He combines the calving ease, eye appeal and correctness of design of Rueshaw with additional skeletal width and muscularity. His dam, Barbara B3518R, is a true generator of high performance, stout featured herd bulls. Breed with confidence in this stout-built outcross sire. Rhubarb is from one of the premier Akaushi maternal lines in the entire world, the Namiko line! The Namiko maternal line has produced elite proven sires used heavily around the globe including Ashwood F X0014, Bald Ridge Henshin, Ashwood Park Virile, and Kalanga Kajikari B0125. We literally searched across the U.S. to find and develop a unique and purpose filled donor pen. We wanted to develop numbers of top foundation genetics. One of the original foundation bulls that excelled in marbling was Judo. He has been on our radar for some time. In our search, we found a great breeding program in 16 Peaks Akaushi. When they hand picked their startup herd from Heartbrand, they may have two of the best Judo daughters to ever leave Texas. Heartbrand 2107A is a unique breeding piece with noted production value. She is sired by Judo, but she is also the maternal sibling of Heartbrand Rhubarb who brings in his growth, milk and marbling strength. - This embryo lot puts the spotlight on the incredible Kaedemaru. SOR Hastings, the sire of these embryos, packs a tremendous genetic punch. He is the son of the all-time great sire, Big Al, and his dam is the extremely high profile dam, WSI Kaedemaru 2, who is a daughter of Kaedemaru! Performance is bred into his genes. The dam of the embryos, R15G, pulls in more of the Kaedemaru influence through her sire WSI Umemaru, who is the highly popular Hikari son of Kaedemaru. Rowe R15G is a genetic standout in her own right. She is from the Homare maternal line and comes with a sire stack of Kalanga Red Star x Shigemaru x Hikari x the J 30E cow. There is tremendous genetic value in these embryos.
