at Tyson plants. If a set of cattle exceeds the averages for quality and yield grade while keeping discounts at a minimum, the ability to achieve an additional bonus is very apparent.

Limousin cross cattle have the ability to do well on this grid given their natural ability for yield and grade. The advantages of Limousin cattle to put a high percentage of cattle into the Yield Grade 1 and 2 categories while achieving quality grade standards when fed correctly with a moderate implant program equals premiums for the feeder.

To be eligible to be marketed on the NALF-Tyson Fresh Meats Limousin Grid, cattle must carry a Lim-Choice panel ear tag and be reported to the NALF office. For more information on this grid or other marketing opportunities through natural and NHTC programs, contact Mark Anderson, NALF executive director, at 303-220-1693 or Mark@NALF.org.
